# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "Italics." State-aid Railroads are distinguished by a "§."

# American Railroad Journal.

**Saturday, September 15, 1877.**

### Financial and Commercial Affairs.

A fairly active inquiry has been noted throughout the week for accommodation in the financial line on a generally steady basis as to rates. The supply of Money available to responsible borrowers, however, has been more than sufficient to meet all urgent requirements at the current quotations, and the market has been devoid of any symptoms of uncomfortable stringency. Call loans have been quoted here at the close at 3@7, with most of the important negotiations reported on the basis of 3@5 per cent; and very choice to prime mercantile credits are rated at 5½@7 per cent per annum for the best names. The outflow of currency to aid the crop movement continues. The City bank exhibit of last week indicated in the loan and discount average an increase of $142,000, and in the item of circulation of $185,100. The average of deposits was augmented $1,123,400. The legal tender reserve was reduced $2 826,700; and the specie average enlarged $3,931,500. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $12 621,975, as against $11,798,025 the preceding week. The City bank exchanges in currency reached $397,270,386, or a daily average of $66,211,731.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $12,644,838; special deposit of legal tenders for the redemption of certificates of deposit, $51,855,000; Coin, $106,525,759, including of Coin certificates, $40,102,600.

The outstanding amount of legal tender notes is $357,976,164. The National bank circulation is now $315,897,894 of currency notes and $1,425,770 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,597,000.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $47,347,298, against $47,422,467 the preceding Wednesday; and a coin board of $89,014,561, against $87,710,051 on the return of a week earlier. The Customs revenue of the port during the past week was $2,474,000.

Government securities have been in generally moderate demand and variable in price, fluctuating with Gold. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 121½@122½; do. 6s, 1881, registered, 109⅝@109⅞; do. coupon, 110¾@111; do. 1865, new, registered, 105⅜@105⅝; do. coupon, 105⅜@105⅝; do. 1867, registered, 107⅜@107⅝; do. coupon, 107⅜@107⅝; do. 1868, registered, 109¼@109¾; do. coupon, 109⅛@109¾; do. ten-forties registered, 107⅛@107¾; do. coupon, 108¾@109; do. five per cents 1881, registered, 107⅜@107⅝; do. coupon, 107⅜@107⅝; do. 4½ per cents, 1891, registered, 105⅝@105⅞; do. coupon, 105⅝@105⅞; do. 4 per cents, 1907, reg., 102½@102⅝; Central Pacific Gold Bonds, 105¾@106¼.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,605,650, and $15,244,000 as security for public deposits.

State Bonds have been in fair request on investment account at generally steady rates. Railway Mortgages have been in quite active demand and generally quoted stronger in price, with the available supply of the more desirable loans reported as comparatively limited. And in the line of Railway and Miscellaneous share property the aggregate of the week's business has been less extensive, with more or less of hesitancy apparent in the speculation for higher prices, notwithstanding the generally favorable position and outlook of the carrying interest. Toward the close the market was quite weak and feverish.

Gold has been moderately active within a narrow range as to price. The demand on speculative account has been remarkably urgent; and for custom house purposes the inquiry has been moderate for the season. The export drain has been insignificant as contrasted with the liberal imports. The extremes of the price during the week have been 103¼@103⅝, closing at 103⅜, as against 103¼ on Wednesday of the preceding week. The specie outflow last week was only $294,000, making the total exports of specie hence since January 1, $22,312,787, against $39,833,722 the same time in the preceding year. The imports of specie at this port last week were $1,229,761, and since January 1st have been $9,898,182, as against $3,613,867 same time last year. The Customs demand for gold last week averaged $412,334 per day. Foreign Exchange has been quoted stronger and more active, influenced in part by the later financial advices from Europe. Bankers' sixty day bills on London closed on Wednesday at $4 82½@$4 87½; sight bills on London at $4 86¾@$4 87½ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $4,075,726 as against $4,117,698 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,497,083 of Dry Goods, and $2,578,643 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the liberal aggregate of $6,007,457, against $4,876,524 same week in 1876.

The income of the Government from internal revenues last week was about 2¾ millions, and and from Customs last week about 3¼ millions.

An active movement has been reported in the leading kinds of domestic produce, especially in Breadstuffs, Provisions and Petroleum, which have been quoted stronger in price. The export dealings in wheat and Corn have been extensive; and 15,000 bushels mixed Western Oats were purchased on Tuesday at 37cts. per bushel, for the Liverpool market. Cotton has been in fair demand and quoted dearer. Foreign merchandise has been more sought after and quoted as a rule, firmer.

More animation has been apparent in the line of metals, prices of which have been quoted, as a rule, however, in favor of buyers. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25 50@$26; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50; (with sales of 4,000 to 5,000 tons (in good part for water pipe purposes.) Forge $16@$17; American Rails at works $35@$38; (with 3,500 tons reported sold.) Old Rails $18@$19. Wrought Scrap $22@$24. Steel Rails, on the basis of $47@$49 at the mills. Ingot Copper brisker on the basis of 17¾@18 for early delivery.

The dealings in Hardware, Boots and Shoes and Dry Goods, have been quite extensive and on a generally firm basis as to values of seasonable classes of stock.

In Ocean freights the activity has been continued though on a somewhat lower basis as to rates, chiefly in the Grain and Petroleum interests, closing generally with more steadiness. Liverpool steamer rates at the close for Grain, quoted at 10d.@10½d, Provisions, 45s.@60s.; Tallow, 40s.; Leather, 55s. Measurement Goods at 20s.@25s. per ton; Cotton, ½d. per lb., Tobacco 40s. Liverpool, by sail. Cotton, 7-32; Grain, 9½d.@9½d. Oil Cake and Slate, 20s.; Measurement Goods 2Cs.; Tobacco 30s.@35s.; Grain rates on charter hence for Cork and orders left off at 7s.@7s. 3d.; for the Continent at 6s. 10½d.@7s. 3d.; and from Baltimore for Cork and orders, 6s. 9d.@7s. 3d. and from Philadelphia at 6s. 9d. per quarter. Refined Petroleum hence for Cork and orders, 4s. 9d.@5s. 3d.; for the Continent, 4s. 3d.@5s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

### Railways in India.

The report on railways in India for the year 1876-77, furnished to the Government there, shows that there are now open 6937 miles, of which 479 miles were completed in 1876. Of the entire length 767 miles are laid with a double line, 5748 are constructed on the 5 feet 6 inch gauge and 1162 on the metre gauge. Works in process of construction have been rapidly advanced. The revenue from the lines showed an improvement over the previous year, the Government being called on to supply only £588,467 for guaranteed interest, against £1,073 882 for the year previous. A more liberal policy of management has stimulated the traffic on the lines. On some of them passengers are carried for a farthing a mile, and rates on grain, coal, etc., as low as a half penny per ton have been tried with success.

☞ The North and South Narrow Gauge Railway was sold on the 4th inst. to the Columbus and Atlanta Air-line Railroad Company for $40,500. The road is operated for 21 miles and is well equipped. The State had indorsed its bonds for $240,000, and it was sold because of default of interest. A company in Columbus, Ga., bought it and will extend it 10 miles. The line was intended originally to extend from Columbus to Chattanooga, Tenn., and work to the amount of over $250,000 has been performed on it.

☞ The St. John (N. B.) News says that the action of Calais, in voting $90,000 for the extension of the St. Croix and Penobscot Railroad to Passadumkeag, so as to connect with the European and North American Railway and meet the Megantic Railway from Montreal, is regarded as a severe blow to the Short Line, as Calais will hardly aid the latter route after having contributed so liberally to the former. Eastport, on the other hand, is to have the Short Line, and is seriously agitating its extension to Calais.

☞ The Hempfield Railroad, a short line 32 miles in length, connecting Washington, Penn., with Wheeling, West Va., was sold by the United States Marshall on the 30th ult. for $4,100. It was purchased by William Keyser, First Vice-President of the Baltimore and Ohio Railroad Company, which will hereafter operate the line. The sale was subject to a mortgage amounting to $103,000.

### The Coal Trade.

For the week ending the 1st instant, the total tonnage, as reported by the several carrying companies, amounted to 309,443 tons, against 286,842 tons in corresponding week last year, an increase of 22,601 tons. The total amount of anthracite mined for the coal year is 12,914,169 tons, against 10,678,360 for same period last year, an increase of 2,235,809 tons. The quantity of bituminous coal sent to market for the week amounted to 98,873 tons, against 77,227 tons in corresponding week last year, an increase of 21,646 tons. The total amount of anthracite mined for the year is 2,102,952 tons, against 2,255,757 tons for corresponding period last year, a decrease of 152,805 tons. The total tonnage of all kinds of coal for the week is 408,316 tons, against 364,069 tons in corresponding week last year, an increase of 44,247 tons. The total tonnage of all kinds of coal for the coal year is 15,017,021 tons, against 12,934,117 to same date last year, an increase of 2,133 044 tons. The receipts at Perth Amboy for the week ending on the 1st instant were 16,762 tons, the shipments 26,092 tons, leaving a stock on hand of 55,678 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week of August was 89 478 tons, of which 73,984 tons were coal, and 15,539 tons coke. The total carried for the year is 2,996,907 tons, of which 2,388,017 tons were coal and 557,015 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Sept.* 10.

☞ The Abendroth & Root Manufacturing Company have challenged Messrs. Babcock & Wilcox to meet them in an economy test to determine the comparative merits of the Root and the Babcock & Wilcox boilers, at the exhibition of the American Institute in New York this fall, for from one to five thousand dollars a side, each party to select one man and those two to select a third, as judges, they to make all rules and regulations, and their report to be final.

This looks as if the tests made of the Babcock & Wilcox boilers at the Centennial Exhibition had developed unexpected good features and results superior to other boilers in economy and efficiency. If these tests were carefully conducted under the supervision of competent judges and experts in engineering, we see no reason for a new trial to determine comparative merits, and the outlay of money would be simply a waste.

☞ In the U. S. District Court at Memphis, Tenn., on the 3d inst. Judge Trigg rendered a decision in favor of William Butler Duncan and others against the Mobile and Ohio Railroad. He held that the Tennessee substitution bonds constituted a prior lien on the road within the limits of Tennessee, and ordered the sale of that portion of the line for their liquidation.

☞ The New York Central and Hudson River Railroad Company have declared a quarterly dividend of 2 per ct.; the Western Union Telegraph Company a dividend of 1½ per cent; the Lehigh Valley Railroad Company a dividend of 1 per ct.—all payable in October.

☞ A branch of the Atchison, Topeka and Santa Fe Railroad from Florence to Eldorado, Kansas, about 30 miles, was formally opened on the 5th inst.

☞ An appeal has been taken in the Iowa Central Railroad cases in the United States Circuit Court to the Supreme Court of the United States from the order confirming the sale by the Cowdry party

**Practical Talks on Mechanical Reform.**

The subject of boiler inspection has received so much attention by writers on engineering science that little if anything remains to be said regarding it. The Hartford Steam Boiler Inspection and Insurance Company have undoubtedly done much to bring the matter before the public in a practical manner, and their system of inspection has prevented hundreds of explosions and disasters besides having a salutary influence in inducing the exercise of more care, attention and caution. In our "Practical Talks on Mechanical Reform," we cannot ignore what this company have done and are doing. In one sense it matters little whether they are pecuniarily successful or not, their aims and the results of their work are what interest the public most. They publish their reports extensively and their hints and suggestions are timely and judicious. From a publication of theirs named "The Locomotive," we clip the following remarks relative to the hydrostatic test of boilers:

The application of hydrostatic pressure to steam boilers, with a view to determining their fitness for use under steam, is so universal a practice with builders and inspectors, that to question its utility and propriety, is to inspire doubts as to the thoroughness of one's engineering education, and invoke severe criticism; and yet, it cannot be denied that much damage results from the system as practised. It is usual to delegate the duty of "testing," to persons totally unacquainted with the strength of iron or the damaging effect of sudden increments of pressure upon sheets already heavily strained; or, at least, they are not selected because of any particular fitness, and, in consequence, injudicious strains are placed on boilers, and the tensile strength of the iron seriously impaired thereby. We have frequently been told by steam users when discussing the relative merits of various systems of inspection, that they feel perfectly secure, because their boilers were built under special contract, and were subjected by the maker to 200 pounds cold pressure, meaning to have us infer, that after such usage, they must surely not fail under 100 pounds of steam; but, we have made it our business to probe these parties further, and discover that seams were strained, braces broken, bolts sheared off, or insufficiently stayed surfaces distorted. These are the apparent results—that which they don't see is the most injurious, and cannot be remedied as are the others.

They remind us, too, that the ultimate tensile strength of good iron is 50,000 to 60,000 pounds, forgetting that all the material used in construction—indeed most of it, will not bear more than half that amount, and further, that experience demonstrates the necessity of recognizing but about one sixth of this figure available in constant use.

Let these persons, so confident of the ability of their boilers to withstand such severe and frequent tests, estimate the accumulated pressure of 100 pounds per square inch, or, a single inch of the boiler's length, measured, we mean, in the direction of its axis, and stand aghast at the tremendous force constantly struggling to free itself from its iron prison; or, will they prefer to listen to the result of an experiment, made at the Fort Pitt Iron Works, Pittsburgh, Penn., with a cylindrical boiler, constructed of steel plates one fourth of an inch in thickness—by that establishment, for the Government, with a view to testing its adaptability to such use, relatively with iron. The trial was made in presence of the proprietors of the works, the Government Engineer Officer,—under whose supervision it was built—the eminent constructing and mechanical engineer, Thatcher Perkins, and others. Measurement of the "girt" of the boiler was made—with a steel tape—before and during the process of pumping in cold water, and, when the pressure reached 780 pounds, a permanent enlargement of three and three-fourths inches was found to exist, in the direction of the circumference of the boiler—*though no leaks were visible*—and, at 820 pounds, rupture occurred. It were well here, not to overlook the influence of the successive strokes of the pump, acting as a "water ram" on the pregnant boiler.

There is no doubt that boilers are very often severely and permanently injured, by the hydrostatic pressures to which they are subjected, it order to prove that they are strongly built. Each successive test weakens them, until they fail to respond to the requirement to longer bear the burden, and rupture, as did one at Mobile, while under the manipulation by this intelligent process of the U. S. Government *Inspector*.

But there is another feature: So popular has this method become that implicit confidence is placed in it by many, who frankly deny that any further test of a boiler's capacity for sustaining steam pressure is necessary. On one occasion we were informed by a Deputy State Inspector—who, by the way, was an executive, and controlled subordinate deputies, that he *had* and could again *pass* boilers without having seen them. So expert had he become, that he cared simply to see the gauge (affixed to the pump in an adjoining apartment,) and to note that it held the maximum pressure for two minutes. This was sufficient. What to him were blistered and burned plates, incrusted surfaces, corroded sheets, slack or broken braces, unskillful workmanship or faulty design? The iron had once more submitted to the demand of its Annual Inquisitor, regretting that he was not likely to be in charge when the exhaustion of its waning strength culminated in disaster.

**Connecticut and Passumpsic Rivers R. R.**

The annual meeting of the stockholders was held at Newport, Vt., on the 6th inst. President Raymond presided. The annual report was presented and accepted, and the following gentlemen chosen directors for the ensuing year: Emmons Raymond, Cambridge, Mass.; T. Redfield, Montpelier, Vt., Gardner C. Brown, Amos Barnes, John E. Lyon, Warren K. Blodgett, Boston, Alden Spear, Newton, Mass., Lucius Robinson, Newport, Vt., Stephen Foster, Stanstead, P. Q., all had 4687 votes.

President Raymond stated that the Committee congratulated the Company on the flourishing condition of affairs. The Directors thought the true policy was to earn themselves out of the floating debt, and it has accomplished the object and the only debt is the funded debt of one and one-half millions. The policy of the directors is not to hoard up money belonging to stockholders, but to pay our debts and have a little surplus. The stockholders can rest assured that after keeping the road in proper condition the rest of the earnings will be divided, be it what it may. Mr. Raymond alluded to the recent improvements upon the road. He thought the road could not be run with any further reductions and he anticipated better times shortly. The report states that we owed $160,000 borrowed money. Since the report was printed $105,000 of the amount has been paid. Adjourned.

**Railroad and Manufacturing Notes.**

The Erie Railway Company contemplate seeking an outlet for freight at Boston by way of the Hoosac Tunnel. For this purpose a third rail is to be laid, of corresponding gauge with the New England railroads, and a connecting railroad is to be constructed from Schenectady to the Massachusetts boundary.

An energetic movement is in progress in Fall River to construct street railways. A subscription paper is in circulation, on which 648 shares are already subscribed, and more stand ready to be added. The shares are put at $25.

The name of the Massillon and Coshocton Railway company, has been changed to Cleveland, Canton, Coshocton and Straitsville Railway company.

The extension of the Kingston and Pembroke Railway has been completed to the Mississippi River. Twenty eight miles remain to be constructed, between the Mississippi and the Madawaska rivers, and tenders have been requested for it. The length of the line when completed will be about sixty miles.

The Worcester (Mass.) Spy says that a new company will soon be organized to build a link to connect the Southbridge branch road with the Boston and Albany railroad, one mile east of the Brookfield station on the original survey, to be called the Providence, Brookfield Junction and Western line.

Trains commenced running on the 3d inst. on the new Rhode Island and Massachusetts Railroad, from Valley Falls, R. I., to Franklin, Mass. The road is leased to the New York and New England Railroad Company.

The Madison County Railroad, running from Edwardsville, Ill., to a point on the Toledo and Wabash Railroad 18 miles from St. Louis, was purchased on the 3d inst. by the Toledo and Wabash Railway Company, and will hereafter be run as a branch of their road.

The location of the northerly portion of the New Richmond Branch of the Cincinnati and Eastern Railway has been changed from the valley of Clough creek via Mt. Washington, Ohio, to the valley of Dry Run, Hamilton county.

The first train was run over the Springfield, Jackson and Pomeroy Narrow Gauge Railroad, from South Charleston to Springfield, on the 31st of August.

The Dayton and Southeastern Railroad is making rapid progress in construction toward Chillicothe.

Track laying on the Waynesville, Port William and Jeffersonville Narrow Gauge Railroad commenced on the 3d inst. at the junction with the Dayton and Southeastern Railroad at Allentown. The work of laying the track will be carried on rapidly, and the road completed soon.

Eastport Me., has voted five per cent. in aid of the Eastport and Aroostook Valley road.

A Philadelphia special says that the Pennsylvania Railroad Company having been for 5 years within 6 miles of the Cumberland Coal region, in Maryland, has decided to extend its track, to compete with the Baltimore and Ohio Railroad.

The Cleveland and St. Louis Narrow Gauge Railroad company has been incorporated, to run from Cleveland, Ohio, to the west line of Van Wert county, capital stock, $200,000 by Lewis L. Parker and others.

Work on the Pittsburgh and Harmony Railroad progresses rapidly, and there is some talk of commencing hostilities on the connection line between Butler and Harmony.

The Railroad Car Trust of Philadelphia announces a dividend of five per cent, payable on demand.

Notice is given, by order of the New Jersey Court of Chancery, of the sale at Jersey city, September 21st, of $167,000 of the first mortgage gold bonds of the New Jersey and New York Railroad Company which has been pledged as collateral for debts due the Rogers Locomotive Works at Paterson.

The Lake Shore and Michigan Southern Railroad has sold to Kuhn, Loeb & Co., its consolidated 1st mortgage bonds to be issued for the retirement of the old Michigan Southern bonds maturing November 1.

The capital stock of the Kinsman Street Railroad company, Cleveland, has been increased from $250,000 to $500,000. A. R. Mitchell is President of the company.

The United States Minister to Mexico, in his communication to the State Department, published elsewhere, says that "American cars and engines are superseding those of English make. The want of railroads is acutely felt throughout Mexico, and the subject of concessions for their construction will be a leading topic at the next session of the Mexican Congress. The capital, however, must come from abroad to a large extent."

Three miles of cars are standing on the tracks at Altoona, all filled with "scrap" from the ruins of round-houses, rolling stock, etc., destroyed by fire in Pittsburg by the rioters.

The railroad rioters convicted in Harrisburg last week were sentenced on the 7th inst. to terms of imprisonment ranging from two to eight months and the payment of fines ranging from $20 to $510.

The Michigan Central Railroad has adjusted its wages table so as to reward with extra pay continuity and length of service.

A Boston dispatch states that the New England engineers belonging to the brotherhood are rapidly deserting it, and appearances indicate that ere long every Eastern member will have dissolved his connection with the organization.

---

**Covington, Columbus and Black Hills R. R.**

An application having been made before Judge Dillon at Davenport, Iowa, for the appointment of a Receiver and an injunction against the Covington, Columbus and Black Hills Railroad Company and others, at the suit of James B. Hubbell, of Minnesota, and upon the cross bill of H. D. Boyd, of Sioux City, the court denied the application for a Receiver, but decided to enjoin the said company from disposing of any of its property, or incumbering the road already built, and requiring the defendants to account for the proceeds of the Ferry and Transfer Company's effects. This order is to protect the property of the said company from spoliation, to prevent the disposal thereof, and to ascertain more fully whether the present managers of the company are operating in good faith to construct the road as represented, or have means to fulfill their contracts. Should they fail in this, the court held that application for a Receiver might again be heard.

---

**BOOKS AND MAGAZINES.**

The Complete Practical Machinist; embracing Lathe Work, Vise Work, Drills and Drilling, Taps and Dies, Hardening and Tempering, The making and Use of Tools, etc., etc. By Joshua Rose. Illustrated by 130 Engravings. Second Edition, revised. Philadelphia: Henry Carey Baird & Co., 810 Walnut Street, 1877. Price $2 50, sent by mail free of postage to any part of the United States.

The reputation of the author of this work as an engineer and a mechanical expert and also as an intelligent writer on mechanical science is so widely known that whatever emanates from his pen is sure to be read with both interest and profit. He converses intelligently with the artisan and mechanic, employing language and terms with which they are familiar, and avoiding mathematical formulæ that are only comprehended by those understanding algebraical terms and expressions. Hence the most prominent features of the present work are its perspicuousness and practical usefulness. It gives simple directions in the manipulation of metals and good reasons why they should be followed; how to shape and grind cutting tools; how to turn, bore, plane and file; how to fit up engine work; how to harden and temper; how to calculate speeds and make estimates, etc. Part of the book treats on the slide valve and valve setting, and this alone renders the work valuable to every engineer and machinist. We are not aware of any publication that gives plainer or more comprehensive and practical instruction on valve movements than this. The numerous illustrations and diagrams are also drawn with great care, attention having been paid to geometrical accuracy and conventional rules in mechanical drawing. We commend the work to all engineers and machinists generally, and especially as a very useful one to students in our mechanics' institutes and schools of technology.

A New Method of Calculating the Cubic Contents of Excavations and Embankments, by the aid of diagrams. Together with directions for estimating the cost of earthwork. By John C. Trautwine, Civil Engineer. Sixth Edition. Completely Revised and Enlarged. Philadelphia: Claxton, Remsen & Haffelfinger, 624, 626 and 628 Market Street. 1875. Price, $2 00.

The method given in this work originated with the writer many years since; and was first published in 1851. The object is to diminish the labor of the usual method of obtaining correctly the cubic contents of excavations and embankments, without affecting the accuracy of the operation. The Tables have been prepared with the greatest care, and can be relied upon.

---

☞ In the United States Circuit Court at Pittsburg, on the 31st ult., George A. Briggs, Henry Lenderberger and David Weand, of Northumberland county, Pa., were found guilty of contempt for interfering with the running of trains on the Central Railroad of New Jersey after the same had passed into the hands of a receiver appointed by the Court. They were sentenced to pay the costs of prosecution, a fine of $100 and undergo ninety days' imprisonment in the county jail of Northumberland county.

**Chicago and Canada Southern Railway.**

At a meeting of the Directors of the Chicago and Canada Southern Railway Company, held in this city on Monday, September 10th, the following gentlemen were elected officers for the ensuing year: Sidney Dillon, of New York, President; Jas. N. Converse, of Boston, Vice President; Benj. F. Ham, of New York, Secretary and Treasurer. The office of this company will hereafter be at No. 23 Nassau St., N. Y. This road was intended as the western extension of the Canada Southern Railway, and has hitherto been under the same management, but the organization just effected is practically independent of that company.

THE COMPLETE PRACTICAL MACHINIST by Joshua Rose. Price, $2 50. Address JOSHUA ROSE, P. O. Box, 5546, New York City.

**Complimentary.**

President George C. Fisk of the Wason Manufacturing Company, completed on the 8th inst. a connection of 25 years with that concern. He entered the office of T. W. Wason September 8, 1852, as clerk at a salary of $1 a day. Making himself indispensable to his employer, he was admitted to the firm of T. W. Wason & Co. in December, 1854. On the formation of the Wason manufacturing company, February 17, 1862, he was elected its treasurer; on the 14th of April, 1869, he was chosen vice president; and on the 6th of February, 1871, he became its president, which office he has since ably filled. There are few instances in Springfield where a young man, starting at the bottom of the ladder, has through his own efforts achieved such a notable and every way honorable career, for Mr. Fisk was long ago ranked among our foremost business men. He is at present one-quarter owner in the Wason car company, holds also a quarter interest in the business of L. I. Fisk & Co., soap manufacturers, and is besides sole proprietor of the Brightwood paper mills at Hinsdale, N. H. We know of no man more thoroughly deserving of the success he has won.—*Springfield Daily Union.*

### Misfit Carpets.

Mr. J. A. Bendall, of No. 112 Fulton Street, New York, is engaged in a business both curious and beneficial. He deals in what are advertised under the name of "Misfit" Carpets. When an importer has an odd piece not large enough for his wholesale customers to buy, it is sent to Bendall's at a reduced price, and offered by him at from twenty-five to thirty per cent. from the ordinary market value of the same class of goods. Many of these pieces are large enough, if required, to furnish a whole house. Sometimes lots of several pieces find their way in the same manner to Bendall's. When carpets are cut and made, and returned to dealers by the express companies, because not paid for, they are forwarded to the same emporium, and these prove great bargains to housekeepers who happen to have rooms which they will fit. Mr. Bendall, in these and other ways, keeps up a large and valuable stock of good carpets, and does a business which is an accommodation to dealers and profitable to himself and to the public. He is to be classed among the most reliable of our city merchants, and presides over his establishment with a courteous grace which has made his own personal popularity as great as that maintained by his store as a business resort.—*Church Union.*

☞ The Lawrence and Southwestern Railroad, extending from Lawrence, Kan., to Carbondale, Osage county, thirty-eight miles, was sold on the 5th inst., pursuant to a decree of the Circuit Court of the United States. It was bid off by Robert E. Carr, of St. Louis, for himself and associates, for the sum of $43,335. The road was built seven years ago, at a cost of about $16,000 per mile. Mr. Carr is president of the Kansas Pacific Railroad Company.

## Steam Office Watchman!!

THIS GAUGE IS USED IN HOTELS, STEAMERS, Manufactories, Breweries, etc.

The Inventors of this combined "Pressure Gauge" and "High-Pressure Alarm" have, after many years of persistent effort and at great expense, succeeded in perfecting a reliable and accurate instrument for measuring either air, steam or water, when subjected to pressure, and for denoting the same by an automatically written tracing upon Edson's Patent Logs or "Charts." No manufacturer or steam user can afford to be without them. Circulars sent on application to

**New York, Saturday, September 22, 1877.**

### Important Decisions in the Cases of the Elevated Railroads.

During the present week the questions referring to the New York, and Gilbert Elevated Railroads, so long pending, and which have so closely engaged the attention of learned council, have been decided in favor of the companies. The full particulars of these decisions have been furnished by the daily press, and need no repetition here.

The decision we have referred to determines the constitutionality of the general law known as "The Husted Bill," thus confirming the rights given to the New York Elevated Railroad to extend the present track to the Harlem River, and also to build northward from the Battery on the east side through Pearl street and Third avenue to the Harlem River, connecting with the Grand Central Depot, the ferries and the Brooklyn Bridge.

A meeting of the directors of the railroad has already been called, to take immediate steps to begin the construction of the east-side line and the extension of the present line on the west side.

### Empire Transportation Co.

At a meeting of the directors of the Pennsylvania Railroad Co., held in Philadelphia on the 17th inst., an arrangement was virtually consummated by which that company becomes the owner of the large equipment and other property of the Empire Transportation Company, connected with the transportation of traffic over the lines of the Pennsylvania Railroad. This matter is of special interest as dispensing with the only remaining outside fast freight organization on the road, and thus removing any ground for even a supposition that the entire revenues from such traffic did not directly benefit the stockholders of the railroad company. We understand that the property is taken at its actual value, and on very favorable terms as to payment, and that the purchase is based upon the fulfillment by the Empire Company of certain conditions imposed by the Board for the better protection of the interests of the railroad company. The Empire line works over the Philadelphia and Erie line via Harrisburg to New York, Philadelphia and Baltimore, and has thus been instrumental in bringing a large traffic not only to the main line but to the Philadelphia and Erie and Northern Central Railways.

☞ The earnings of the Central Pacific Railroad for the month of August, 1877, were $1,885,000, against $1,696,153 in August, 1876, and $1,553,014 in August, 1875. For the eight months ending August 31, 1877, the earnings were $10,615,572, against $11,264,320 for the corresponding period of 1876, and $10,999,422 for the corresponding period of 1875.

☞ Articles of incorporation have been filed in the office of the Secretary of State of California of the Front Street Railroad Company, to operate a street railroad in the city of Santa Cruz. Capital stock, $10,000, divided into 10,000 shares of $1 each. Directors—F. A. Hihn, E. Anthony, Amasa Pray, Frank Cooper and H. E. Makinney. The principal place of business will be in the city of Santa Cruz.

### Practical Talks on Mechanical Reform.

It is vain and idle to deny that in all our manufacturing towns—in fact, wherever steam power is used—there is a tendency to do things on the cheap. But such a subtle and irrepressible agent as steam will not stand this; he must be dealt with carefully and liberally in all his surroundings, or he resents the parsimonious treatment to which he is subjected, and visits alike heavily the sins of omission and commission on all within his reach. It may be a vain and thankless proceeding on our part to raise once more a warning voice, so often have we done it before. But in view of the increasing demand for steam power, and of the fact that while many are reckless, some are only thoughtless, and in the hope, too, that some may seriously consider the importance of the subject and govern themselves accordingly, we have given in our columns instances of carelessness and neglect, poor remuneration for services, incompetency and ignorance, disregard to appliances and devices for safety, and referred to inspection as something that might be extended and improved, seeing that what has been done in this direction, has resulted advantageously to steam users. Before we leave these remarks on the need of mechanical reform, we call attention to the localities, the confined spaces and rooms where steam machinery is too frequently placed. Boilers are hissing under our sidewalks; blasts of hot air come up from cellar ways and basements and in the dark and narrow vaults the engineer and attendants group their way to fire and oil up, and manage the feed water. Contrast this state of things with the ample accommodations we sometimes find made for placing steam engines and boilers. Where there is light and room and ventilation—light so that the steam and water gauges can be seen distinctly; room for firing, taking off cylinder covers, keying up,

and facilities for oiling; ventilation of such character that will induce the engineer or attendant to keep on his spot of duty, and not be a cause of temptation for him to wander away for more air and greater coolness—there is no chance for slighting machinery, and therefore we believe that wherever it is possible, and in most cases it can be made possible, the safest and best way is to give ample room, "room to get all round his engine and boiler" as an engineer generally expresses himself. Do this and in nine cases out of ten it will be found that the machinery will be kept clean and in good condition; on the other hand where there is poor light, "no room to do anything," close, confined quarters and hot, foul air, there will be found dirty and thumping machinery, carelessness and little attention paid to repairs. Give an engineer a chance to be clean if not tasty, he will take a pride in a place where his machinery can be made bright, clean and attractive, none at all if he is cooped up to suffer and sweat from ten to twelve hours per day, amid foul smells and a mass of grease and ashes. This is another thing in mechanical reform which will invariably be found to pay.

### Bedford and Bridgeport Railroad.

It is stated that the "Pennsylvania Railroad Company in Maryland" is about to build a road from the State line of Pennsylvania to the city of Cumberland, the distance of six miles. This is a new project, and has only been decided upon within a few days. The Baltimore and Ohio railroad now runs through Cumberland, and enjoys a monopoly of railroad transportation in that region. By the new arrangement it will lose considerable of its patronage, while the Pennsylvania Railroad Company will secure a great deal, thus benefitting that section of country. The citizens of Cumberland have agitated the matter of having the Bedford division reach their city for some time, so that the coal and iron interests of their section might be materially aided. The Bedford division has agreed to lease the new road when built for the term of fifty years. The citizens of Cumberland will subscribe to one-half the cost, the other half to be covered by bonds to be issued against the proposed road. The total cost will be $150,000. The leasing by the Bedford and Bridgeport extension is virtually a leasing by the Pennsylvania Railroad Company. This extension could not be made without a separate organization, from the fact that the statutes of the State of Maryland prohibit the extension of other roads into the State. The new road will be known as the Extension of the Bedford Division of the Pennsylvania railroad. This Bedford division is the Bedford and Bridgeport railroad, of which John Cessna is president. It runs from Mount Dallas Pa., to the State line, (about thirty eight miles in distance,) and has a branch running from Dunning's creek to Holderbaum, ten miles, making the total length of the line operated forty-eight miles.—*Balt. Sun.*

☞ Mr. Justice Swayne, of the United States Supreme Court, holding chambers at Long Branch, has granted an order, vacating the decree directing the sale of the Chicago and Lake Huron Railroad, which was set down for the 20th of this month. The Trustee is directed to amend the foreclosure bill so that the rights of the bondholders may be fully presented to the court before any further decree is made. The Port Huron and Lake Michigan bondholders are the owners of the bonds secured on the most valuable portion of the road.

### Texas and Pacific Railway.

The earnings of this road for the years ending May 31, 1876 and 1877, were:

| | 1876. | 1877. |
|---|---|---|
| From passengers | $397,426 82 | $524,198 47 |
| " freight | 1,113,043 70 | 1,449,988 48 |

Compared with the previous year, the gross earnings of 1877 show an increase of $478,828 82, with an increase in expenses of $460,563 94, making the increase in net earnings $18,264 38. The gross earnings per mile of road in 1876 were $4,814 23, the working expenses $2,744 25, and the net earnings $2 069 98; in 1877, the earnings per mile of road were $4,926 95, the expenses $3,260 87, and the net earnings $1 666 08—showing an increase in earnings of $112 72, an increase in expenses of $516 62, and a decrease in net earnings of $403 90. The percentage of operating expenses for the year was 66.18; last year it was 57—showing an increase of 8.75 per cent.

The gross earnings of the Transcontinental division for the year were $315,920 66, or $2,375 34 per mile; and on the Jefferson and Southern divisions they were $1,727,482 64, or $6,131 43 per mile—an average of $4,926 95 per mile for the three divisions.

The number of miles of road in operation at the close of the year was as follows:

| | Miles. |
|---|---|
| The main line from Shreveport to Fort Worth | 219.69 |
| Transcontinental Branch, Texarkana to Sherman | 155.12 |
| Jefferson Branch, Marshall to Texarkana Junction | 69.05 |
| Total main track | 443.86 |
| Side tracks | 36.94 |
| Total main track and sidings | 480.80 |
| At the commencement of the fiscal year the company had of main track in operation but | 333 |
| Showing the number of miles constructed during the year to have been | 110.86 |

Of this newly constructed road 26 miles between Eagle Ford and Fort Worth was opened July 19, 1876, and 85 miles between Texarkana Junction and Paris was open August 11, 1876, both sections of road having been completed within the time by the laws of the State of Texas; and they have since been examined by commissioners appointed by the Governor of the State, have been reported upon favorably, and formally accepted by the Executive of the State, thereby entitling the company for every mile of road so constructed, to 20 sections of land, of 640 acres each, subject to location within its reservation at any time previous to the year 1880.

The average number of miles of road operated during the year was 414.75 against an average of 325 miles for the previous year, being an increase of 89.75 miles, or 27.60 per cent. The report says:

The largely increased percentage of working expenses, and consequent decrease of net revenue, was occasioned in part by the hurried manner in which our new road was constructed, in order to comply with the requirements of Texas legislation; and the unusually heavy rains that immediately followed the turning over of these new sections of road to the operating department, which caused very heavy expenditures, under the head of maintenance of way, and greatly increased the motive power and rolling stock repair accounts. They were also increased by the difficulty of getting enough laborers to fill the working force required to complete the new road within the time required by law, which forced the employment of a considerable part of our operating force, during the months of May, June, July and August, on construction work, and prevented the putting in of a large number of new ties, and other track work from being done on the older portions of the road during the dry weather, and such work in wet weather can only be done at a greatly increased cost. This left the track on the old roadway in bad order during the winter months, and in the following spring necessitated very heavy expenditures for repairs and replacements.

Our records show that 228,628 cross ties, 143,400 lbs. spikes, 3,968 fish plates, and 16,052 lbs. track bolts, were put into the track last year, mostly during and since the winter months, a large portion of which should have been put in the previous fiscal year and during the summer months of 1876; and this would have been done, but for the necessity of using our track force on the new construction work. The road, however, is now in very fair condition, and can be maintained and improved from year to year at a reasonable cost by the operating department.

It will be noticed that the gross earnings per mile show a gain over the previous year, but it is all that could reasonably have been expected, as our new road was not completed in season to move the grain crop of northern Texas. The cotton crop on our north line was also injured somewhat by the worm, the number of bales moved on 154 miles of the Transcontinental Division, between Sherman and Texarkana, being but 44,695 bales, against 35,632 bales handled on the 65 miles of road between Sherman and Paris the previous year; the gross receipts per mile on 154 miles of the Transcontinental Division being but $2,375 34, against $6,131 43 on 290 miles on the Jefferson and Southern Divisions, but with the present prospect of good corps, the mileage earnings should be largely increased the current year.

The attention of shareholders is called to the fifth annual report of the company, published last year, page 10, showing the funded and floating indebtedness of your company on June 1, 1875, to have been $22,424,853 57, with 324 miles of road completed and in operation, having an equipment of 28 locomotives and 415 passenger, baggage and freight cars of various kinds.

The balance sheet shows that on June 1, 1877,

just two years later, deducting for bonds unsold, material and supplies on hand, current balances due, and cash in hands of the Treasurer, that the balance of its liabilities, including $5,533,000 Income and land bonds, was but $18,556,587 91, with 444 miles road in operation, having an equipment of 50 locomotives and 1,050 passenger, baggage, and freight cars; being a reduction of $3,868,266 66 in the aggregate of indebtedness, and a gain of 120 miles additional of road, with an additional equipment of 22 locomotives and 635 passenger, baggage, and freight cars, added during the two years.

It will also be noticed that the balance of floating indebtedness June 1, 1877, deducting the credit balances and cash in treasury, was but $703,264 81, against $935,257 67, in June, 1875, and that the company has in hand, applicable to this debt, $394,000 of its first and consolidated mortgage bonds.

It seems proper, also, to state in this connection, that under the adjustment contract referred to in a previous report, out of $9,130,550 41 of indebtedness of the California and Texas Railway Construction Company, there had been satisfied on the 2d of July, 1877, $8,474,911 86, and the officers of that company feel confident of being able to provide for the remainder of its indebtedness during the current year.

This readjustment and liquidation of so large an amount of indebtedness, has been secured by the sale of your company's stock and bonds on terms very favorable to the company, the $3,216,000 of its first mortgage bonds having netted the company $2,859,400, or an average of 87½ per cent. on their face value, and $7,443,000 of its consolidated mortgage bonds have netted the company $5,962,000, or an average of 80.1 per cent. on their par value, these figures being free of all commissions paid. The capital of the company also represents an actual cash investment.

The company have 50 locomotives, 14 first-class and 14 second-class passenger, 1 directors', 3 baggage combination, 11 baggage, mail and express, 494 box, 171 stock, 28 cabooses, 305 flat, 1 wrecking, 1 pile driving and 7 boarding cars.

Mileage of locomotives: passenger trains, 361,612; freight trains, 740,868; work trains, 211,030; switch trains, 113,877; mixed trains, 17,828—total, 1,445,210. Miles run to cord of wood, 30.17; to pint of oil, 12.10. Cost of working locomotives, including repairs, fuel, oil and waste, etc., 0.2283 cent per mile run.

Coupon passengers carried, 52,199; do. carried one mile, 7,419,160. Local passengers carried, 167,904; do. carried one mile, 6,467,339. Total passengers carried, 220,103; do. carried one mile, 13,886,499. Average miles each passenger was carried: coupon, 142.13; local, 38.52—total, 63.09. This shows an increase, compared with the previous year, of 68 023 in the number of passengers carried; 8,776.475 in the number carried one mile; and a decrease of 3.88 miles in the average distance traveled by each passenger.

Local freight in tons, 259,957; number of tons carried one mile, 31,281,229. Through freight in tons, 95,832; number of tons carried one mile, 12,088,652. Total freight in tons, 355,789; total tons carried one mile, 43,369,881. Average haul of local freight, 120.38 miles; do. through freight, 126.14 miles—total, 121.87 miles. This shows an increase in tons of freight carried of 101,501; in tons carried one mile of 15,363,119; and in average distance each ton was hauled of 11.77 miles. The cotton shipments aggregate 230,188 bales, against 108,196 bales in 1876, showing a gain of 41,937 bales.

CONDENSED BALANCE SHEET, May 31, 1877.

| Income account, (surplus) | | 318,985 02 |
| Town lot sales | | 11,475 35 |
| Amount received from assets of the company | | 249,348 00 |
| Accounts payable, current balances | | 541,186 53 |
| Bills payable | | 275,743 04 |
| | | $27,609,004 82 |

(1) Which includes all the expenditures for survey and location of 1,457 miles of line west from Ft. Worth; and for construction work and material on line in California, and between Sherman and Ft. Worth, in addition to constructing and equipping 444 miles of road in operation in Texas and Louisiana.

(2) This expenditure is for account of 4,816,543 acres of Texas lands, most of it within the company's reservation, and which will form a very valuable asset in estimating the value of the company's property outside of its 444 miles of railway.

(3) This expenditure is represented by about 8,000 acres of land in San Diego, donated to the company by the city of San Diego.

(4) This includes bonds placed in trust to secure the return for cancellation of the remainder—189—of old construction bonds held for obligations not matured.

The general office of the company is at No. 275 South Fourth St., Philadelphia. The officers are:

President.—THOMAS A. SCOTT.

Vice Presidents.—FRANK S. BOND, JOHN C. BROWN.

Assistant to the President.—JAMES P. SCOTT.

Directors.—Thomas A. Scott, Pennsylvania; Frank S. Bond, Pennsylvania; John C. Brown, Tennessee; W. W. Keefer, Pennsylvania; H. H. Houston, Pennsylvania; R. D. Barclay, Pennsylvania; Marshall O. Roberts, New York; Henry G. Stebbins, New York; William Thaw, Pennsylvania; W. T. Walters, Maryland; Alfred Gaither, Ohio; W. C. Hall, Kentucky; W. S. McManus, Pennsylvania; T. L. Nesmith, California; W. M. Harrison, Texas.

Treasurer.—GEORGE D. KRUMBHAAR.

Secretary.—CHAS. E. SATTERLEE.

Transfer Agent.—E. B. HART, 50 Exchange Place, New York.

### The Machine and Boiler Works of the Messrs. Snyder Brothers, Makers of the Little Giant Steam Engines.

The thousands who pass and repass No. 94 Fulton Street, in this city, may have observed a neat gilt lettered sign on a new, substantial, brick building, that informed the public of the manufactory of Snyders' Little Giant Steam Engine; but few out of that great throng of pedestrians have any idea of the completeness, compactness and activity that exist inside the walls from the first to the fourth story of that spacious building. We should judge each floor was about 100 by 40 feet. The flooring and walls are of a substantial character; and although there is a steam engine in motion, shafts revolving, and machine tools cutting metals, there is no perceptible vibration. The shafting, tools, benches and general facilities for the construction of small engines and boilers are as excellent and complete as could be wished; the neatness and system might be advantageously copied in some works we know of that are much more extensive in character and range of manufacture than these. The Snyder Brothers have been successful in not only putting into the market engines and boilers of small horse power; but what is still something remarkable have established their works on one of the most frequented thoroughfares in the city. Their little giant steam engines and boilers have exceeded the expectations of a great many purchasers; their popularity is gained by their own intrinsic merits; and the advance in their proportions and details, the improvements that have been added in valves, link motions, guides, governor, feed water heating apparatus, and the general construction of the boilers, will receive special description in our columns. We have written this much from our own observation, and unsolicited by any party. We have done so because we consider the Messrs. Snyder's enterprise is commendable and meritorious, and because their improvements are of a novel and valuable description. Engineers and machinists who visit these works, and examine for themselves the care being bestowed in the construction of the little giants, cannot fail to see that they are worthy of special attention and notice.

### Buffalo and Lake Huron Railway.

The report of this company for the half-year ending June 30, 1877, which was presented at the ordinary half-yearly meeting held in Liverpool on the 5th inst., states that the balance of revenue, including the balance from the previous half-year, after providing for the payment of interest on the bonded debt, is £12,620, which will allow of a dividend of 4s. 6d. per share, free of income tax, carrying to the next half-year £657. Bonds to the amount £752,200 have been presented at the office of the company, and exchanged for the present series, leaving £10,558 yet to come in of the original issues. The report and statement of accounts was adopted, and a dividend declared of 4s. 6d. per share, free of income tax.

☞ The Buffalo and Jamestown Railroad was sold on the 11th inst. by the Referee, George S. Wardwell, for $1,000,000 to J. M. Richmond, W. H. H. Newman, A. Altman, John F. Moulton, and W. S. Bissell, a committee for the bondholders.

### Progress of Railroad Construction.

The grading on the Monday Creek branch of the Columbus and Hocking Valley Railroad will be finished within a month to Ogden Furnace. Enough steel rails have been purchased to relay the track on the Straitsville branch to Nelsonville and Straitsville.

It is stated that the work of grading for the new narrow gauge railway between Philadelphia and Cape May will commence at several points about the 1st of October.

The directors of the Bedford and Bridgport (Penn.) Railroad Company have arranged to extend their road from its present terminus at Bedford and the State Line to Cumberland, Md., a distance of 6 miles. The estimated cost is $150,000, which is to be borne by parties not connected with the road. It is to be completed by 1879.

Mr. Selah Chamberlain, President of the Cleveland, Tuscarawas Valley and Wheeling Railway company, has filed a supplemental certificate, to construct a branch road from the main line at Navarre station, Stark county, to a coal shaft west of said station one and a quarter miles.

The work of extending the Pittsburg and Castle Shannon Railroad is going forward vigorously the grading of the first fourteen miles will be completed by the close of the present month.

The lowest bidder for the construction of the Pittsburg, New Castle and Lake Erie Railroad is Valentine R. Lury, of New York. His bid was $255,990 for the 30 miles from Pittsburg to Harmony, in Butler Co., including everything necessary to complete the roadbed and lay rails, etc.

The Laurentian Railway is completed from Montreal, Canada, north to St. Lin, 20 miles distant.

Considerable progress has been made in the construction of a railway from Wadi Halfa toward Dongola, in Northern Africa. The route, as planned, is to be 355 kilometres in length, of which about one-tenth is completed, from Wadi-Halfa to Sigyaya. The Nile will be bridged near Koyeh.

Street cars were run in Dundee, Scotland, for the first time on the 29th of August.

The Parkersburg and Charleston (West Va.) papers are still agitating the project of building a railroad connecting those two places.

There will be three tunnels on the Pittsburg, New Castle and Lake Erie Railroad of an aggregate length of 1,000 feet, and 15 bridges, 1,200 feet in length. It is estimated that about one thousand men will find employment for eight months from the time that work on the line commences.

The new Union Depot, at Pittsburg, erected to take the place of the one destroyed by the rioters in July, has just been thrown open to the public. It is described as being more convenient and comfortable than the old one.

The entire line of the European and North American Railway from Bangor, Me., to St. John, N. B., is now the same gauge as the Maine Central. The crew on the western extension reached Carleton, N. B., at 1 P. M. Saturday, Sept. 15th, and Superintendent Cram's force reached and completed the work in Bangor at 6.15 P. M., on the same day. The Bangor and Piscataquis narrowing was completed on Friday.

It is expected that the Foxburg, St. Petersburg and Clarion Narrow Gauge Railroad, extending from Foxburg to Clarion, Penn., 18 miles, will be completed by the 1st of October. Mr. James Graham is Superintendent of the road.

### Machinery and Mining.

The coal tonnage of the Philadelphia and Reading Railroad for the week ending September 15th amounted to 198,000 tons. During the same week the Schuylkill Canal carried 24,000 tons, and the Coal and Iron Company mined 97,000 tons.

It is stated that the Erie Railway Company, as soon as it can get its mines in operation, will sell coal direct to dealers, instead of the Delaware and Hudson Canal Company, as heretofore; and in case of refusal by dealers, will sell direct to consumers.

The Colorado mines yielded in 1876 nearly 800,000 tons of coal, worth about $750,000 at the banks.

The Napa (Cal.) Register says that during the month of August 946 flasks of quicksilver were shipped by steamer to San Francisco. It all came from the Redington mine, and as each flask contained 76½ pounds of pure mercury, it foots up over 36 tons.

During the month of August Consolidated Virginia shipped bullion amounting to $1,007,061 74; California, $1,071,779 70.

The August bullion product of the Chollar-Potosi mine is reported as follows: Silver, $17,820 74; gold, $7,756 88—total, $25,077 12.

A new silver mine has been discovered at Newburyport, Mass.

The large steam pumping engine intended for the Frankfort Water Works, Philadelphia, has been completed by Messrs. Cramp & Sons. The engine was built at the contract price of $46,000, and has a pumping capacity of 10,000,000 gallons per day. Pumps, 21 inches in diameter and five feet stroke: double cylinder engine, cylinders 40 and 60 inches in diameter.

The mammoth sugar mill, which has been in process of manufacture for several months at Farrell's foundry at Ansonia, Conn., for a Cuban firm, was finished last month, but no vessel has yet been found large enough to transport it. This mill is the largest in the world, weighing 300 tons, and costing $30,000 in gold. There are also being made two vacuum pans, each capable of holding 10 tons of sugar, and weighing 50 tons. Each pan requires two pneumatic engines, which are to cost $24,000 and $20,000 respectively, and are to be finished the last of this month.

The slipping of the wheels of locomotives is almost nothing when going up a grade, but in descending it is very great, and it increases, whether on an up or a down grade in a certain proportion to the speed. Such, at least, is the result of the observations of M. Rabeuf, of the Academy of Sciences, Paris.

The Boston Water Board have awarded the contract for supplying 48 inch pipe for a portion of the Sudbury river works to John J. Newman & Co., of Providence.

A certificate of incorporation has been filed with the Secretary of State of Ohio of the Bessemer Iron and Steel Company, with principal office located in Columbus. Capital stock $250,000, in shares of $100 each. Incorporators, Samuel Thomas and others.

The strike at the American Iron Works of Jones & Laughlin, Pittsburg, ended on the 18th inst., the men resuming work at the old wages. These works have been idle eight weeks, and by this action of the strikers in withdrawing their demands, from 1,500 to 2,000 men will resume work.

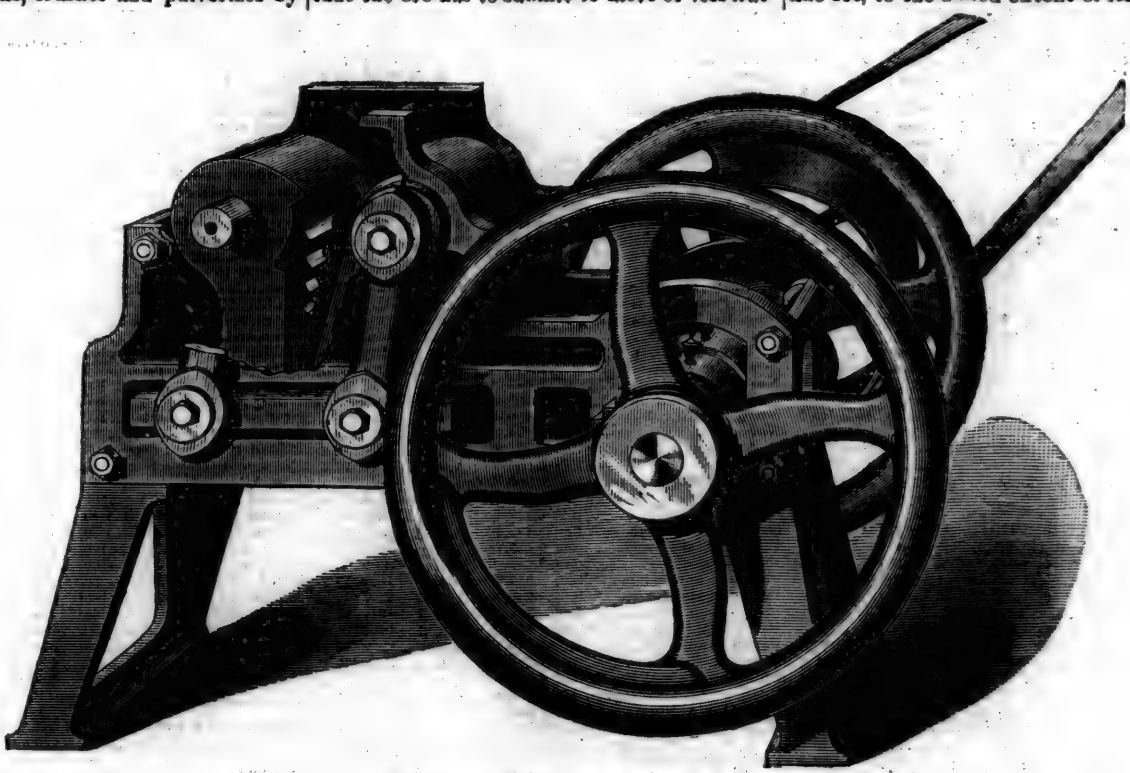
The National Tube Works Co., at McKeesport, Pa., have recently manufactured some tubes 15 inches diameter and thirty-two feet long, intended for a steamboat now being constructed at Louisville.

### Self-Propelling Street Car.

The Pittsburg Chronicle says that a very novel piece of machinery is now being constructed at Solo, which is the embodiment of some new ideas in the problem of self propulsion for street cars, and then adds:

The car, now approaching completion at the above place, is designed to travel over Second Avenue, between Glenwood and the Birmingham Bridge. The car itself is about the size of an ordinary street car, 7 feet wide by 20 feet long including platforms. There is nothing notable in this part of the affair, but the propelling machinery certainly has the merit of novelty. It is a compound engine driven by compressed air, and communicating its power directly by gearing, to the forward wheels of the car. The latter being pivoted so that, by means of a steering device, the whole affair is guided, or turned about. The design is to run directly upon the Nicolson or asphalt pavement, after the manner of the Aveling and Porter road engine. The compressed air is not taken from reservoirs at either end of the route traversed by the car, as in the case of the New Orleans self-propelling cars, but is stored up by the engine itself while running. This is accomplished by a hot air engine acting alongside the driving engine, and pumping the air to a pressure of about 130 pounds per square inch. This engine comes from the Exeter machine works, Exeter, N. H., and is 8 horse power. It is very compact and will be placed beneath the floor of the car out of sight, not taking up more room than a couple of trunks. This engine, after some alterations have been made, will be placed in the car, and in a week, or thereabouts, this novel car is expected to make trips between the points named.

### The Alden Ore Crusher.



A few years ago a number of engineers and railroad master mechanics visited Europe for the purpose of examining English, French and Belgian railroads, of learning the systems generally adopted by the different companies and of informing themselves of any good features that might be advantageously introduced on American railroads. We shall not soon forget the answer made by one of these gentlemen on his return to an inquiry respecting his opinions of the English railways. Said he, "There is nothing above the top of the rail worth our copying," by which was meant that the roads and rails were in admirable condition and superior to our own. Almost every writer of travels (whether the author of a dignified volume or the mere correspondent of some country newspaper), has expressed the utmost surprise that we did not have such roads in America. But within a few years the improvements that have taken place in the manufacture of steel rails, in ballasting, in drainage, and general superstructure have been very marked and we can point to some roads here which are triumphs of engineering skill. Since stones can be crushed by powerful but simple machinery, increased facilities are afforded for obtaining larger quantities of ballast, and of better quality than formerly. The machine represented here is suitable for this purpose as well as for crushing and pulverizing ore. It is known

as the Alden Ore Crusher and Pulverizer, and is new in principle, simple in construction, economical in use of power and of remarkable efficiency. It was patented by Farrelly Alden, March 17, 1874, and is constructed by Messrs. Copeland, Dodge & Co., 206 Broadway, New York.

In the process of reducing ore, it fulfills the functions of the preparatory breaker, and at the same time does the work of, and therefore displaces and dispenses with very nearly, if not all, the intermediate machinery ordinarily employed and considered essential between the preparatory and the final treatment.

It is, in the most complete sense, a new invention. It works upon material in an entirely new, novel and ingenious manner on the principle of abrasion, instead of on the generally adopted principle of direct compression or impact. It breaks, crushes and pulverizes by rasping and rubbing fragment upon fragment between the dies, and upon the horizontally corrugated steel faces thereof; the motion of the rubbing surfaces is obained by the oscillation of the dies. They both swing at the same time, in one and the same direction and to an equal extent. At their delivering extremities they are held together (closely or otherwise, according to the character of production wanted) in such a manner that the distance apart, from face to face, is the same at all points of the stroke. We call especial attention to this peculiar principle in the Alden patent—this oscillation of the dies and the consequent continuous action of all the surfaces of both the dies, and of the fragments and particles of material upon one another. It will be seen that there is a constant change in the angles of contact of the die faces with the material, and that the ore has to submit to more or less fracture with every iota of their movement. It will not, therefore, be difficult to understand how it happens that the yield of this crusher is both rapid and fine.

In all crushers hitherto invented, the utmost service which they have been capable of rendering, has been limited to the preparation of ore for reduction through rolls or under stamps. It has been customary to regard the doing of anything further by a crusher as impracticable, and so indeed it is, if the reciprocating movement of a jaw, or of two jaws even, is looked to for the accomplishment. While such motion is positive and may be definitely limited, it must be very slight; it can be effective in one direction only, as it intermits its working strokes; it can jam and bite a substance, but can produce no grinding effect; it must of necessity give exit to fragments coarser than its fine set, to the added extent of its stroke.

ALDEN ORE CRUSHER AND PULVERIZER.

The Alden Ore Crusher and Pulverizer does not begin its work where the other crushers leave off, but it begins where they begin; and carries its execution beyond them to an unapproachable extent. It will not be denied, that by it, an immense forward step has been taken and that all mining interests are to be affected by it. Simplifying as it does the business of pulverization of ores, it saves to those starting new mining enterprises great outlay for other machinery; lessens the amount of power necessary to be provided and thereby economises in fuel and water; reduces the number of employees necessary and brings what would be the wear and tear of a number of machines to a minimum cost by concentrating it upon one machine so built as to resist most successfully the encroachments of wear.

To mines already established, it is equally valuable as it will either effect an important reduction in running expenses, or with the same expenditure, work an increased tonnage of ore.

The annexed engraving is an accurate perspective drawing of an Alden crusher—(No. 7.) A section of one side is shown as broken out, n order to display the form of the dies and die faces, to explain the method of their suspension, and to give an idea of their travel and action. It will be seen that the dies are hung upon shafts, the ends of which project through the sides of the frame and take connecting rods which at their other extremities receive the studs that jut out from the sides of a rectangular yoke. This yoke, one side of which only is shown, surrounds the free hanging ends of the dies and moves on a nearly horizontal plane, alternately pushing and pulling the dies within it, the full distance of the stroke and imparting the rubbing effect, which is the basis of the extraordinary merit of the machine. The regulation of the set of the dies to different grades of production is effected by means of adjustable steel keys. A variety of these are furnished with each machine. Every crusher, whatever its size, has a range of from the very finest product required, to a degree of coarseness closely approaching the size of the feed. The connection between the yoke and crank is direct by way of a pitman. The crank shaft, fly wheels and pulley are common agents in the attainment of motion and do not require special mention.

Fully appreciating the fact that the die faces of the Alden Crusher are subjected to severe duty, very particular attention is paid to their manufacture, and they are warranted not to wear away excessively in proportion to the amount of work they do.

The good features of this machine may be summed up as follows: it takes ore from the dump and breaks, crushes, and pulverizes it at one operation to any desired degree of fineness, ready for smelting, concentrating, or amalgamating. It has no lost motion; and therefore utilizes all applied power, and does its work with great dispatch. Upon receiving material it is immediately and continuously effective in reducing it. It is adjustable. Can be instantly regulated to yield any size of product required; that is to say, coarse broken, egg, nut, pea, powder, or dust. It is durable. Ample material, of best quality, is employed in the most effective manner to insure strength and endurance. Provision is made for "taking up," without machine labor, all wear that can occur. It is portable. The heaviest piece of the largest machine (receiver 14 ins. × 7 ins.) weighs 2400 pounds. The heaviest piece of the smallest machine (receiver 10 ins. × 3 ins.) weighs 587 pounds.

# American Railroad Journal.

**Saturday, September 22, 1877.**

### Financial and Commercial Affairs.

No change has been reported in the Money line during the week adverse to the borrowing interest. The supply of Money available at this point has been liberal, in excess of the requirements of the market, serving to keep down loan and discount rates to low figures for the season. The several financial and commercial embarrassments and suspensions reported within the week made little impression on the general market. The inquiry from mercantile sources has been on a comparatively moderate scale, and easily met, without disturbing quotations. The demand on speculative account has been less urgent. Further shipments have been reported of currency to the interior, to facilitate crop movements. Call loans were quoted here at the close at 2½@6, with most of the important negotiations reported on the basis of 3@4 per cent; and very choice to prime mercantile credits are rated at 5½@7 per cent per annum for the best names. The City bank exhibit of last week indicated a decrease in the loan and discount average of $125,800, and an increase in the item of circulation of $8,700. The average of deposits was reduced $1,991,700. The legal tender reserve fell off $1,258,000; and the specie average $48,600. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $11,818,800, as against $12,621,975 the preceding week. The City bank exchanges in currency reached $379,235,693, or a daily average of $63,205,949.

On Wednesday of this week the cash balances of

the Treasury Department at Washington were: of Currency, $18,625,744; special deposit of legal tenders for the redemption of certificates of deposit, $52,930,000; Coin, $108,528,339, including of Coin certificates, $40,035,300.

The outstanding amount of legal tender notes is $357,976,164. The National bank circulation is now $315,888,576 of currency notes and $1,432,120 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $4,040,000.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $45,380,815, against $47,347,298 the preceding Wednesday; and a coin board of $90,731,886, against $89,014,561 on the return of a week earlier. The Customs revenue of the port during the past week was $2,367,891.

Government securities have been less freely purchased, the decline in gold and the consequent depression in values tending to check operations, especially on investment account. Toward the close more inquiry was noted for the leading issues, partly from the savings banks and trust fund sources. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 121¼@122; do. 6s, 1881, registered, 109⅛@109¾; do. coupon, 110¼@110¾; do. 1865, new, registered, 105¼@105⅛; do. coupon, 105¼@105⅝; do. 1867, registered, 107¼@107⅛; do. coupon, 107⅜@107⅝; do. 1868, registered, 109⅛@110; do. coupon, 109¾@120; do. ten-forties registered, 107⅛@107⅜; do. coupon, 108¼@108¾; do. five per cents, 1881, registered, 107¼@107⅜; do. coupon, 107¼@107⅜; do. 4½ per cents, 1891, registered, 105⅛@105⅝; do. coupon, 105⅜@105⅝; do. 4 per cents, 1907, reg., 101⅝@101¾; Central Pacific Gold Bonds, 105@106.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $337,514,650, and $15,224,000 as security for public deposits.

State bonds have met with a moderate sale on investment account, and as a rule have been without important changes as to market values. A fairly active inquiry has been noted for the better class of Railway Mortgages which have been generally quoted quite firm in price, on a very moderate offering of the more desirable loans. And in the line of Railway and Miscellaneous share property the week's business has shown more animation, with a very general recovery in prices from the depression and irregularity which characterized the earlier dealings, influenced by the more encouraging reports in the commercial line as to the gratifying progress of the Fall trade, and the resulting gain to the great carrying interests. The general market left off rather buoyantly.

Gold has further receded in price, having fallen during the week below 103, on freer offerings and a very moderate inquiry from nearly all sources; closing rather more steady. The extremes of the price during the week have been 102⅞@103⅜, closing at 103⅛, as against 103⅜ on Wednesday of the preceding week. The specie outflow last week was only $118,659, making the total exports of specie hence since January 1, $22,331,446, against $40,268,445 the same time in the preceding year. The imports of specie at this port last week were $809,951, since January 1st have been $10,708,133, as against $3,793,745 same time last year. The Customs demand for gold last week averaged $3,911,649 per day. Foreign Exchange has been moderately sought after, at rather easier rates, closing tamely. Bankers' sixty day bills on London closed on Wednesday at $4 82½@$4 83⅛; sight bills on London at $4 86⅛@$4 87 to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,337,687 as against $5,001,875 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,080,991 of Dry Goods, and $4,256,696 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the liberal aggregate of $6,551,589, against $5,422,471 same week in 1876.

The income of the Government from internal revenues last week was about 2½ millions, and and from Customs last week about three millions.

Business in most kinds of domestic produce has been on a more liberal scale during the week, especially in Breadstuffs, Provisions and Cotton, prices of which have been generally firmer. The export dealings in wheat have been extensive; and with the speculative movement, served to strengthen values. Foreign merchandise has been in fairly active demand at generally steady rates.

An active call was noted early in the week for a few specialties in the Metal line, but the general market was tame. Eglinton Pig Iron quoted at $21@$24 50; Glengarnock $25 50@$26; Coltness $26@$27; No. 1 American Pig at $18@$18 50; (with sales of 1,800 tons within the range) No. 2 do. at $17@$17 50; (1,000 tons sold.) Forge $16@$17; American Rails at works $35@$38; (with 1,200 tons reported sold,) Old Rails $18@$19. Wrought Scrap $22@$24. Steel Rails, on the basis of $47@$49 at the mills. (4,000 tons sold on p. t.) Ingot Copper much brisker on the basis of 17½ for large lots, and, at the close, at 18@18½ for smaller amounts, for early delivery.

Hardware, Boots and Shoes and Dry Goods have been freely dealt in and generally quoted firm for seasonable classes of stock, the offerings of which have been on a reduced scale.

The Ocean freight movement has been fairly active, though checked in part by the lighter offerings of accommodation for early use. Liverpool steamer rates at the close for Grain, quoted at 10d. @10½d, Provisions, 45s.@60s.; Tallow, 40s.; Leather, 55s. Measurement Goods at 20s.@25s. per ton; Cotton, ½d. per lb., Tobacco 40s. Liverpool, by sail. Cotton, ½d.; Grain, 9½d. Oil Cake and Slate, 20s.; Measurement Goods 20s.; Tobacco 30s.@35s.; Grain rates on charter hence for Cork and orders left off at 7s.@7s. 3d.; for the Continent at 7s.@7s. 3d.; and from Baltimore for Cork and orders, 7s.@7s. 3d., and from Philadelphia at 7s.@7s. 3d. per quarter. Refined Petroleum hence for Cork and orders, 5s.@5s. 3d.; for the Continent, 4s. 6d.@5s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

### Atlantic, Mississippi and Ohio Railroad.

The receivers of the Atlantic, Mississippi and Ohio Railroad Company have rendered a report of the operations of the road up to 30th June, 1877. The receipts from 13th June, 1876, (the date of their taking charge,) to 30th June, 1877, amounted to $2,009,123 59, of which $1,129,675 02 was for transportation of freight and passengers, $55,844 64 for express and $56,626 90 for mail service; $486,724 97 was for traffic balances, and $153,438 34, representing receivers' collateral notes. The disbursements in the same period amounted to $1,958,172 27—leaving a balance of $50,951 32. Included in the disbursement is $342,982 12 interest on the divisional bonds due 1st July, 1876, and 1st January, 1877; and the report states that the interest due 1st July, 1877, amounting to $176,299 36, can be paid after 15th October next if the court should so direct. The floating debt has been reduced $51,320 37, leaving outstanding $158,800. A portion of this reduction is due to the sale of $15,000 bonds, and the funded debt is increased by that amount. The labor pay rolls for May, 1876, and 12 days in June, 1876, amounting to $57,144 23, and $33,013 93 on account of pay rolls for July, August and September, 1875, have been paid, leaving still unpaid $111,218 87. Efforts have been made to maintain the road in good condition. New steel rails have been laid on 62 miles and 600 tons additional have been purchased. The bridges have been kept in good repair and many necessary and important improvements have been made.

The earnings from passenger traffic during the year ending 30th June, 1877, show an increase of only $5,532 52 as compared with the previous twelve months. For through traffic there was an increase of $25,389 36, but there was a decrease of $8,500 55 in local, $5,120 54 in mail, and $6,285 66 in express and miscellaneous. The through freight shows an increase of 9,585 tons, but a decrease in revenue of $8,864 26, owing to the great reduction of rates during the freight war. The local freight tariff has been revised and the average rate per ton per mile reduced, but the traffic shows an increase of 9,680 tons, and for revenue an increase of $54,610 12 as compared with the corresponding twelve months of 1875 and 1876.

A statement of the earnings of the road for the year ending 30th June last, shows $491,520 58 from passenger trains, $1,296,298 82 from tonnage trains and $14,462 58 from miscellaneous sources—total, $1,802,281 48. The expenses in the same time were $524,919 72 for road department, $176,551 62 for machinery, $500,509 08 for transportation and $128,461 40 for treasury department—total, $1,331,442 82, leaving a balance of $470,839 16.

### Western Union Telegraph Co.

In the report presented by the Executive Committee at the last quarterly meeting of the Board, held June 13th, 1877, the net profits for the quarter ending June 30th (May business being partially and June wholly estimated) were stated at $650,317 52.

The official returns for the quarter (ending June 30th) showed the profits to be $666,581 46, or $16,263 94 more than the estimate.

The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended June 30th, 1877:

| | | |
|---|---|---|
| Surplus, April 1st, 1877, as per last quarterly report | | $128,577 10 |
| Net profits, quarter ended June 30th, 1877 | | 666,581 46 |
| Amount charged into the current expenses of the year ended June 30, 1877, for material and supplies, which were on hand and paid for, but which were not included in the surplus | | 45,037 13 |
| | | $840,195 69 |
| From which deducting: | | |
| Dividend of 1¾ per cent, paid July 14th, 1877 | $507,174 00 | |
| One quarter's interest on bonded debt | 111,208 55 | |
| One quarter's proportion of sinking funds | 20,000 00 | |
| Construction account for quarter | 121,053 54 | |
| Sundry telegraph stocks, lines, etc. | 5,678 82 | |
| | | 765,109 91 |
| There remained a surplus July 1st, 1877, of | | $75,085 78 |
| The net profits for the current quarter ending September 30th instant, based upon official returns for July, nearly complete returns for August, and estimating the business for September, will be about | | $792,100 92 |
| Add surplus July 1st, as above | | 75,085 78 |
| | | $867,186 70 |
| From which appropriating: | | |
| One quarter's interest on bonded debt | $112,000 00 | |
| One quarter's proportion of sinking fund | 20,000 00 | |
| | | 132,000 00 |
| Leaves a balance of | | $735,186 70 |
| A dividend of 1¾ per cent on the capital stock outstanding requires | | 525,925 50 |
| Deducting which leaves a surplus of | | $209,261 20 |

In view of the preceding statements the committee recommend the adoption by the board of the following:

Resolved, That a dividend of one and one half per cent from the net earnings of the three months ending September 30th, be, and is hereby declared payable on the 15th day of October next to stockholders of record at the close of business on the 20th day of September, instant.

Resolved, That for the purpose of the annual meeting of stockholders, to be held on Wednesday, the 10th of October next, and of the dividend herein before declared, the stock books of the company be closed at three o'clock on the afternoon of the 20th of September, instant, and be reopened on the morning of the 16th of October next.

Respectfully submitted,

WILLIAM ORTON, President.

New York, Sept. 12, 1877.

### Laclede and Fort Scott Railroad.

MUNICIPAL BONDS BEING REGULAR ON THEIR FACE, THE COUNTY IS ESTOPPED TO DENY COMPLIANCE WITH LAW.

The following decision has been rendered by the United States Supreme Court:

No. 182. The county of Dallas, in the State of Missouri, plaintiff in error, vs. John W. MacKenzie. —In error to the Circuit Court of the United States for the Western district of Missouri.—This case comes before the Court upon a demurrer to the answer. In his complaint the plaintiff alleged that the defendant issued certain bonds, by which it promised to pay to the Laclede and Fort Scott Railroad Company the sums named pursuant to an order of the County Court; that the bonds recited that they were issued pursuant to an order of the County Court of Dallas county, made on the 18th of May, 1871, and amended on the 19th of June and the 12th day of August of the same year by authority granted in the charter of said company by an act approved January 11, 1860; that he is the owner for value and the bearer of certain coupons attached to said bonds and entitled to recover the amount thereof, by reason of which he avers an indebtedness to him in the sum of $3,800, with interest from the various dates mentioned.

To this the defendant answers denying that it promised to pay the bonds as in the complaint is alleged; denying that by its writings or coupons it promised to pay the different sums therein specifically set forth, and denying that the plaintiff was the owner for value of the coupons sued for. The answer, for a further defence, avers that the bonds referred to recite that they were issued pursuant to certain orders of the County Court of Dallas county (which are of the dates specified in the complaint), and avers that no orders authorizing the issue of such bonds were ever made by the said County Court as so recited, but that two of the justices of said court fraudulently and corruptly, but not as a court, made a certain other order set forth, but upon conditions which were not complied with. It is further averred that said bonds were fraudulently and corruptly issued, and without authority, and that at the date of said issue the annual assessment of the county of Dallas was less than $1,500,000, and the county had already subscribed to the capital of said railroad the sum of $150,000.

To this answer the plaintiff demurred upon the following grounds:

1. That it did not state facts sufficient to constitute a defence.

2. That its admissions were sufficient to entitle the plaintiff to recover.

3. That its details were inconsistent with its admissions.

4. That it was not necessary to file the bonds, the coupons being filed in the court.

5. That plaintiff being the bearer of the coupons is sufficient and ownership being immaterial.

6. That the authority of the Court to issue the bonds under the special law incorporating the Laclede and Fort Scott Railroad Company is not denied.

7. That it admits their issue and does not deny the authority to issue them recited in them.

8. The bonds on their face import a compliance with the law, and defendant is stopped from denying the regularity of such compliance.

9. It does not charge plaintiff with knowledge of any of the alleged frauds in the issue of the bonds. The demurrer in general to the whole answer. The answer is interposed under a system of pleading which allows numerous and inconsistent defences. If, therefore, the answer contains any good defence, the demurrer must be overruled.

The complaint gives no copy of the bonds. It simply says that they were issued to a railroad company, named, and that they recited that they were issued pursuant to an order of the County Court of Dallas county, made on the 18th day of May, 1871, and amended on the 19th day of June and on the 12th of August of the same year, and that this was by authority granted in the charter of the railroad mentioned. In this statement are involved two fundamental propositions; first, that the charter of the company gave authority to the County Court to subscribe; and second, that the county exercised that authority. Both of these averments are jurisdictional, and if either does not exist no bonds can legally issue. The first is a question of law to be ascertained by reference to the statute; the second is a matter of fact to be determined upon the pleadings or the proofs.

"It shall be lawful for the county court of any county in the State to subscribe to the capital stock of said company." (Acts of Mo., 1859-1860, p. 434, sec. 14.) This is not a self-executing power. It is an authority to the county, and until affirmatively acted upon possesses no more force than if it did not exist. The defendant, in his answer, denies that this authority was exercised by the county at the dates mentioned or at any time. We think the plaintiff erred in demurring to the answer and thus admitting that the county court had never exercised its power (Smith vs. Sac Co., 12 Wall., 148).

The demurrer is overruled on all the other points also and judgment given for the defendant.

Mr. Justice Swayne delivered the opinion.

### Commerce of New York.

The foreign imports at New York for the month of August, 1877, are officially stated as follows:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n. | $12,835,681 | $13,311,638 |
| Do. for warehousing.... | 6,515,056 | 7,194,744 |
| Free goods..... | 4,109,489 | 6,117,404 |
| Specie and bullion..... | 936,490 | 1,096,373 |
| Total entered at port... | $23,896,716 | $27,720,159 |
| Withdrawn fr. wareh'use | 8,860,063 | 9,062,968 |

The foreign imports at New York for eight months from January 1, were:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n | $87,484,756 | $96,126,119 |
| Do. for warehousing... | 59,199,865 | 66,848,653 |
| Free goods..... | 52,025,625 | 61,702,976 |
| Specie and bullion..... | 3,606,735 | 8,779,634 |
| Total entered at port.. | $202,266,981 | $282,957,682 |
| Withdrawn fr. wareh'se | 55,825,002 | 51,296,689 |

The duties received at New York for eight months ending with August, were:

| | 1876. | 1877. |
|---|---|---|
| January..... | $8,160,728 44 | $8,058,988 72 |
| February..... | 9,473,003 56 | 8,224,434 61 |
| March..... | 10,237,275 86 | 8,695,637 63 |
| April..... | 7,764,457 04 | 7,569,482 75 |
| May..... | 7,575,997 28 | 7,054,082 33 |
| June..... | 6,619,735 25 | 6,102,426 72 |
| July..... | 7,497,199 39 | 7,132,747 46 |
| August..... | 10,125,386 42 | 10,018,122 33 |
| Total..... | $67,453,782 74 | $62,855,872 55 |

The exports from New York to foreign ports in the month of August, were:

| | 1876. | 1877. |
|---|---|---|
| Domestic produce..... | $23,972,298 | $22,051,488 |
| Foreign free goods..... | 301,171 | 110,022 |
| Do. dutiable..... | 321,092 | 471,839 |
| Specie and bullion..... | 1,871,127 | 979,703 |
| Total exports..... | $26,465,688 | $23,431,052 |
| Do. exclusive of specie. | 24,594,561 | 22,638,349 |

The exports from New York to foreign ports for eight months from January 1, were:

| | 1876. | 1877. |
|---|---|---|
| Domestic produce..... | $167,096,684 | $174,944,011 |
| Foreign free goods.... | 2,277,804 | 1,558,948 |
| Do. dutiable..... | 4,451,903 | 2,975,521 |
| Specie and bullion.... | 38,701,247 | 28,937,849 |
| Total exports..... | $212,527,698 | $208,416,329 |
| Do. exclusive of specie. | 173,826,451 | 179,478,480 |

### Railroad and Manufacturing Notes.

The managers of the Boston, Revere Beach and Lynn Railroad have under consideration the matter of introducing the Eames vacuum brake upon all the cars and engines of the road. The apparatus has been applied upon three cars and one engine, and a trial trip was made which resulted very successfully. This new improvement is but one of the many which the managers of the Revere Beach Corporation intend to introduce upon the road.

The Jackson & Sharp Company, of Wilmington, Del., have just completed for the royal family of Norway a narrow gauge palace car. It is similar in many respects to the car built last year by the same firm for the Emperor of Brazil. It is to run on the narrow gauge railway between the town of Hamar and Throndhjin.

The Los Angeles (Cal.) express says that about ten men are now at work at the Santa Monica car shop, putting together the rolling stock that was shipped there in detached parts nearly two years ago. There are forty-three cars, mostly flat.

The new ferry boat Columbia recently constructed by the Harlan & Hollingsworth Co., of Wilmington, Del., for the West Jersey Ferry Co., is said to be the finest ferry boat on the river.

### Trade and Commerce.

In the first seven months of this year the Pacific Railroad shipped eastward 61,000,000 pounds of merchandise. The list includes in its leading articles, coffee, tea, dried and ripe fruits, vegetables, hides and pelts, quicksilver, salmon, skins and furs, wine, wool, silk and leather. The quantity of wool sent since the commencement of this year exceeds 26,000,000 pounds. This has gone principally to New York and Boston. Most of the coffee has been sent to Chicago and St. Louis. A considerable quantity of the tea forwarded has gone to Boston, but the larger portion has been sent to New York. There has been an immense falling off in the Eastern demand for California barley the present year, but the shipments of other articles show a large increase. By the above facts we learn why shipping is depressed. If this merchandise had come around Cape Horn it would required all the spare shipping of the country.

The recent efforts made to increase our exportation of home manufactures to foreign ports have resulted so successfully that during July and August $518,985 worth of these manufactures were exported from Philadelphia, embracing a wide range of articles, consisting of: passenger cars to Brazil and Cuba; coal to the West Indies and South America; hardware to Liverpool and the West Indies; car wheels to Brazil and Antwerp; nine locomotives to Brazil; machinery to Brazil, Liverpool, Antwerp and elsewhere; nails to Rio, Peru and the West Indies; iron pipes to Cuba; butter, lard and leather to Liverpool and Antwerp; paper to the West Indies; petroleum, soaps and a large amount of other articles. This trade promises to continue, and in many branches to increase.

Among the principal articles exported from Philadelphia during the week ending September 15th were 627,485 gallons of petroleum, 176,781 bushels of wheat, 112,000 pounds of butter, 6630 pounds of cheese, 1,445,440 pounds of bacon, 855,896 pounds of tobacco, and locomotives valued at

$39,250. The total value of the exports was $982,-093.

The Pennsylvania Railroad Company have decided that the freight discrimination against Pittsburg—of which that city has so long complained—shall be discontinued, and the rates, instead of being higher than for points beyond, shall be 30 to 40 per cent. lower.

The Cincinnati Price Current says that there are already considerable arrivals at that city of cattle, sheep and hogs over the Southern Railway, partly from sections which have heretofore moved to other markets.

Through passenger travel on the various railroad lines is at present largely in excess of the corresponding period in previous years. In this traffic the west bound receipts exceed those of east bound.

The Baltimore and Ohio Railroad Company are testing the expediency of transporting miscellaneous freight on "gondola" or platform cars, with the simple addition of a water proof cover. Some time since this company successfully utilized coal hoppers in this manner for carrying grain.

The tonnage on the canals in New York State for August showed a gain over August, 1876, of 146,000 tons, while the gain for the season has been 312,000 tons.

### Queries and Replies.

Inquiries to be answered must be appropriate to the columns of the JOURNAL.

J. A.—About your inquiry respecting the preservation of timber, we have known the following to answer remarkably well. Take boiled linseed oil, and stir in pulverized charcoal to the consistency of paint. Put a coat of this over the timber, and it will preserve it for a very long time, if well seasoned before the application.

READER.—What is the difference between a tubular and a tubulous boiler? Ans. In the tubular boiler there are tubes and a shell; the former convey the flame and heated gases from the fire. In the tubulous boiler there is no shell, and the tubes are filled with water and steam. In the tubular boiler there is a pressure on the inside of the shell and on the exterior of the tubes; in the tubulous boiler, the pressure is internal only. The Babcock and Wilcox boilers are of the latter kind.

MILLWRIGHT.—Does punching steel plates weaken them more than iron ones? Ans. Both from experiment and experience it has been found that steel plates of average suitable quality are more injured than wrought iron plates by punching.

L. P.—What is the strength of rolled iron boiler-plate. Ans. It varies. About 50,000 pounds per square inch, if the strain is applied in the direction of the "grain" or the fibres of the iron, (or in the direction in which it has been rolled), and about ten per cent. less if the strain is applied crosswise of the grain.

RAILROAD ENGINEER.—What is the power required to draw out a railroad spike (such as is used for confining rails to cross-ties) ⅜ inch square driven 3⅜ inches into seasoned Jersey yellow pine, or unseasoned chestnut? Ans. About 2000 lbs. force: from seasoned white oak, about 4000; and from well seasoned locust, about 6000 lbs.

MASTER MACHINIST.—Is the fish-joint an English or an American invention? Ans. It is claimed at present to be an English invention of 1846. It was in use on the N. C. and F. railroad three years prior to that date.

D. H.—What is the height of platforms of passenger cars and the height of the locomotive smoke pipe. Ans. 1, height of platform 3½ to 3¾ feet above the rail. 2, height of pipe usually 13 feet to 15 feet above the rails.

### Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of August, were:

ENTERED FOR CONSUMPTION.

### Canada Southern Railway.

The New York Central and Hudson River Railroad Company has come under an obligation to guarantee four per cent. interest on the Canada Southern bonds. Arrangements have also been made to complete the connections of the road to Chicago as early as possible. Four per cent. is not a high rate to pay, but it is a good rate to guarantee. The name of the endorser is good. The endorsation is of course not a favor to the Southern; but the connection with the Central, in the East and with Chicago in the West, ensures business which, with anything like fair rates, must make the road pay. The road is eminently international, and the new arrangements must ensure it a large volume of business.—*Monetary Times.*

☞ The case of the State of Maryland against the Baltimore and Ohio Railroad Company in the Superior Court, for the tax of one half of 1 per cent. on the gross receipts of the company, was decided on the 18th inst. by Judge Dobbin in favor of the company. The State will carry the case to the Court of Appeals.

## The Alden Crusher.

**New in Principle, Simple in Construction, Economical in Use of Power, and of Remarkable Efficiency.**

**FOR BREAKING STONE FOR**
**BALLASTING RAILROADS,**
**McAdamizing Streets,**
AND FOR
CRUSHING AND PULVERIZING
ORES OF ALL KINDS,
**NO LOST MOTION, ADJUSTABLE, DURABLE, PORTABLE.**

SEND FOR ILLUSTRATED CIRCULAR.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23e

### The Coal Trade.

For the week ending the 8th instant, the total tonnage, as reported by the several carrying companies, amounted to 341,354 tons, against 427,055 tons in corresponding week last year, a decrease of 85,701 tons. The total amount of anthracite mined for the coal year is 13,254,923 tons, against 11,105,413 for same period last year, an increase of 2,149,510 tons. The quantity of bituminous coal sent to market for the week amounted to 47,119 tons, against 79,180 tons in corresponding week last year, a decrease of 32,061 tons. The total amount of anthracite mined for the year is 2,140,071 tons, against 2,334,935 tons for corresponding period last year, a decrease of 194,864 tons. The total tonnage of all kinds of coal for the week is 388,473 tons, against 506,235 tons in corresponding week last year, an increase of 117,762 tons. The total tonnage of all kinds of coal for the coal year is 15,394,994 tons, against 13,440,348 to same date last year, an increase of 1,954,646 tons. The receipts at Perth Amboy for the week ending on the 8th instant were 26,161 tons, the shipments 25,109 tons, leaving a stock on hand of 58,819 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last three days of August was 54,605 tons, of which 46,455 tons were coal, and 8,150 tons coke. The total carried for the year is 3,051,512 tons, of which 2,434,472 tons were coal and 565,165 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Sept.* 17.

☞ The directors of the Chicago, Danville and Vincennes Railroad Company have adopted the name of the "Chicago and Eastern Illinois Railroad Company" for the consolidated Illinois and Indiana Divisions, 157 miles in length, and articles of incorporation under that name were filed on the 30th ult. The officers of the new company are: F. W. Huidekoper, President; T. W. Shannon, New York, Vice President; A. S. Dunham, Secretary—he was also appointed Auditor; J. C. Calhoun, Treasurer; Edmund L. DuBarry, General Superintendent; C. Holliday, General Freight and Passenger Agent.

☞ The east end of the Brownsville and New Haven Railroad, extending from New Haven on the Youghiogheny river, opposite Connellsville, to Vance's Mill, a distance of eleven miles, was bought on the 14th inst. at Sheriff's sale by Colonel A. L. McFarland and Mr. A. O. Tinstman, of Westmoreland county, for $11,000.

### Uniform Size of Shafting in Mills and Manufactories.

Those of our readers who have visited the extensive mills at Cohoes, Lowell, Lawrence, Manchester, and other large manufactories four and five stories in height, will remember the enormous amount of shafting and belting and the great number of pulleys on every floor. Beginning in the basement or lower story there are to be found spur and bevel gearing, pulleys of large diameter and wide face, shafts of great size and strength, hangers and brackets—all of the heaviest and strongest description. As ascent is made to the upper floors, these are found to diminish in size and strength until, on the uppermost floor, there are only shafting and pulleys of the lightest kind. This is undoubtedly a general practice and considered to be founded on right principles—the heaviest machinery at the base and the lighter kinds at top. What are, however, the results of this practice? That there are objections to it no mill-owner will deny—objections not to the present custom in the disposition of machinery but in having so many sizes of shafting and pulleys and brackets throughout the entire building. If a pulley has to be changed the new pulley must be bored and fitted accurately to a particular shaft; the old one will not fit any other unless rebored or rebushed—and it is only under certain circumstances that mechanics want to do either. Then, again, various sizes of shafting bring with them different sizes of journals and bearings and styles of hangers. In some buildings four stories high we find not less than four different sizes of shafting; a great number of pulleys bored four different sizes; hangers and brackets of four different patterns. In short, each floor has its special sizes of shafting, pulleys, hangers and brackets, its own peculiar shifting gear and appliances. Now this is a time-honored custom, and we are prepared to find it generally followed for some time to come; but we heard an engineer state a few days ago that if he were to build another mill, he would have one size of shafting only, the larger size, on all the floors, and then all pulleys could be bored to the same diameter and would be interchangeable; all hangers and brackets would be interchangeable, and all bearings (which should swivel and also be adjustable,) would be uniform in size and character. "If a break occurred," said he, "how quickly repaired; if a change of pulley was desired, how easily effected; if a bearing was worn out, how readily replaced." One standard size of shafting, one size of brackets, one size of hanger, and bearings all of the same diameter.

So different is this arrangement to the present one that the new departure would raise a considerable amount of discussion among engineers as to its economy and feasibility; but we are inclined to think that the gentleman is not an old fogy at any rate, but three-fourths if not altogether right, and certainly in advance of the times.

### New York Elevated Railroad.

At a meeting of the Board of Directors of the New York Elevated Railroad Company, held at their office, No. 7 Broadway, on the 21st inst., the following opinion of David Dudley Field relative to the recent decision of the Court of Appeals was read:

No. 4 PINE ST., NEW YORK, Sept. 19, 1877.

GENTLEMEN—The Court of Appeals decided yesterday the case pending before it involving the constitutionality of the Rapid Transit act and the right of your company to complete the lines and make the connections referred to in the order of the Supreme Court, from which the appeal was taken. This decision removes every obstacle to the construction, equipment and operation of your railway on all the lines thus referred to, with the exception of an injunction in the suit of Patton, restraining the construction of a track over the curb next to the Pacific Hotel in Greenwich street, and an injunction in the suit of Story, restraining the construction of the track in Front street, near Whitehall. These injunctions I hope now to see speedily dissolved. But in the meantime they do not interfere with the construction of the tracks in any other places, so that on the east side, starting one block east of Whitehall street, there may be forthwith constructed to the East River ferries, Brooklyn Bridge, the Grand Central station and the Harlem River, and on the west side, except that for the present there can be only a single track in front of the Pacific Hotel, a second track may be forthwith constructed from Whitehall street to Sixty-first, and thence a double track through the island. Very truly yours.

DAVID DUDLEY FIELD.

To the President and Directors of the New York Elevated Railroad Company.

The following resolutions, relative to a change of management and the extensions of the company's road, were adopted:

Resolved, That Colonel W. T. Pelton, be elected a director of this company, in place of Peter Cooper, resigned.

Resolved, That Colonel W. T. Pelton be and is hereby elected vice president of this company, in place of Milton Courtright, resigned.

Resolved, That Colonel W. T. Pelton be and is hereby elected a member of the Executive Committee of this Board, in place of Milton Courtright, resigned.

Resolved, That proposals be invited for constructing a second track on the present line and

extension to Eighty-first street; also for constructing a double track from Whitehall street to Sixty-first street and the various lines connecting with depots and ferries.

Colonel Pelton has been invited to take an executive position in the company, with a view to pushing forward the extension of the present line, and to completing a double track road from the South ferry to the Grand Central Depot and Central Park, on the east side, as early as possible. He will enter at once upon the active management of the existing road from the South ferry to Fifty-ninth street. Mr. Courtright will continue to be the chief engineer of the company.

### Harrisburg and Potomac Railroad.

Some business men from Cumberland county, Pa., who were in Baltimore yesterday, state that a meeting was held last week between Col. Ahl, of the Harrisburg and Potomac Railroad, and Boston capitalists, in reference to the proposed new railroad route from New Cumberland, a little below Harrisburg, to Baltimore by connection with the Harrisburg and Potomac, the Hanover and Gettysburg and the Western Maryland Railroads. They state that negotiations are about being concluded to build a bridge at New Cumberland to connect with the Philadelphia and Reading Railroad; to build the link from Dillsburg to Berlin to connect with the Hanover Railroad; and to extend the Harrisburg and Potomac Railroad to the Western Maryland Railroad at Smithsburg via the Mt. Alto Road. A survey of the route shows the distance from Shippensburg to Philadelphia via Baltimore by the Western Maryland Railroad is but three miles longer than from Shippensburg to Philadelphia via the Cumberland Valley and Pennsylvania Railroads. The agreement with the Mt. Alto Road will be concluded this week. The bridge will be of iron, three quarters of a mile long. Coal and freight from the Reading Road could be shipped to Baltimore without change of cars.—*Balt. Sun, Sept.* 24.

### Texas and Pacific Railway.

We gave last week an abstract of the report of this company for the fiscal year ending May 31, 1877, including the income account and general balance sheet. The following, from the same report, relates to the land department of the road:

Under grants from the State of Texas, your company has become entitled, by the construction of 404$\frac{1375}{2560}$ miles of its road, and from other sources, to 4,816,545.39 acres of land, which amount will probably be increased by 211½ sections, 135,360 acres of land, title to which it is believed will ultimately vest in your company without additonal cost, thus making the total quantity of land owned by the company 4,951,905.39 acres.

Of these lands 3,148,756.39 acres have been already located, leaving 1,667,789 acres still to be located, your company having a preference of location within its reservation until 1880.

Your company has acquired title to all the agricultural and timber lands within its reservation east of the Pecos river, so that these 1,667,789 acres will probably be located between the Pecos river and the Rio Grande.

The greater portion of the company's lands lie west of the 100th meridian, there being but 341,374 acres east from that point, and only 36,667 acres along the line of its completed road east of Parker county belonging to the company.

It is probable that until our line is extended, no considerable sales of lands can be made, except in exchange for land grant bonds, for the reason that in many of the organized counties there are school, asylum, university, and other lands belonging to the State or to counties, in the market at $1 50 per acre on ten years' time, prices and terms with which your company do not propose to compete. So soon as the better portion of such lands are occupied, as they soon will be by actual settlers, your lands can be brought into market, and will undoubtedly bring much better prices.

As many exaggerated statements have been made as to the quantity of land within the company's reservation in Texas, it seems proper to state what the records of the Texas land office show to have been the acreage of public domain, that was subject to location within the reservation at the date of the grant.

As near as can be ascertained, there were but 15,482,160 acres of vacant land within the limits of the reservation granted to this company by the act of May 2d, 1873, of which one-half were set apart for the school fund, leaving 7,741,080 acres that it was possible for the company to acquire.

A survey has been made of all lands within the reservation east of the Pecos river, and 2,798,360 acres have been located by your company, and 1,539,840 acres rejected; and this exhausts all the lands held as a part of the public domain, east of the Pecos river.

West of the Pecos, there remain 6,805,760 acres of unsurveyed public domain, of which the company can acquire 3,402,880 acres; but from the best information that can be obtained, only a portion of this acreage is valuable for agricultural purposes or for timber—not more than enough to absorb the 2,600 certificates that our company has to locate within the limits of the reservation. There are considerable bodies of mineral lands within the reservation, but it is neither for the interest of the State, nor the company, that such lands should be owned by corporations, but that they should be left free for parties prospecting for minerals to locate and develop.

The expenditures of the land deparrment have been as follows:

| | Fiscal Year, ending May 31st, 1877. | Total since organization. |
|---|---|---|
| Cost of certificates, patent fees, and other expenditures at and incidental to the State Land Office | $7,311 62 | $46,185 83 |
| General expenses, including salaries, clerk hire, stationery, preparing maps, etc | 28,277 79 | 187,244 85 |
| Total expenditures | $35,589 41 | $233,430 68 |

No sales of the granted lands of the company have been made during the year, but the following statement shows the receipts and collections during the year from the sale of donated and purchased lands and town lots:

| | Cash. | Bills receivable. | Total. |
|---|---|---|---|
| Receipts from sales during fiscal year ending May 31st, 1877 | $12,716 | $3,224 | $15,940 |
| Collections of deferred payments, account of sales made previous to May 31st, 1876 | 1,325 | 872 | 2,197 |
| Total | $14,041 | $4,096 | $18,137 |

Immigration into the State during the past year has been very large—larger than ever before in its history, and the indications are that it will be greater the coming season. With a view of directing immigration to the counties through which your lines are located, carefully prepared county maps and circulars have been printed for distribution, giving the precise location of the company's lands, and of the state, school asylum, university, and county lands, and the manner of acquiring them, and it is believed that this method of advertising will bring on to your line many immigrants during the coming year.

There can be no reasonable doubt but that a very extensive coal district is traversed by the line of your road, extending through Parker, Palo Pinto, Stevens, and into Shackleford counties, parties recently prospecting that section report a vein of good coal exceeding four feet in thickness, showing outcrops on the different streams running into the clear fork of the Brazos. In fact coal indications are shown in so many places that it gives no special additional value to any particular piece of land, either in the counties named, or in the tiers of counties on the north and south of them. The surface indications, and the reports of State geologists, indicate that the coal field extends through Young, Throckmorton, and Haskell counties north of your line, and Eastland, Callahan, and Taylor counties south. So soon as the road is extended through that section of country, it is believed that an ample supply of coal will be found, sufficient to furnish cheap fuel until it shall reach the coal fields in New Mexico, and will also, in time, furnish a very considerable traffic for the road.

From the center of Parker county, west to the Colorado river, there is a good quality of lime and sandstone, easily worked, and so generally distributed that the lack of building material will not be felt. The stone is generally easily quarried, breaks in very good shape, and requires nothing but the ordinary stone hammer to dress it and put it in shape for the building of ordinary walls.

### South Carolina Railroad.

The earnings of this road for the years ending December 31, 1875 and 1876, were as follows:

| | 1875. | 1876. |
|---|---|---|
| From passengers | $229,221 80 | $200,754 57 |
| " freight | 981,905 44 | 907,506 37 |
| " mails | 18,176 10 | 18,176 10 |
| | $1,229,302 84 | $1,126,437 04 |
| Expenses, viz: | | |
| Conducting transp | $260,609 97 | $220,702 25 |
| Motive power | 199,730 59 | 159,181 02 |
| Maintenance of way | 208,041 36 | 167,948 93 |
| Maintenance of cars | 66,858 73 | 64,434 80 |
| General expenses | 45,487 24 | 35,485 64 |
| | $780,727 89 | $647,752 64 |
| Net earnings | $448,574 95 | $478,684 40 |

Compared with 1875, the gross earnings show a decrease of $102,865 80, equal to 8.37 per cent; the expenses a decrease of $132 975 25, equal to 17.03 per cent; and the net earnings an increase of $30,109 45, equal to 6.71 per cent. The ratio of expenses to earnings in 1875 was 63.51 per cent; in 1876 it as 57.51 per cent.

The number of passengers carried during the year was 119,823, of whom 64,245 were 1st class, and 55,081 2d class.

The tonnage movement of the year has been as follows: moved east, 151,699 tons; moved west, 100,931 tons—total, 252,630 tons, against 261,680 tons in 1875, a decrease of 9,050 tons. The average receipt from freight per ton was $3 59; last year it was $3 75. The average cost of moving same per ton was $1 92; last year it was $2 24. The increase in tonnage eastward was 13,207; while the tonnage westward decreased 22,257. The receipts from freight moved east were $551,618 61; do. west, $355,887 76—an increase in the former of $29,310 52; and a decrease in the latter of $103,709 59, or a total decrease of $74,399 07. The decrease in passenger business was $28,466 73. The President in his report says:

In reviewing the business of the year with a view to trace the bearing of its results upon the future of the company, we find nothing which should cause us to abate in any wise the confident tone of our previous reports. It is true our freight earnings have declined the considerable sum of $74,399 07; but when, upon examination, we learn that, in addition to the general causes so well understood, the road's business has been subjected, for eight months, to a war of rates of the bitterest character, during which the effort was

rather to avoid a business at rates not equal to the cost of service than to court it, there is no proper cause of discouragement.

The passenger earnings, it is seen, have declined $28,466 73. This branch of our business has become so strictly local, by reason of the diversion to shorter and more direct lines of the through travel, which was once so large a portion of it, and, therefore, was peculiarly exposed to the influence of those disturbances so powerfully operative during the year, that a more particular reference to it would seem superfluous.

You will not fail to observe what has been matter of grateful recognition by the board; the continued relative strength of the road's local business. It is even more conspicuous in the present year, than the preceding, when we particularly called your attention to it: a brief exhibit of it will, we feel sure, interest you.

| | |
|---|---|
| The total freight moved west from all points, in 1876, was | $332,427 86 |
| In 1875, was | 432,304 92 |
| | $99,877 06 |
| Of this, there was local (or Charleston) in 1876 | $235,498 92 |
| Through, 1876 | 96,928 94 |
| Local, 1875 | 281,002 00 |
| Through, 1875 | 151,302 92 |

Whilst, therefore, the business from Charleston to interior points has been $235,498 92, or 71 per cent, that from points North, passing through Charleston, has been $96,928 94, or 29 per cent.

The movement Eastward is yet more favorable.

| | |
|---|---|
| Total freight moved East in 1876 | $522,682 37 |
| " " " 1875 | 498,066 72 |
| Increase | $24,615 65 |
| Of this, there was local, or Charleston, in 1876 | $449,543 09 |
| Through | 73,139 28 |
| And in 1875, local or Charleston | 414,508 89 |
| Through | 83,558 33 |

Otherwise expressed, whilst the business to Charleston, local, amounted to $449,543 09, or 86 per cent of the whole, that to points through and beyond, was $73,139 28, or 14 per cent.

COMBINED VIEW.

| | |
|---|---|
| Total freight moved East and West, in 1876 | $855,110 23 |
| Charleston or local | 685,042 01 |
| "Through freight" | $170,068 22 |
| Total freight East and West, in 1875 | $930,371 64 |
| "Charleston, local," to and from | 695,510 39 |
| "Through" | $234,861 25 |

These results would seem sufficiently to indicate the direction of the company's policy—a policy dictated alike by an intelligent perception of its true interest, and a resolute purpose to be fully abreast of the most advanced line of conduct, which looks to the promotion of the prosperity of Charleston—a prosperity absolutely identical with that of this railroad.

| | | |
|---|---|---|
| The balance of earnings as heretofore stated is | | $478,684 40 |
| Received from other sources | | 4,254 13 |
| Total | | $482,938 53 |
| Disposed of as follows, viz: | | |
| Interest on 1st Mortgage Sterling bonds | $90,932 09 | |
| Interest on 1st Mortgage Currency bonds | 73,342 50 | |
| Interest on 2d Mortgage bonds | 75,355 00 | |
| Interest on Domestic Sterling | 444 44 | |
| Interest on Non-Mortgage | 83,225 00 | |
| Interest on bills payable | 109,799 24 | |
| | | 433,098 27 |
| Leaving | | $49,840 26 |

During the year 1876, 1,852 tons new iron rails, 100 tons steel rails, 63,750 pounds spike and 57 frogs were used in repairs of the track. The sum of $1,904 was paid to the Westinghouse Air Brake Company for complete sets of its brakes for five passenger engines and one freight engine. The brake was also applied to the first and second class passenger cars, at a cost of $1,380. "This cost," the Superintendent says, "I am perfectly satisfied has been fully restored to us by the saving in labor of train hands, and in the diminished amount of stock killed by the trains." There were laid in 1876 68 tons more of new rails than in the year previous; and 500 tons steel rails were contracted for to be laid in 1877.

The company have 44 locomotives, 28 first class and 26 second class passenger, mail and baggage cars, 857 box, 13 stock and 104 platform, wood and coal cars. Miles run by locomotives with passenger trains, 159,495; with freight trains, 548,717; distributing, 55,708; switching, 60,627—total, 824,547, against 888,792 in 1875, a decrease of 64,245.

CONDENSED BALANCE SHEET, December 31,

| | 1875. | 1876. |
|---|---|---|
| Roadway, track, depots, etc | $8,057,937 73 | $8,057,937 73 |

### Economy in the Burning of Gas.

The high prices charged by gas companies not many months ago was a subject of very general discussion, as every gas consumer naturally felt that he had a voice in the matter and an opinion to express adverse to monopoly and high charges. Since that time kerosene oil has been very extensively used. Its cheapness is easily demonstrated, and light for light, it runs a successful competition with gas. To gas engineers this fact may be unpleasant to contemplate, but it is one patent to all, and an examination of it has been forced on companies by people burning oil with all its drawbacks

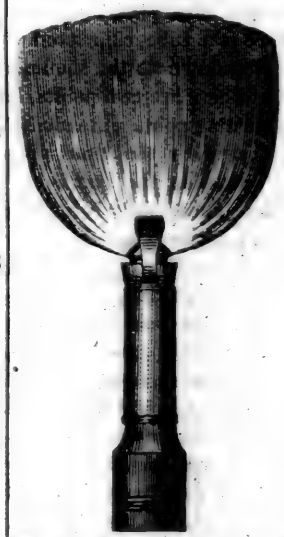

Fig. 1.—IMPROVED WITH HEAT CONDUCTORS FROM FLAME TO CHAMBER.

Fig. 2.—SECTIONAL VIEW OF IMPROVED BURNER.

rather than the more cleanly and less dangerous gas. But since a reduction in price has been made, the preference for gas is being expressed by corporations, companies and manufacturers in their re-usage of it, proving thereby that price and not the article was the objection. The application of several devices for which are claimed increase of illuminating power of gas has been more or less successful; in-

ventions have been introduced to a limited extent, whereby the gas bills could be reduced, but the general opinion seems to be that the application of these things is at the expense of illuminating power. Less gas would be burned but inferior light given.

The Triplex Expansion Economizing Gas Burner here illustrated is not a mere novelty got up to make money, but has been designed and introduced to produce from gas an excess of illuminating power and to effect a complete utilization of waste gas in light. The invention is based upon scientific principles, and before describing it and its operation we must remind the reader of a fact, long well understood by scientific men and expert gas engineers, that if a process could be attained in the appliances for burning gas which would pass a given amount of gas into a chamber, or receptacle, and at that part, before passing to the tip, or burning point, have a means of thoroughly absorbing a certain amount of heat, it would cause an expansion of the gas to such an extent as would check its too rapid flow, and a rarefying of the same, that would cause, when reaching its burning point, a more perfect combustion of gas—or, in other words, a complete utilization of the illuminating power.

Gas expands one four hundred and eightieth part of its volume for every degree of heat added; hence, if taken into a chamber, or receptacle, at a temperature of 32° F., and subjected to a heat of 960° F., one cubic foot becomes three cubic feet by expansion, and the density of the expanded gas is proportionally less.

By reference to the cuts, Figs. 1 and 2, it will be seen that there is a tube connected to a burner, and extending down to the shoulder of the same; also that there are two points, or arms, at the tip, or burning point, extended so that they become heated by the flame, upon lighting the burner, by which the heat is conducted to the chamber, immediately below the tip, or burning point—said chamber being formed by space left in the tube, from orifice of base to bottom of tip inserted in the tube,—thus expanding the gas. By the adoption of this burner it is claimed that consumers are not only benefited by the economy effected and increased light, but also avoid the unpleasantness connected with all ordinary burners—that of blowing upon any variation of pressure. All ordinary burners have to be turned off at the key on account of these variations which cause the blowing, and consequently there is great waste of gas. This invention allows of the key being turned on full, and only allowing passage of gas sufficient to give a full and clear light.

The capacity of the Triplex Gas Burner is as follows:

One 2 ft. burner will more than equal any 4 ft. ordinary. One 3 ft. burner will more than equal any 5 ft. ordinary. One 4 ft. burner will more than equal any 6 ft. ordinary. One 5 ft. burner will more than equal any 7 ft. ordinary.

Further information may be obtained from Wm. H. Darby, General Agent of the Triplex Gas Burner Co., No. 40 Cortlandt Street, New York.

In large manufactories, mills, railroad stations, etc., burners of this description might be advantageously introduced, and when their merits are more generally known, they will probably come into extensive use.

## Central Pacific Railroad.

### LAND AGENT'S REPORT.

LAND DEPARTMENT, CENTRAL PACIFIC R. R. Co.
SAN FRANCISCO, CAL., July 1, 1877.

*To the President and Directors of the Central Pacific Railroad Company:*

GENTLEMEN:—In former reports I have shown, that:

| | |
|---|---|
| The land grant from the United States Government to the Central Pacific Railroad Company of 12,800 acres per mile, for 742 miles is..... | 9,497,600 |
| Deduct for lands previously granted and reserved, say ..... | 1,500,000 |
| Leaves ..... | 7,997,600 |
| The land grant to the California and Oregon Railroad of 12,800 acres per mile, for 291 miles is..... | 3,724,800 |
| Total ..... | 11,722,400 |

The grant to the C. and O. R. R. Co. provides that where lands are lost to the company by reason of previous grants or reservations, they can be made good from an indemnity grant of ten miles wide on either side of the twenty mile limit, which insures to the railroad company the full amount of land granted. The value of these lands, at the Government minimum price for adjoining lands, $2 50 per acre, would be.....$29,306,000

A large portion of this is the choicest agricultural and timber land in the country, and will sell for a much greater price.

The policy of the company has been to sell its farming lands at low prices, and on easy terms of payment, to actual settlers, believing the best interests of the company are promoted by selling in limited quantities to those who will cultivate the soil, and who will own the land they cultivate. By this means an industrious agricultural population is invited, whose improvements and the product of whose labor tend to enhance the value of the unsold lands.

Most of the lands that have been sold were purchased for gold, on a credit of five years; a payment of twenty per cent. being made at the time of purchase, the remainder to be paid at the end of the term, with annual interest, payable in advance, on all sums remaining due.

No sales have been made during the past year except for gold.

There were sold, prior to October 1, 1870, 127,637.55 acres for $295,065 50, averaging $2 31 per acre; and up to December 31, 1876, there has been sold the timber on 5,912.64 acres of land reserved by the Government for mineral, for $15,261 60, and there has also been received for stumpage, $13,673 75.

Of the lands in the California and Oregon R. R. grant, there were sold, prior to the consolidation of that company with the Central Pacific R. R. Company, 9,770.87 acres, for $18,443 36.

There remained due and unpaid December 31, 1876, on lands sold prior to October 1, 1870, $4,413 98 coin and $120 01 currency; and on lands of the California and Oregon R. R. Company's grant that were sold prior to the consolidation of that company with the Central Pacific Railroad Company, there also remained due and unpaid on December 31, 1876, $320 in currency.

Since the execution of the Land Trust Mortgage, October 1, 1870, there have been sold, to December 31, 1876, 311,104.12 acres of land, for $1,722,498 17, being an average of $5 53 per acre, as follows: from October 1, 1870, to December 31, 1872, 122,765.09 acres, for $484,227 97, averaging $3 94¼ per acre; from December 31, 1872, to December 31, 1873, there were sold 58,733.60 acres, for $410,314 92, being an average of $7 per acre; from December 31, 1873, to December 31, 1874, there were sold 63,846.99 acres, for $388,824 26, being an average of $6 09 per acre; from December 31, 1874, to December 31, 1875, there were sold 29,254.76 acres, for $163,725 27, averaging about $5 60 per acre; this includes 160 acres granite quarry, donated to the State.

From December 31, 1875, to December 31, 1876, there were sold 36,503.68 acres for $275,400 75, averaging about $7 54 per acre.

There were also received from December 31, 1875, to December 31, 1876, $500 from lease of railroad lands, and $1,816 06 from stumpage of railroad trust lands.

There has been paid to the Trustees under the Land Trust Mortgage, up to December 31, 1876, the sum of $1,206,653 28 coin and $8 677 51 currency, making a total of $1,215,330 79.

There remained due and unpaid, December 31, 1876, on the land sold since October 1, 1870, $881,336 31 in coin.

The timber lands of the company, while intrinsically valuable, could not be readily sold for a few years after the completion of the road, for the reason that the alternate even sections were reserved from sale by the Government, and, under the theory of the law, they were only subject to pre-emption, and could not be disposed of in any other manner. The proprietors of the saw-mills found it to be cheaper to pay their employes for filing a pre-emption—and thus obtain some kind of authority to remove the timber—than it was to buy the odd numbered sections from the railroad company at Government price. All of the even numbered sections within a reasonable distance of the line of the road are now thus appropriated, and the demand for the railroad timber lands is yearly increasing, and enhanced prices are obtained. The rapidly increasing settlement of the country, and the vast amounts of timber used in the mines in the State of Nevada, cause an increased demand for this class of lands.

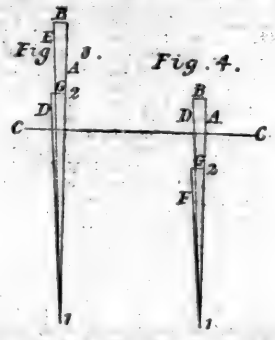
The large tracts of land near the line of the road in Nevada, and called "desert" lands, are found to produce largely wherever water can be obtained for their irrigation. Within the past year this department has made many sales of this class of lands to actual settlers, who find that they can be profitably cultivated.

The lands in Colusa and Tehama counties, California, heretofore reserved from sale by order of the directors, until after the completion of the railroad from Woodland to Williams, are now open to sale. The company has many valuable tracts of first class farming lands in these counties, and as they lie in that portion of the State that has never been subject to drouths, it is safe to estimate large sales during the present year, at greatly enhanced prices.

Heretofore, so much has been done toward inducing immigrants to settle in the southern counties, that a large portion of the immigration sought that part of the State, and the large tracts of farming and grazing land in the northern portion, where irrigation is not a necessity, and where crops never fail, have been neglected. At the present time, the immigration is toward the northern counties, and it is safe to predict a rapid increase of population and consequent increase of sales of land.

Several flume and lumber companies have been formed, and flumes constructed, in Butte and Tehama counties, across the lands of the company, with capital invested of more than $250,000. These will bring into market the large tracts of the forests of sugar pine on the lands of the company, and greatly increase its revenue from this source. Each year, as the State increases in population, it is found that lands increase in value, and that

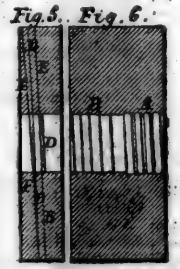
lands heretofore unsalable become of value. The lands of the Central Pacific Railroad Company may be regarded as among its most valuable assets.



Respectfully,
B. B. REDDING,
Land Agent.

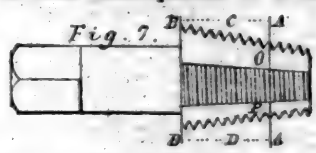
## Taps.

BY JOSHUA ROSE.



In view of the numerous forms in which we find the tap it is as well to explain the principles involved in its construction, for without the use of taps machine shops could scarcely exist, hence the subject is of great importance to the mechanic.

Suppose, then, we take the case of the parallel and taper-threaded taps shown in our engraving, in which Fig. 1 represents a taper parallel in the diameter of the thread, but tapered off, by the removal of parts of the thread at one end, in the manner usually applied in American manufacture. The distinctive feature is that the tapering is not made to extend so far up the length of the tap as it is in English manufacture. Suppose the sides of the thread to have sufficient clearance just to clear the sides of the thread from positive contact with the grooves cut in the work to form the thread. Now let Fig. 2 represent a tap of the same size and pitch, but having an amount of taper in the diameter of the thread sufficient in the length of the tap to equal twice the depth of the thread, so that it will enter the same size of hole as will the tap shown in Fig. 1, without having any of the thread turned off, and we have the following state of existing facts: The full diameter of the taps being an inch, the circumference of the top of the thread at the large end of each will be equal to the length of the line A in Fig. 3. The line B representing the pitch of the thread, and C C representing the centre line of the length of a tap or bolt, we have the line E as representing the angle of the top of the thread to the centre line of the tap. And in the case of the tap shown in Fig. 1, this angle is constant at all parts of the tap. This is not, however, the case with the tap shown in Fig. 2, in which the angle of the thread to the centre line of the bolt varies at every part of its length. The angle at the largest end will, it is true, be that of the line B in Fig. 3; but turning our attention to the small end we shall find as follows: Suppose that in Fig. 4 the line A represents the circumference of the top of the thread, and B the pitch of the thread; we have then the line D as representing the angle of the top of the thread to the centre line C C of the tap. If we now turn to the angles of the bottom of the threads on the two taps, we shall find that the circumference of the tap shown in Fig. 1 being at the bottom of the thread equal to the length of the line A in Fig. 3 from the point 1 to the point 2, and the line G representing the pitch, we have the line D as representing the angle of the bottom of the thread, at every part of the tap, to the centre line C C. Whereas in the case of the tap shown in Fig. 2, the circumference of the bottom of the thread at the large end being the full length of the line A in Fig. 4, the circumference at the small end will be equal to the length of the line A



(Fig. 4) from the point 1 to the point 2, and the angle to the centre line is therefore represented by the line F. As a result, this angle varies at every part of the length of the tap.

The consequence of these angular variations we shall find operate, from every point of consideration, to the detriment of the tap shown in Fig. 2, as will be seen on reference to Fig. 5, which represents the section of a piece of iron with a tapping hole in it, and in which D D represents the angle of the groove which the small end of tap No. 2 would cut on entering the hole. Since the angle of the bottom of this groove requires to be that denoted by the line E, it follows that the teeth or each tooth cuts a groove standing at a different angle to itself; or in other words, each tooth stands crosswise in the groove which it cuts, thus entailing a large amount of friction on the sides of the thread. In addition to this we must remember that since the angle of the bottom of the thread is denoted by the line F in Fig. 4, then as the teeth of the tap enter the hole to a certain depth, they approach to an angle corresponding to the angle of the line F in Fig 4, which is denoted by the line F in Fig. 5; and as a result, the variation of the angle which the teeth actually cut to the groove when finished varies, at the largest diameter of the groove, between that of the line E and the line F in Fig 5. This, however, is not the case with the form of tap shown in Fig. 1, because the angle of the bottom and top of the thread on the tap is the same in every part of its length.

There is, however, another and important consideration in that the tap shown in Fig. 1 finishes its work as it performs it, while that shown in Fig. 2 keeps going over the same ground, nothing being finished until the tap has passed entirely through the hole—that is to say, providing the hole requires to be parallel. The action of tap No. 2 is to cut a V groove deeper and deeper as the tap enters, while the action of tap No. 1 is to leave a V projection. Now while the V groove is continually altered in its angle to the centre line of the bolt beginning at the angle D in Fig. 5, and ending at the angle E in the same figure, the angle of the V projection remains constant from the first to the last of the tapping operation.

In Fig. 6, which represents a piece of iron with a hole in it, in which tap No. 1 has been entered at A, and tap No. 2 at B, it will be observed that the action is in the first case to cut out metal, leaving the thread intact and finished as far as the duty has proceeded; while in the other it is to cut out a groove of the greatest angle and to continue to operate upon it until it becomes of the least angle, so that the effect is as follows: Suppose a hole to be tapped all through to one half a full thread, and we require to put in another tap to make it a full thread; then tap No. 1 would be relieved of any friction from that part of the thread already cut, whereas tap No. 2 would not. Many taper taps are made parallel in their thread all along except for about three quarters of an inch from

the entering end, in which case the evils here shown, though reduced, exist nevertheless in precise proportion to the amount of the taper.

In the case of pipe or gas taps, which usually have a maximum of taper upon them, we have yet another consideration of great moment, in that the teeth of the tap do not cut a groove of a diameter sufficiently large to allow themselves to pass through without being forced through. It will be readily perceived on reference to Fig. 7, which represents a gas tap, that the diameter of the thread increasing as it approaches the back B B of the tap, and A A being a line running true with the top of a tooth, and approaching nearer to B B at one end than it does at the other end (as denoted by the lines C and D), therefore the diameter of the cutting edge P of the tooth is not so large as the diameter of the back of the tooth O, and the tooth does not therefore cut a groove sufficiently large to allow itself to pass freely through. In addition to this, it must be borne in mind that all the defects shown as applicable to tap No. 2 are largely magnified (by reason of the increased taper) in the gas tap, and it therefore follows that it may be given a considerable amount of clearance in the thread, which clearance is necessary to relieve the sides of the thread from undue friction without giving them any freedom or play.

☞ Articles of incorporation have been filed of the Punta Arena Railway and Lumber Company, to trade in land and lumber and build a prismodic railway in Mendocina county, Cal. Capital stock, $2,500,000, divided into 50,000 shares of $50 each. Directors—J. W. Tripp, William Booth, Joseph S. Kohn, D. Freemen and George B. Tolman. Principal place of business, San Francisco.

☞ E. H. Fitler & Co., of Philadelphia, have been awarded the Treasury contract for furnishing cordage to life-saving stations, the contract aggregating about $8000.

## American Railroad Journal.

**Saturday, September 29, 1877.**

### Financial and Commercial Affairs.

With the increasing requirements of the mercantile interest here and at the interior, growing out of the revival of activity in general business, Money has shown more animation, and has been quoted stronger in price, yet lenders have quite readily met the wants of responsible borrowers at the ruling figures, and the market has been wholly free from anything like embarrassing stringency. The additional failures and suspensions reported during the week made no serious impression on the course of the loan and discount market, operators having received the reports without any manifestation of surprise or apprehension, and regarding the specified financial troubles as resulting from the actual insolvency of years, and the inevitable enforcement of the liquidation process in one or another form. Call loans were quoted here at the close at 3@6, with several important time negotiations reported on the basis of 5 per cent; and very choice to prime mercantile credits are rated at 5½@7½ per cent per annum for the best names. The City bank exhibit of last week indicated an increase in the loan and discount average of $181,400, and an increase in the item of circulation of $19,000. The average of deposits was reduced $1,858,800. The legal tender reserve fell off $1,691,500; and the specie average $688,800. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $10,048,075, as against $11,813,800 the preceding week. The City bank exchanges in currency reached $406,032,278, or a daily average of $67,505,379.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $15,022,244; special deposit of legal tenders for the redemption of certificates of deposit, $53,920,000; Coin, $110,829,577, including of Coin certificates, $39,833,100.

The C ntroller of the Currency is credited with the remark that the additional circulation of national bank notes issued during the present month will not be less than $1,000,000, and the indications are that a much larger amount will be issued during the months of October and November, for the purpose of supplying banks with currency necessary for the movement of the crops.

The outstanding amount of legal tender notes is $357,976,164. The National bank circulation is now $315,531,214 of currency notes and $1,432,-120 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,-353,000.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $44,316,679, against $45,380,815 the preceding Wednesday; and a coin hoard of $98,-958,884, against $90,731,886 on the return of a week earlier. The Customs revenue of the port during the past week was $2,132,867.

Government securities have been in rather better demand on investment account, without any very remarkable alterations in values. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 121@122; do. 6s, 1881, registered, 109⅛@109¾; do. coupon, 110⅝@110¾; do. 1865, new, registered, 105⅛@105⅝; do. coupon, 105⅛@105⅝; do. 1867, registered, 107¼@107⅜; do. coupon, 107⅜@107½; do. 1868, registered, 109¼@109¾; do. coupon, 109⅛@109¾; do. ten-forties registered, 107@107⅛; do. coupon, 108@108½; do. five per cents, 1881, registered, 107⅛@107¼; do. coupon, 107¼@107⅜; do. 4½ per cents, 1891, registered, 105¼@105½; do. coupon, 105¼@105½; do. 4 per cents, 1907, reg., 101⅝@101¾; Central Pacific Gold Bonds, 105½@106.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $337,776,750, and $15,-203,000 as security for public deposits.

Less activity has been noted in State Bonds, prices of which have fluctuated considerably, closing irregularly. A moderate business has been noted in the better class of Railway Mortgages which have been unsettled in price, on a more liberal offering of the several loans. And in the line of Railway and Miscellaneous share property the week's business has been on a restricted scale, with prices showing more or less of depression, under speculative manipulations, leaving off, however, more firmly for the favorites of the railway share list, especially of the Western interest, though quite heavily and irregular in the coal carrying connection.

The interest on $65,000,000 four per cent funding bonds maturing on the 1st of October will be paid from the National Treasury on that date.

Gold has been devoid of notable animation, and measureably free from serious disturbance in price. The speculative movement has been very tame. The customs call has been moderate for the season. The extremes of the price during the week have been 103@103⅜, closing at 103⅛, as against 103⅛ on Wednesday of the preceding week. The specie outflow last week was only $221,911, making the total exports of specie hence since January 1, $22,653,357, against $40,448,900 the same time in the preceding year. The imports of specie at this port last week were $705,812, and since January 1st have been $11,413,445, as against $4,031,269 same time last year. The Customs demand for gold last week averaged $355,-670 per day.

Foreign Exchange has been in generally moderate request, closing rather easier in price, influenced in part by the more favorable financial advices from London. Bankers' sixty day bills on London closed on Wednesday at $4 82@$4 82⅛; sight bills on London at $4 86¼@$4 86¾ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,400,133 as against $6,865,551 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,788,917 of Dry Goods, and $4,611,216 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the very liberal aggregate of $7,427,-911, against $5,550,475 same week in 1876.

The income of the Government from internal revenues last week was about 2⅞ millions, and and from Customs last week about 2¾ millions.

An active movement has been reported in most kinds of domestic produce during the week, especially in Breadstuffs, Cotton, Provisions and Petroleum, with prices, however, showing irregularity; Breadstuffs and Provisions leaving off weak, and Cotton and Petroleum buoyantly. The export dealings in Cotton have been fair, partly for Russian Baltic ports. Foreign merchandise has been in generally good demand at comparatively steady rates. Sugars receded slightly. Molasses advanced.

A fair inquiry has been noted for a few specialties in the Metal line, but the general market has been comparatively quiet. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25@$25 50; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50. Forge $16@$17; American Rails at works $35@$38. Old Rails $18@$19. Wrought Scrap $22@$24. Steel Rails, on the basis of $45@$48 at the mills. Ingot Copper in fair request on the basis of 18@18¼ for large lots, and, at the close, at 18⅛ for smaller amounts, for early delivery.

More animation has been reported in Hardware, Boots and Shoes and Dry Goods which have been generally quoted firm.

Ocean freights have shown rather less firmness, in the line of berth rates, on a freer offering of accommodation, with a fair demand noted for room at the modified figures. In the chartering line, business has been less active, checked by the scarcity of tonnage, and full rates asked by shipowners. Liverpool steamer rates at the close for Grain, quoted at 8½d. Provisions, 35s.@50s.; Tallow, 32s.@35.; Leather, 50s. Measurement Goods at 20s.@26s. per ton; Cotton, ½d. per lb., Tobacco 85s.@40s. Liverpool, by sail, Cotton, ½d.; Grain, 8½d. Oil Cake 17s. 6d.@20s.; Measurement Goods 15s.@20s.; Tobacco 20s. 3d.@32s. 6d; Grain rates on charter hence for Cork and orders left off at 7s. 6d.@8s.; for the Continent at 7s. 8d.@8s.; and from Baltimore for Cork and orders, 7s. 3d.@7s. 6d. and from Philadelphia at 7s. 3d. @7s. 6d. per quarter. Refined Petroleum hence for Cork and orders, 5s. 3d.@5s. 7½d.; for the Continent, 4s. 6d.@5s. 3d. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Chicago, Milwaukee and St. Paul Railway Company, New York, Sept. 27, 1877.

NOTICE IS HEREBY GIVEN THAT A DIVIDEND of Three Dollars and Fifty Cents per share, out of the net earnings of the year 1876, has been declared on the Preferred stock of the Chicago, Milwaukee and St. Paul Railway Company, payable at the office of the company, No. 68 William-st., on the 16th day of October next, and that the transfer-books will be closed on the 1st day of October and reopened on the 17th day of October next.

JULIUS WADSWORTH, Vice-President.

THE COUPONS OF THE FIRST MORTGAGE Bonds of the Central Pacific Railroad Co. (San Joaquin Valley Branch), and of the Land Bonds, due October 1, 1877, will be paid at the office of FISK & HATCH, No. 5 Nassau street.

C. P. HUNTINGTON, Vice-Pres't.

THE COUPONS OF THE FIRST MORTGAGE Bonds of the Southern Pacific Railroad Co. (of California), due October 1, 1877, will be paid at the office of the Company, Nos. 9 Nassau and 11 Pine Streets, New York. C. P. HUNTINGTON.

☞ There have been $1,100,000 subscribed, and $400,000 more is needed, to complete the Pittsburg and Lake Erie Railroad. The contract for the road has not yet been let, and will not be until all the stock is subscribed.

### Progress of Railroad Construction.

The New Castle (Penn.) Ore Company has broken ground for a narrow gauge Railroad from that city to the great ore beds in the southeastern portion of Lawrence county. The road will be about eight miles long, and the intention is to finish it, if possible, the present year. The building of this road will insure the starting up of the idle furnaces, which will be a great advantage to the city and county, besides developing a vast quantity of mineral wealth.

A meeting was held at Kammerer, Washington Co., Penn., on the 18th inst., to consider the question of constructing a branch from the Pittsburgh, Castle Shannon and Washington Railroad, up the Monongahela Valley, via Kammerer, Beallsville to Millersboro', or some other point on the upper Monongahela.

Work is in active progress on the extension of the New Brunswick Railway, from Andover, N. B., to Grand Falls, on the St. John River, and this section is to be completed this season. A further extension from Grand Falls to Little Falls has been put under contract, to be finished next year.

Articles of association for the extension of the Utica and Black River Railroad, from Morristown to Ogdensburg, N. Y., have been filed with the Secretary of State at Albany. Work on the extension will be commenced immediately.

The Washington and Waynesburg (Penn,) Narrow Gauge Railroad has crossed the line of Washington and Green counties. The road will be completed between the middle of October and the first of November.

The survey of the Whitehaven Railway in Cape Breton, is to be proceeded with in October, and the work begun in 1878.

Work upon the Burlington, Monmouth and Illinois River Railroad will shortly be resumed.

The Albany Board of Trade have resolved in favor of the Boston project of a new railroad from the Hoosac tunnel to Schenectady, via Albany.

At a meeting of the directors of the St. Croix and Penobscot Railroad Co., at Calais, Me., on the 19th inst. it was voted to survey the route of the proposed extension of the road to Passaquamkeag, beginning operations on the 25th.

A Brattleboro', Vt., correspondent says that the Brattleboro' and Whitehall Railroad project looms into prominence again and there is prospect of an active winter campaign in its behalf. If business revives generally, as it promises to, the road ought to go through with little delay. Manchester and Dorset are now moving energetically in the matter of town aid, and those who are in position to know say that if Whitehall and Granville do their duty every town on the line will follow suit.

A preliminary survey has been made of the route for a narrow gauge railroad to be constructed between Napa City, Cal., and Monticello, showing that the distance would be about thirty-five miles, and the deepest cut on the road twenty feet. The estimated cost is $250,000.

The North Shore Railway, intended to connect Montreal and Quebec, via the North Shore of the St. Lawrence, is nearly completed from Quebec to a point about opposite Berrel,

**Decisions of the Court of Appeals in the Elevated Railroad Cases.**

The following decisions were rendered by the New York Court of Appeals at Albany on the 18th inst.:

The Gilbert Elevated Railroad Company, respondent, vs. Catherine M. Kobbe, appellant; the Gilbert Elevated Railroad Company vs. Anderson et al.—Church, Chief Justice.—These appeals are from orders appointing Commissioners to appraise damages in proceedings to condemn lands for the purpose of the respondent's road. The proposed route lies through South Fifth Avenue, in the City of New York. The fee of the street opposite their premises is in the appellants' and not in the city. Several points are presented, and have been exhaustively argued with great ability and ingenuity, and some of them are not free from difficulty. After as full an examination as I have been able to make, I have arrived at a conclusion upon the respective points made, which I shall proceed to state, with the reasons therefor, briefly, without attempting to elaborate the arguments in their support. Among the most material of these points is the proposition that the 36th section of the Rapid Transit act, so called, chapter 606 of the Laws of 1875, the first clause of which, it is alleged, was intended for the benefit of the respondent's corporation, is a violation of some of the provisions of the last series of amendments to the State Constitution, which took effect on the 1st day of January, 1875, before the passage of the act. These provisions are as follows:

The Legislature shall not pass a private or local bill in any of the following cases: Granting to any corporation, association, or individual, the right to lay down railroad tracks; granting to any corporation, association, or individual, any exclusive privilege, immunity, or franchise whatever. The Legislature is required to pass general laws in these cases, and prohibited from passing any law authorizing the construction or operation of a street railroad without the consent of one half in in value of the property owners or the certificate of the Commissioners appointed by the Supreme Court.

It is important to understand the status of the Gilbert Company at the time of the passage of the Rapid Transit act, as it has a bearing upon the proper construction to be given to the act in its application to this company. Prior to the passage of this act, and before the amendments of 1875 took effect, under the successive acts of 1872, 1873, and 1874, the Gilbert Company became incorporated for the purpose of the construction and the operating of an elevated steam railroad. Two sets of Commissioners had, in pursuance of said acts, designated the routes over which the road was to be constructed, and the corporation was authorized in the fullest manner to occupy the streets and avenues designated for that purpose. Authority was also conferred to condemn lands under the power of eminent domain. The City authorities were prohibited from giving permission to any other person or corporation to do any of the acts which were authorized by the act to be done by this corporation, and were expressly enjoined to aid the corporation in carrying out the purposes of the laws. Thus it will be seen that at the time of the passage of the Rapid Transit act in 1875 the corporation was the grantee of the right to lay down tracks upon the elevated plan described in the charter, and had all the incidental powers necessary for that purpose. The charter had not been forfeited, nor had there been a failure to comply with the conditions imposed in respect to the time of building the road.

The Rapid Transit act authorized a comprehensive and independent system of rapid transit by elevated railroads through the City. It authorized the appointment of Commissioners by the Mayor to determine the necessity for such railways, to locate routes, fix upon the plan of construction, organize and put in operation a corporation with powers defined by the act, and then by the first clause of the 36th section, which is in controversy here, it provided that "whenever the route or routes determined upon by said Commissioners coincide with the route or routes covered by the charter of an existing corporation formed for the purpose provided by this act, provided that said corporation has not forfeited its charter or failed to comply with the provisions thereof requiring the construction of a road or roads within the time prescribed by its charter, such corporation shall have the like power to construct and operate such railway or railways upon fulfillment of the requirements and conditions imposed by said Commissioners as a corporation specially formed under this act. The Commissioners appointed for that purpose adopted the routes of the Gilbert Elevated Company, but required some changes in the form of the structure in a portion of the streets, from an arch covering the streets, supported by posts located at the curbs, as provided in the charter, to a structure supported by upright posts in the centre of the streets; and required a reduction of fare and the running of extra trains at half fare for the benefit of the laboring population, all of which has been assented to by the company." A point was also made that the commissioners made more radical changes of the structure from a tubular railway, to be operated in whole or in part by pneumatic power, to an open steam railway; but in the case of the Sixth Avenue Railroad Company against the Gilbert Company, the evidence and findings in which are incorporated into the papers, it is found that the charter contemplated an open railway to be operated by steam power, and such is, I think, the proper inference from the act itself and the facts proved, so that this point, whether important or not, may be regarded as out of the case. It is pertinent, also, to refer to the rule of constructions to be applied. Every presumption is in favor of the constitutionality of acts of the Legislature. An adverse doubtful construction is not sufficient to condemn an act; it is only in cases of a clear and substantial departure from the provisions of the fundamental law that courts will declare acts of the Legislature invalid. (55, N. Y.; 54, 50, N Y.; 553, 14, Mass.; 340, 17, N. Y.; 235, 23, Wend.; 166.) There is a distinction in this respect between the State and Federal constitutions. The former grants to the State and Assembly all legislative power not prohibited by the latter or excepted by the instrument itself. The latter grants to Congress specific powers only; hence the exercise of a legislative power by the State Legislature will be presumed constitutional under the general grant of power, and will be sustained unless brought clearly within some of the exceptions, while a similar exercise of power by Congress can only be justified by an affirmative grant embracing the specific power exercised.

Assuming that "the corporation having coincident route or routes" specified in the thirty-sixth section of the Rapid Transit act was descriptive of and was intended to apply only to the Gilbert Company, the first question is, in view of the facts and rule of construction referred to, whether the Legislature did by that act grant to the Gilbert Company the right to lay down railroad tracks, within the meaning of this clause. The right existed prior to the passage of the act, and that right the Legislature intended to protect. The act recognized in terms that the corporation was formed for the purpose provided by the act, which purpose was to build and operate an elevated steam railway in and through the streets of the city. The Legislature granted that right to the new corporation authorized to be created, but the company already possessing that right, whose route or routes were satisfactory to the Commissioners, was intended to be recognized and its powers confirmed. The changes required were restricted in character. By the charter the whole street was to be covered by the structure. By the conditions imposed only a portion of some streets could be occupied. The reduction of fares and the requirement for extra trains at half fare were clearly restrictions of existing rights. I cannot accede to the proposition that any change in the structure and in the manner of occupying the streets, however restrictive upon the company or beneficial to the public in the use of the streets, constitutes a fresh grant of the right to lay down railroad tracks. It is a misnomer to call such restrictions grants of any right whatever. In my judgment, an act restricting and regulating an existing right to lay down railroad tracks is not a grant of that right within the meaning of this clause. It is not within the letter of the clause, nor within the evils at which the provision was aimed.

The next question is, whether the Rapid Transit act, "especially the thirty-sixth section," violates the other provision quoted prohibiting the Legislature, by a private or local bill, from "granting to any corporation, association, or individual, any exclusive privilege, immunity, or franchise whatever." It is not easy to understand precisely what was intended by this cause. It is difficult to construe this clause as meaning anything less than an absolute monopoly, but it is not deemed necessary to define its precise significance. It is sufficient to say that it has not been made clear that the clause was violated by the Rapid Transit act. No exclusive right or franchise was granted to the respondent corporation upon any construction of the clause. Every substantial right existed before the passage of the act. The legislature evidently felt embarrassed by these provisions, and attempted to avoid all question in respect to them by passing a general act. The act is general in form at least, and probably as much so as the objects sought to be accomplished would permit. The objection that the consent of a majority of the owners of the certificate of the Supreme Court Commissioners must be obtained has no application to this corporation, or does the Rapid Transit act acquire such consents or certificates. Objection was made that the act of the Commissioners in designating the routes is void because the route designated crossed Broadway below Fifty-ninth street, which is forbidden by the Rapid Transit act, and on this point the court says: "I do not think that such exclusion would invalidate all the routes designated. The Commissioners are authorized to designate the route or routes for such railways, and it is not necessary that all the routes should coincide. The authority is coextensive with the coincidence of the route. We think that this objection is not fatal to the rights of the respondents to an order to appraise appellant's damages to property in South Fifth avenue. The objection that the Rapid Transit act improperly delegates legislative power to the Commissioners is not tenable. The Legislature had the power to determine all the questions delegated to the local authorities, but there was no rule which forbids the Legislature referring such questions to a subordinate tribunal. The question of damages is not involved in these cases. To determine what particular occupation of the streets is to be deemed a legitimate public use involves important and delicate questions. Whether the structure contemplated to be built and operated will be an invasion of the property of the building owners in any of the streets, entitling them to some remedy for damages, or whether it will be regarded as a legisimate use of the streets for the benefit of the public, the inconvenience and annoyance of which private abutting ownership is subject to, cannot with propriety be adjudicated upon these appeals. The criticisms upon the terms of the order are not tenable. The order is to be construed in connection with the Constitution and statutes, and the appellants will be at liberty to claim any damages to which they are constitutionally and lawfully entitled. The order must be affirmed. All concur.

FOLGER, Justice.

The judgment in the case of the New York Elevated Railroad Company having adjudicated the constitutionality of the act of 1875 in all its parts, I yield to that judgment as the law of the land, and therefore concur in this.

Rappallo and Andrews, Justices concur on authority of the same case.

THE NEW YORK ELEVATED RAILROAD.

In the matter of the petition of the New York Elevated Railroad Company. John E. Parsons

and George F. Comstock for appellants. James Emott and A. J. Vanderpoel for respondents. Earl, Justice.

In the case of the New York Elevated Company the opinion of the court reviews the constitutional objections raised in the previous case, and also the objection based on taking private property without compensation, and concludes: "It is thus entirely clear that this company has all the authority conferred in the General Railroad act to take and acquire real estate for the purpose of its road by the special proceedings provided; and section 36 of the Rapid Transit act provides that the Elevated Railroad Company may construct the connecting routes with all the rights and like effect as though the same had been a part of the original route of such railway. Hence it seems to me that there is no room for doubt that ample provision is made for compensation for any property rights abutting owners may have in the streets, I conclude, therefore, that there are no constitutional objections which call for the reversal of the order appealed from."

After reviewing other objections, principally technical, the opinion says: "I have thus given careful consideration to all the objections to which our attention was called upon the argument of this case, and conclude that there are no constitutional objections to the Rapid Transit act, and no valid objections to the proceedings under the act, and that the order appealed from must be affirmed."

Church, Chief Judge, concurs.

Allen J., concurs. (See memorandum by Allen, J.)

Folger, J. dissents.

Andrews and Rapallo, J. J., dissent on the ground that no provision is made for compensation of abutting owners.

Order affirmed.

### Queries and Replies.

Inquiries to be answered must be appropriate to the columns of the JOURNAL.

L. and A.—How long should a good stout steel driving tire last? Ans. It should run about 30,000 miles before becoming worn sufficiently to require turning down.

L. M. CUMMINGS.—We have a great deal of iron work to paint from time to time. Can you recommend any particular paint for preserving iron exposed to the weather? Ans. Pulverized oxides of iron, such as yellow and red iron ochres; or brown hematite iron ores finely ground; and simply mixed with linseed oil, and a dryer.

MOULDER.—Can you give me some information respecting Bronze and Bronzing? Ans. We refer you to Knights Mechanical Dictionary Vol. 1 Page 387. There are books that treat fully on this subject, although we cannot name them.

MCDONALD.—What is the average speed of passenger and freight trains in England? Ans. Ordinary Passenger trains 30 to 35 miles per hour, express 40 to 50 miles per hour, freight 15 miles per hour. Higher speeds are common there, but are not maintained for any great length of time.

S. LATIMER.—What is the difference if any, between heat and caloric? Ans. The word heat implies the sensation experienced on touching a body hotter, or of a higher temperature; whilst the term caloric provides for the expression of every conceivable existence of temperature.

LOCOMOTIVE ENGINEER.—How can I find the heating surface of my locomotive boiler? Ans. Find the area in inches of the 4 sides and crown sheet of the fire box and deduct the area of the ends of the tubes and fire door ring included. The heating surface of tubes is ascertained by taking the circumference of a tube multiplied by its length then by the number of tubes. The crown sheet is the most effective heating surface in boilers of the locomotive pattern. All the surface of tubes is not considered as effective, only two-thirds of the superficial area of the tubes is considered as effective heating surface.

F. H.—What is the shrinkage of iron in cooling? Ans. We suppose you mean cast iron, which shrinks from one eighty-fifth to one ninety-fifth of its length. Shrink rules are made for pattern makers. A common allowance is ⅛ inch per foot for shrinkage. ¼ inch for two feet, etc.

### BOOKS AND MAGAZINES.

Hand-Book of Modern Steam Fire Engines, including the running, care, and management of steam fire-engines and fire-pumps. With Illustrations. By Stephen Roper, Engineer, Author of "Roper's Catechism of High Pressure or Iron Condensing Steam Engines," "Roper's Hand-Book of the Locomotive," "Roper's Hand-Book of Land and Marine Engines," etc. Philadelphia: Claxton, Remsen & Haffelfinger, 624, 626 and 628 Market Street. 1876. Price $2 50.

This work is original in design and intended chiefly for the use of manufacturers of steam fire-engines and those belonging to city fire departments. Like other works by the same author it contains much valuable information. The principles of hydraulics and hydraulic machines, and also the properties of fire, air, water, heat and steam are discussed in a manner that can be easily comprehended by those having charge of steam fire-engines. The steam fire-engines constructed by different makers are represented and described, besides, rules, calculations data, and details in modern practice, etc.

### Brooklyn Central Elevated Railroad.

A map was filed in the office of the Registrar of Kings county on the 22d inst. of the Brooklyn Central Elevated Railroad Company as approved by a majority of the directors, viz: Robert Wilson, William Kowalski, John M. Kehoe, Thomas C. Melghan, W. Wiltshire Riley, D. W. Ketcham and Richard H. L. Tighe.

The object of the incorporators is to construct, under the General Railroad law, an elevated railroad through the city of Brooklyn. It is to start at Fulton ferry; run, with as light ascent, along the upper side of Furman street past Wall street ferry, at the same elevation as the bridge, to South ferry at Atlantic avenue; thence along Columbia street to West Baltic; along West Baltic; across Court to Baltic as far as Third avenue; along Third avenue to Douglass street; across Fifth avenue to St. John's place; thence to Eighth avenue, and along the centre of that avenue to the depot of the Prospect Park and Coney Island Railroad Company, at Ninth avenue and Twentieth street, passing through the centre of the block between Nineteenth and Twentieth streets, and reaching the depot on a level with ninth avenue. It is also in contemplation to have a branch at Fourth avenue to Fort Hamilton. The railroad is to be constructed on a single safety elevated rail. The height of the track above the street is to vary from twelve to nineteen feet, and a steam motor is to be used. There will be a station every two or three blocks, according to the exigencies of travel, and it is believed that the distance from Fulton Ferry to the Prospect Park and Coney Island Depot will be made in twenty-five minutes, stoppages included.

**Eastern (Mass.) Railroad.**

Mr. William B. Bacon, one of the trustees of the Eastern Railroad, recently returned from Europe, reports that the present condition of the company's affairs is entirely satisfactory to those who hold its securities abroad. Without the sanction of Mr. Bacon for the statement we venture to say that the constant increase of freight traffic, under the most discouraging circumstances, has exceeded the hopes of the trustees. In expectation of better times this will be the strong point upon which the trustees expect to build up a future for the road. The interest is all provided for, as well as the rental, and there is no reason for doubting that in the end the road will redeem its credit and be a dividend-paying corporation.—*Boston Traveler.*

☞ Maj. Johnson, president of the Buchanan and Clifton Forge railroad, which is to extend from Buchanan, Botetourt county, Va., to Clifton Forge, on the Chesapeake and Ohio railroad, says that with a subscription of $15,000 from the cities of Lynchburg and Richmond the road can be finished in good style with cut masonry, steel rails and iron bridges, and equipped so as to have the cars running from Clifton Forge to Buchanan by the 4th of July.

### The Coal Trade.

For the week ending the 15th instant, the total tonnage, as reported by the several carrying companies, amounted to 333,634 tons, against 452,637 tons in corresponding week last year, a decrease of 119,003 tons. The total amount of anthracite mined for the coal year is 18,604,447 tons, against 11,558,050 for same period last year, an increase of 2,046,397 tons. The quantity of bituminous coal sent to market for the week amounted to 39,772 tons, against 75,884 tons in corresponding week last year, a decrease of 39,162 tons. The total amount of anthracite mined for the year is 2,179,792 tons, against 2,452,350 tons for corresponding period last year, a decrease of 272,558 tons. The total tonnage of all kinds of coal for the week is 372,806 tons, against 528,521 tons in corresponding week last year, a decrease of 155,715 tons. The total tonnage of all kinds of coal for the coal year is 15,784,239 tons, against 14,010,400 to same date last year, an increase of 1,773 839 tons. The receipts at Perth Amboy for the week ending on the 15th instant were 33,454 tons, the shipments 32,792 tons, leaving a stock on hand of 59,949 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of September was 104.976 tons, of which 89 973 tons were coal, and 14,828 tons coke. The total carried for the year is 3,156,308 tons, of which 2,524,445 tons were coal and 579,988 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Sept.* 24.

### Joining Iron and Steel Wire Ropes.

Mr. W. Heibell, of Birmingham, England, has invented a process by which the wires can be produced of any required length, having at the joined part a strength equal to any other part. It is often necessary to join two or more lengths of wire together, in order to obtain the required lengths for guides for coal and other pits, colliery ropes, telegraph wire, and cables, &c., and this is ordinarily done by welding. By Mr. Heibell's invention, the two ends of the wire are pared down until they appear in a wedge shape, and then are connected by brazing, or hard soldering, and the junction formed has a strength equal to any other portion of the wire.

☞ The Topeka Equipment Company has declared a dividend of 5 per cent. payable Oct. 1.

## EDWIN H. BROWN,

7 Warren Street, New York,

**Solicitor U. S. & Foreign Trade Marks & Patents.**

Make a note of the time when you first think of an invention, date and keep all writings, sketches, drawings and models of it. It will be well to have persons sign the former as witnesses, and this may be done without exhibiting the contents. To establish title to your invention, even after obtaining a patent, you may have to prove that you made it before any one else, and never gave it up.

OFFICE OF THE NEW YORK ELEVATED RAILROAD Co., No. 7 Broadway, September 21, 1877.

**NOTICE TO CONTRACTORS.**

SEALED PROPOSALS WILL BE RECEIVED at the office of this company until Tuesday, October 2, at 12 M., for the completion of its double track railroad between the Battery and 61st st.; for its double track extension along 9th av. from 61st to 81st st., west side, and for its double track from Whitehall st. through Front and Pearl sts., the Bowery and 3d av. to 59th st, including branches to the ferries, western terminus of the East River Bridge and to the Grand Central Depot, east side, comprising altogether about three miles of single and six miles of double track. Terms cash. The right is reserved by the company to allot the work to such contractors only, and to any one contractor only so much as it may deem to be for its interest. Form of proposals, division of material and work, specifications, time of completion and any other information required, can be obtained at this office.

### Africa as a Market for our Surplus Products.

The greatest want of this country which has become an absolute necessity is new markets for our surplus products. Abundant in such products as ivory, palm oil, cocoa oil, gums, drugs, dye woods, cabinet woods, etc., with a population of hundreds of millions, the immense peninsula of Africa seems to present an inviting field for commercial and industrial enterprise and one such market as the country needs. We have the most suitable means and the best facilities for establishing commerce and manufactures there and for securing a monopoly of the trade of that rich country. The river Niger is said to be 1,500 miles long, and its borders densely populated with intelligent and thriving people who gather and sell thousands of tons of the various products to European merchants, a fact which indicates that there are openings for enterprise available and advantageous for our merchants and tradesmen.

The exploration of the African coast has been frequently made by the Portuguese, who were the first to discover in succession the Cape of Good Hope, Cape Bojador, the Canaries and Madeiras, Cape Blanco, Cape Verd Islands, Sierra Leone and the Guinea Coast, and other places now familiarly known. Travelers like Mungo Park, Major Laing, Barth, and Livingstone have made their explorations and researches comparatively speaking single-handed, and from these explorers we have learned very much about Africa, its geographical points, climate, people and resources. On the Northwestern and Eastern sides there are numerous available ports and harbors for shipping by which the different States could be supplied with American productions and therefore there are no geographical difficulties to prevent the establishment and opening of a whole line of commercial ports. The country stands to-day the second in point of magnitude, the least civilized, and the most unimportant in political influence of the great divisions of the globe. Separated from Europe by the Strait of Gibralter and the Mediterranean Sea on which vessels and large steamships now sail to and fro from European ports laden with valuable cargoes for Spain, France, Italy, Sicily, and for only a few places on the African coast, it seems as if even the northern coast presented opportunities for emigration, colonization and civilization. The immense population of Africa, conjectured to be about 185,000,000, will in course of time, by missionary effort and the progress of civilization, (although small and slow at present) become both producers and consumers, and by commercial interchange and enterprise will be enabled to take their place among the civilized nations of the world. This is only a work of time, but there are opportunities now to make vigorous efforts in this direction and to establish commercial relations and enterprise. If the wise statesmen of our general and State governments will unite with our manufacturers, our shipping, exporting, importing and wholesale merchants, in devising some practical plan for aiding emigration and colonization, and sustain for a brief period those who establish stations, there will be found plenty of colored men trained in commercial houses ready and competent to embark in commercial enterprises.

Our educated freedmen are now organizing colonies to emigrate to the land of their forefathers where they may become rulers in establishing civilization and Christianity, and are seeking aid from Europe. In Carolina it is said there are rolls with thousands of names ready to embark this coming winter, and in Charleston they have raised $20,000—in ten dollar shares—toward purchasing a vessel. Is this the nucleus of a grand project? What civilization has already accomplished strengthens faith in the African. What it is doing for India, Japan and China, it can do for Africa. Unless prompt action is taken, this country will be forestalled and Europeans will appropriate our freedmen as instruments in securing the trade of Africa to themselves. This is no impracticable or visionary scheme, but one which deserves the attention of the American press and American statesmen at the present time.

### New York Elevated Railroad.

There were carried on the New York Elevated Railroad for the month of September, 1877, 289,098 paying passengers against 198,632 for the corresponding month last year. It is understood that the management expects to put on from twenty to thirty additional trains during certain hours morning and evening as soon as possible.

The Supreme Court, General Term, Judges on the 1st inst, received a remittitur from the Court of Appeals in the matter of the petition of the New York Elevated Railroad Company for the appointment of commissioners under the fourth section of the Rapid Transit act directing its judgment to be made that of the former Court. An order to this effect was entered. It will be remembered that the Supreme Court, General Term,

granted the petition, from which an appeal was taken to the Court of Appeals, which Court now confirms its action. This decision calls for the appointment of three commissioners, who are to proceed at once to appraise the value of property taken for the use of the road irrespective of the consent of the property owners.

### Maine Central Railroad.

The earnings of the Maine Central Railroad and Branches for the years ending December 31, 1875 and 1876, were as follows:

| | 1875. | 1876. |
|---|---|---|
| From passengers | $797,767 25 | $769,657 07 |
| " freight | 866,241 36 | 836,028 21 |
| " U S. mail | 52,427 54 | 52,153 00 |
| " express | 37,500 00 | 37,500 00 |
| " car use | 25,306 30 | 30,110 37 |
| " extra baggage | 2,543 25 | 1,048 86 |
| | $1,781,785 70 | $1,726,497 51 |
| Expenses, viz: | | |
| Fuel consumed | $195,729 20 | $188,262 23 |
| Maintenance of way | 353,860 38 | 305,478 32 |
| Train expenses | 336,074 58 | 301,249 70 |
| Station expenses | 177,971 66 | 185,389 21 |
| Office establishment | 42,511 23 | 32,014 14 |
| General expenses | 40,919 77 | 29,688 14 |
| | $1,147,066 82 | $1,042,081 74 |
| Earnings less exp. | $634,718 88 | $684,415 77 |
| Add rents & wharfage | 3,990 77 | 5,135 72 |
| Dividend Dexter and Newport R. R. stock | 300 00 | 300 00 |
| Net earnings | $639,009 65 | $689,851 49 |
| Deduct interest on loans, dividends on stocks, rent of Dexter and Newport and Belfast and Moosehead Lake Railroads, etc | 614,359 32 | 651,364 75 |
| Leaving a surplus of | $24,650 33 | $38,486 74 |
| Add balance from report of 1875 | | 462,988 41 |
| Received from sale of Consolidated bonds | | 131,720 00 |
| From exchange of Consolidated bonds for Portland and Kennebec R. R. stock and Maine Central interest scrip | | 969,300 00 |
| From notes payable | | 91,947 64 |
| From real estate sold | | 800 00 |
| Due Dexter and Newport Railroad for rent | | 6,000 00 |
| Due sundry accounts | | 18,861 27 |
| Outstanding coupons and interest on stock and scrip not exchanged | | 20,641 54 |
| | | $1,740,740 60 |
| From which there has been paid— | | |
| Eastern R. R. Certificates of Indebtedness | $15,195 03 | |
| Notes receivable | 13,083 98 | |
| Principal of Funded Interest loan | 1,482 93 | |
| Somerset and Kennebec 1st Mortgage loan | 100 00 | |
| Somerset and Kennebec 2d Mortgage loan | 172,600 00 | |
| Portland and Kennebec R. R. stock surrendered | $677,800 | |
| M. C. Int. Scrip surrendered | 418,700 | |
| | $1,096,500 | |
| Less discount in exchange for bonds | 131,580 | |
| | 964,920 00 | |
| Sundry accounts | 20,564 37 | |
| | | 1,187,946 31 |
| Balance December 31, 1876 | | $552,794 29 |

This balance is composed of the following assets:

| | |
|---|---|
| Dexter and Newport Railroad stock | $5,400 00 |
| Ticonic Water Power stock | 5,000 00 |
| Eastern R. R. Certificates of Indebtedness | 15,195 03 |
| European and North American Railway bond | 1,000 00 |
| Notes receivable | 13,481 42 |
| Due from connecting roads | 6,702 08 |
| " A. & W. Sprague Co | 4,618 79 |
| " station agents | 21,979 37 |
| " sundry accounts | 22,685 08 |
| Wood and coal on hand | 127,749 16 |
| Stock for repairs on hand | 79,984 80 |
| Cash on hand | 244,488 57 |
| Total, as above | $552,794 29 |

The total earnings for 1876 were $1,731,933 23; operating expenses, $1,042,081 74; net earnings, $689,851 49. The total earnings for 1875 were $1,786,076 47; operating expenses, $1,147,066 82; net earnings, $639,009 65—showing a diminution in 1876, compared with 1875, in gross receipts of $54,143 24, and in operating expenses of $104,945 08, making the increase in net receipts $50,841 84. The President in his report says:

Though the finances show a decrease in the gross receipts of the company, compared with the years immediately preceding, we are happy to be able to state that the facts also show a still larger relative reduction in our expenditures, with, we trust, no deterioration in the general condition of your property but rather the contrary. The falling off in gross receipts is to be attributable to the almost universal and continued depletion of the business of the country, requiring the transportation of both passengers and freight at lower rates, while the diminution in our expenses is in a large degree the result of the industry and faithfulness of those in the service of the company.

The annexed report of the treasurer, to which we call the attention of the stockholders, is full and satisfactory, and will exhibit in detail the following general result, viz:

| | | |
|---|---|---|
| Traffic receipts as per table | | $1,726 497 51 |
| Receipts from rents and wharfage | | 5,185 72 |
| Receipts from dividends Newport and Dexter R. R. stock | | 300 00 |
| Total income | | $1,731,933 23 |
| Deduct working expenses | | 1,042,081 74 |
| | | $689,851 49 |
| Deduct for interest and dividends | $597,364 75 | |
| Deduct for rents of leased roads | 54,000 00 | |
| | | 651,364 75 |
| Balance to credit of profit and loss account | | $38,486 74 |

There is also carried to the credit of profit and loss account $116,600 for discount of scrip and stock exchanged, less discount on M. C. consols sold.

The comparative state of liabilities existing Dec 31, 1875, and Dec. 31, 1876 is, under the circumstances, especially gratifying, presenting as it does a decrease of $62,785 29 in the outstanding liabilities of the company during the last fiscal year.

This apparent reduction of liabilities is largely increased, as appears when we take into consideration a practice which has prevailed with railroad corporations of charging to improvement account the difference in value for superior materials used, &c., as in the use of steel rails in place of iron and for the improved character of bridges, buildings, equipments, and the like; thus in the year 1875, under the heads of improvements and equipments, the sum of $52,224 54 was thus charged, while in the year 1876 nothing has been charged, though it is believed that the extra sums expended for improvements have been fully as large in the latter as in the former year. So, too, in the promptitude with which all running accounts against the company have been adjusted, and all balances ascertained and paid, and carried into the ordinary expenditures of this year, thus apparently increasing our operating expenses and preventing the company from exhibiting so large a reduction of liabilities as has actually been made during the period covered by this report.

In these remarks we do not intend to assert that an improvement account for a completed railroad is at all times and under all circumstances vicious and inadmissible; but we do affirm that such accounts are in all ordinary cases objectionable and hazardous for stockholders, and when existing in a road in full operation may well suggest a careful scrutiny into the cause of their existence. They may be made a plausible and convenient covering for injudicious and indefensible expenditures. It is safe to blot them out.

Railroads have been the great highways for the nations—thoroughfares for communication and commerce for all civilized people. Into their construction and support has not only the wealth of States and nations been poured with a liberality unexampled in the history of public improvements, but private citizens and local municipalities have also contributed of their resources their accumulated wealth and their credit with a profusion unknown in any other species of improvements, public or private.

These roads have become in popular estimation indispensable to the development of modern civilization and furnished favorite opportunities for the investment of surplus capital, commanding the confidence of our people.

In this condition of public sentiment it is not surprising that in their construction have been readily, perhaps too often, inconsiderately embarked the accumulated wealth and zealous efforts of the honest, the enterprising and the over-hopeful, and that they should have been seized upon as promising schemes for money making by the reckless and ever vigilant speculators. Such has been the case. Hence, instead of first locating and testing these roads and great natural and central lines for the development of the intercourse and commerce of the country, where experience has demonstrated that they would have proved not only of great public convenience, but remunerative as investments of capital, the indiscriminate and unwise construction of competing and unnecessary lines, which have been operated in a spirit of local or personal hostility, has resulted disastrously to all; and instead of leaving the vast sums of money invested in the stocks and securities of these corporations for the benefit of widows, orphans and others who seek for safety rather than large profits, widespread and ruinous loss has resulted.

This is now patent to the most indifferent observer and demands relief alike for the suffering creditors and stockholders of those corporations. This relief is to be found in the cessation of the construction of these unnecessary and competing lines—to run those now in existence under such arrangements that the smallest number of trains practicable shall be run that can be made to accommodate the public, and that a system of personal responsibility and rigid economy shall be everywhere practised in their management. To accomplish this object has been the effort of your directors during the last year.

The Superintendent's Report, published herewith, gives a full and satisfactory presentation of the operation of his department.

While a review of our experience of the last year brings before us some occurrences that fail to afford satisfaction, on the whole, however, we have more cause for congratulation than regret. We have been remarkably free from accident or damage, for which much credit is due to the watchful care of those in our employment, who have with great cheerfulness concurred in their efforts to protect the interests of the company and the safety of its patrons.

Our relations with connecting roads have been harmonious and friendly.

We have endeavored to treat our neighbors with justice and in a liberal spirit, and in return have been met almost without exception in the same spirit of equality and frankness. In view of the fact that prior to the original location of our road so many points of competition were established, and in a view of the general depression in business, and the necessity that all have felt for making every fair and honorable effort to maintain and increase our earnings for the benefit and relief of our stockholders, we think it remarkable that so little friction has occurred between us. It betokens a desire on all sides to use the errors springing from the inexperience of the past as guides to future prosperity.

The increase in "notes payable" over last year is accounted for in the payment in part of the Somerset and Kennebec Railroad bonds; in the increase of repair stock on hand and in the amount of cash in the hands of the Treasurer in excess of the balance reported last year.

In conclusion we are fully satisfied that the financial condition of your road has very considerably improved during the year under a severe depression of business. This is very encouraging; and we are confident that when the times improve and the country becomes prosperous, as most assuredly they will at no distant day, the road, under judicious and prudent management, cannot fail to give very gratifying returns to its stockholders.

The number of miles of road owned by the company is 307.5; leased lines: Belfast and Moosehead Lake R. R., 33½ miles; Newport and Dexter R. R., 14 miles—total miles operated, 355.

The equipment of the road remains about the same as last year, and consists of 60 locomotives (16 coal and 44 wood burners), 57 passenger, 28 baggage, 4 postal 14 freight saloon, 6 workmen's 777 box, 556 flat, 110 wood and gravel, 4 wrecking, 102 hand, and 79 push cars, and 16 snow plows.

The number of tons of freight carried was 882,942; number of tons carried one mile, 25,029,850. Average receipts per ton, $2 18 32; do. per ton per mile 3.34 cents. Average mileage of one ton 65.36 miles.

Number of passengers carried, 698,199; do. carried one mile, 25,208,476. Average distance traveled by each passenger, 36.30 miles. Average earnings per passenger $1 12; do. per passenger per mile, 3.06 cents.

The number of miles run by passenger trains was 534,446; by freight trains, 491,718; by fuel, construction and switching, 295,803—total, 1,321,967.

BALANCE SHEET, DECEMBER 31, 1876.

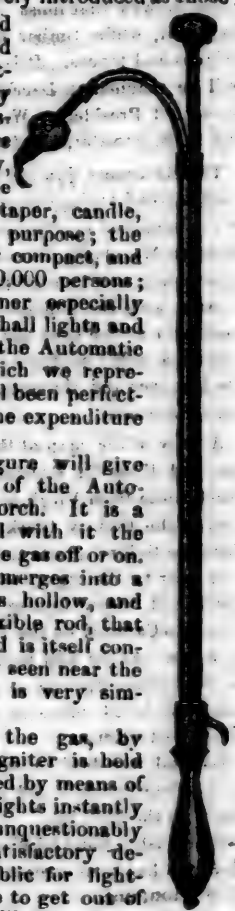
President.—ABNER COBURN.

Directors.—Darius Alden, Noah Woods, John B. Brown, George L. Ward, James W. Johnson, James P. Cook, Arthur Sewall, William G Davis, Frank Jones, Samuel G. Lawrence.

Superintendent.—PAYSON TUCKER.



Treasurer.—J. S. CUSHING.

### American Trade with Germany.

In response to the trade circular recently transmitted from the Department of State to our Consular officers, an interesting report on the prospects for the extension of American trade in Eastern, Southern and Central Germany has been received from the United States Consul-General at Frankfort-on-the-Main. After fully reviewing the obstacles to this increase, such as the attachment of the German people to fixed customs, and their disinclination to accept innovations which imply a change of habits and the manner of doing things which have come down from generation to generation, the Consul-General feels assured that all such obstacles will readily yield to the great law of profit and pecuniary interest which governs commerce, and that the present time is peculiarly favorable for the introduction and sale of American productions in that part of Germany. The existing plethora of coin, the languishing state of skilled productions, and the low rates of duty prevailing, specially invite our producers and manufactures to find a profitable market there. The best and surest way to command this extension of trade, in the opinion of the Consul-General, would be by the establishment of a central depot at Frankfort, where American goods and manufacturers would be constantly on exhibition, this permanent depot or exhibition to be attended by responsible agents, men of strict integrity and financial responsibility, to solicit sales and carry out all the rules necessary to the full success of any active legitimate enterprise. A compliance with these rules and an accommodating spirit toward the peculiarities of the people and their requirements cannot but lead to a large and profitable increase in the American trade with that important part of the German Empire comprised within the Consulate-General of Frankfort-on-the Main. The very friendly feeling which prevails among the people toward the United States will greatly facilitate all commercial relations between the two nations.

### Gas-Lighting Made Easy.

The improvements recently introduced by the Stockwell Self-Lighting Gas Burner Company are of the most meritorious and valuable description. No improvements in gas lighting apparatus and devices have ever been so highly appreciated and extensively introduced as those that have been invented and successfully applied by them. The Self lighting Gas Burner, whereby the gas is instantaneously lighted by the mere turning of the usual key, thus dispensing with the necessity of using wax taper, candle, lamp or match for the purpose; the cigar lighters, small and compact, and now in the hands of 200,000 persons; the wheel key gas burner especially adapted to chandeliers, hall lights and street lamps; and now the Automatic Gas Lighting Torch which we represent here—these have all been perfected and introduced by the expenditure of large capital.

The accompanying figure will give the reader a good idea of the Automatic Gas Lighting Torch. It is a torch, having connected with it the usual key for turning the gas off or on. The curved arm which merges into a straight vertical one is hollow, and through it passes a flexible rod, that operates the igniter, and is itself connected with the trigger seen near the handle. The operation is very simple.

Having turned on the gas, by means of the key, the igniter is held over the jet and operated by means of the trigger. The gas lights instantly and certainly. This is unquestionably the most simple and satisfactory device now before the public for lighting gas. It is not liable to get out of order in damp weather like the electric apparatus, and there is no danger of spilling oils or other liquids over furniture or carpets. Moreover it is cheap, light and handy, and can be advantageously used in all houses, hotels, factories, stores and offices. The Stockwell Self-Lighting Gas Burner Company's office is at 89 Liberty Street, New York, where these devices can be examined and all information respecting them obtained.

### Heavy Freight Traffic.

The Johnstown Tribune of 1st inst., says that during last week 142 freight trains passed Johnstown eastward over the Pennsylvania Railroad, and they consisted of 4,831 loaded cars, and 161 empty ones—or a total of 4,992. There were, during the same period, 145 westward-bound trains, of which 2,510 cars were loaded, and 2,592 empty, a total of 5,102. There is only an average of 12 trains per day less at present than during the briskest season the Pennsylvania Company has yet known. All the employes on rolling stock, shop hands, etc., are working full time, and many are making over time.

☞ The Columbus, McArthur and Gallipolis Railroad company have completed the survey west as far as Lockbourne, Franklin county, Ohio. T. B. Bancroft is President of the company.

**Progress of Railroad Construction.**

A despatch from Yuma, Arizona, states that the first regular train from San Francisco crossed the bridge over the Colorado River on the 30th ult. The grading and track laying have been pushed eastward rapidly.

At the recent annual meeting of the Stratford and Huron Railway Company the report of progress showed that most of the track is laid and ballasted, while timber is taken out for ties, bridges and fences. It is expected that Listowel will be reached in December. S. S. Fuller was re-elected President; W. P. Watson, Sec.-Treas., and A. B. Atwater, chief engineer.

The Baltimore Sun says that the Western Maryland railroad authorities express entire confidence in the proposed new route to Harrisburg via the Western Maryland, Hanover and Gettysburg and Harrisburg and Pennsylvania Railroads, and connection with the Philadelphia and Reading Railroad by a bridge over the Susquehanna. In this scheme a traffic contract has been made between the Hanover and Gettysburg and Western Maryland Railroads.

A copy of the map of the Virginia City (Nevada) and Umatilla Railroad, showing the Louise creek route from Virginia City to Reno, has been filed in the County Clerk's office. The road will skirt the Geiger grade to the Toll House where it will bear to the right, leaving the grade to the south and follow Louise creek to Long canyon, thence to Camp 37 on the Truckee river, and thence to Reno. At the Toll House a branch will be laid to Steamboat Springs and Washoe valley. The road will be 24 miles in length to Camp 37, and 30 miles to Reno.

Ground was broken on the Peterborough end of the Peterborough and Hillsborough (Vt.) Railroad, on the 21st ult.

The Washington and Waynesburg Narrow Gauge Railroad has been completed to within a few miles of Waynesburg.

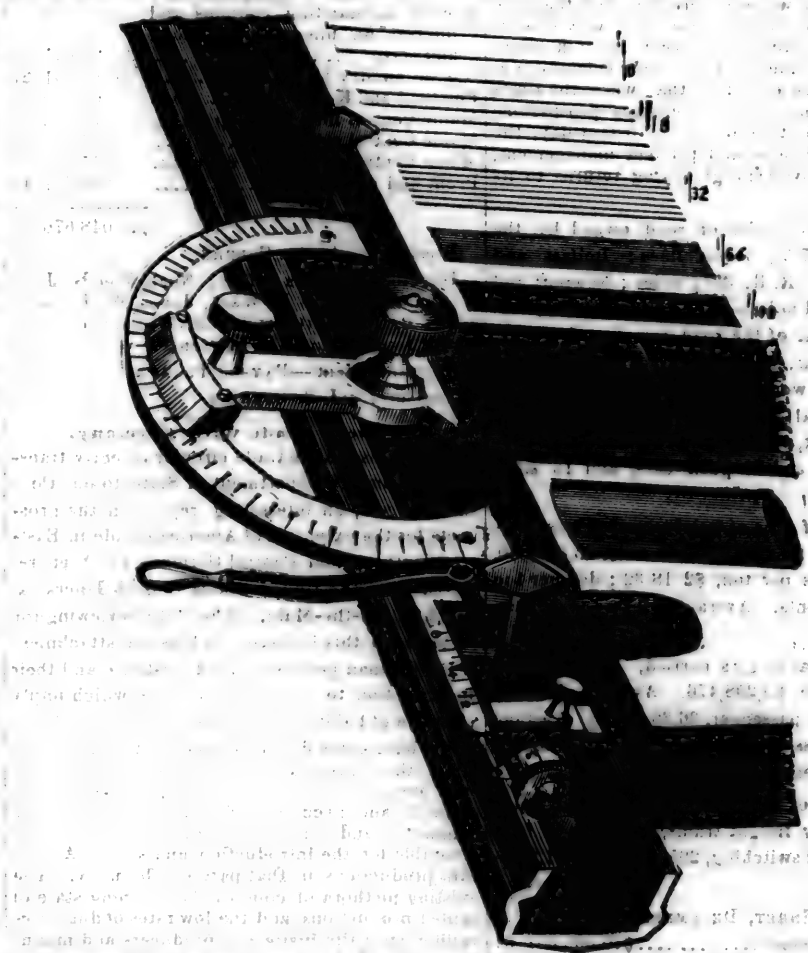
A prismoidal one-rail railway is in course of construction in the Bradford Oil district.

The Los Angeles Chamber of Commerce has adopted a resolution asking the City Council to grant the Southern Pacific Railway Company the privilege of connecting the Santa Monica Railroad with the Southern Pacific Railroad.

It is said that an appropriation of $50,000 will be asked of Congress to make a preliminary survey of a railroad from the colony of Liberia eastward one or two thousand miles into the interior of Africa, and to report upon the country, its population, climate, productions, and the practicability of such road; when, if favorable, efforts will be made with a view of extending colonization, commerce and civilization over the vast interior.

The Southwest Pennsylvania Railroad has been extended to Oliphant's Furnace, four miles south of Uniontown—making the total length of road now operated about 41¼ miles.

The Philadelphia, Newtown and New York Railroad branches from the Connecting Railroad about 100 yards below the crossing of the North Pennsylvania Railroad, at what is called Erie avenue.



As stated elsewhere, the entire work of construction, bridging, etc., of the Pittsburg and Lake Erie Railroad has been put under contract to B. J. McCrann, of Lancaster, Penn. Work is to be commenced at once near Phillipsburg in Beaver county, and pushed to early completion.

---

**Proportional Parallel Rule.**

The device illustrated here is an ingenious one designed for the purpose of aiding draughtsmen, and claims the attention of civil and mechanical engineers, architectural and mechanical draughtsmen, surveyors, engravers and students of industrial drawing. It is more especially intended for drawing parallel lines, as employed to represent cylindrical objects, and also oblique lines for sections, line shading of surfaces to indicate different planes, and wherever a number of parallel lines either horizontal, perpendicular or oblique are needed. The instrument unlike others invented for a similar purpose is uncomplicated, compact, strong and easily handled, and can be readily applied for other purposes besides those mentioned, but which can be better understood by a personal examination of its peculiar construction. The inventors and patentees are W. Gardam & Son, of 112 John Street, in this city, where the instrument is being manufactured, and where the makers will furnish all explanation and information.

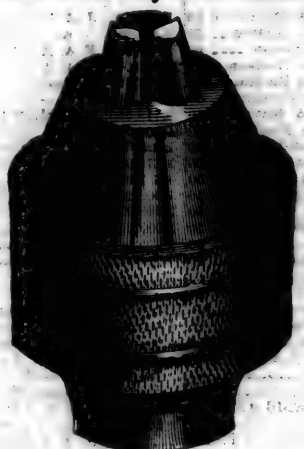
Reference being made to the engraving it will be seen that it combines a perfect T Square with a Graduated Protractor, reading by a vernier to 1′ of arc, with an index and micrometer head-screw, for measuring lines or distances to any scale.

By means of the metal frame shown attached to the drawing board, the T Square with the Protractor will travel in a straight line back and forth over the surface of the same, said frame being held to the board by clamps in such a manner as to be readily moved to any side of the board. By means of the lever in conjunction with the micrometer screw, the T Square will travel any required distance from ½ inch to a blank; by changing the positions of the keys it will travel in the opposite direction, or can be locked at pleasure in any position on the board, thus enabling the operator to off-set, or do other work for any length of time without being fatigued by holding the T Square, the left hand being placed at liberty—which will be found of great importance. Distances can be measured directly on the board, up, down, or across, by the aid of scales used by draughtsmen, quicker than can be taken by a pair of compass dividers. (Any ordinary drawing or chain scale will fit the attachments provided for them by the inventors.) By taking out the keys it can be used as a T Square of a very superior kind, as no deviation from a straight line is possible, and of course enhancing the value of the results; in fact, it is a perfect T Square and Protractor, also a graduating and measuring instrument and a locked straight edge, and can be used by any persons in a few

minutes after sight. It can be made with an extra vernier for setting off the deviation of the compass, for surveyors and engineers, at small additional cost, and with micrometer head screw divided into decimals or fractions of an inch, to suit the purchaser.

The instrument is made in sizes suitable for Whatman's drawing paper, or of any special size at short notice; all the material and workmanship is of the best quality.

### The Almond Chuck.



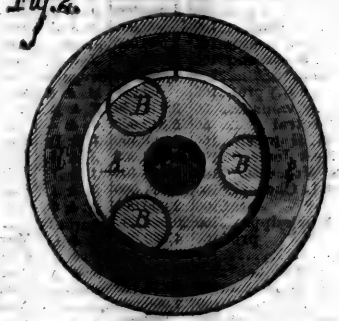
The annexed engravings represent views of a device well known to machinists and mechanics, both experts and amateurs, as the Almond Chuck, an appliance capable of being attached to a lathe, drilling or boring machine, and of holding small reamers, drills, augers, or other circular cutting tools commonly employed in machine shops. It has become popular on account of its good construction and high efficiency, the patentee and manufacturer having devoted time, labor and expense in perfecting it and rendering it a most desirable tool for the purpose intended.

The well-known inventor, T. R. Almond, has what may be termed a snug machine shop at 84 Pearl Street, Brooklyn, which is supplied with excellent tools and where he is engaged in constructing chucks of different styles and sizes.

The following description may give an idea of the manner of constructing the Almond Chucks and of their great usefulness.

It seldom happens that a piece of machinery composed of a number of working parts, which require the nicest care in their construction, can be produced entirely by the use of the lathe.

An examination of the annexed cut will show that each piece is circular in form, the jaws being simply round pieces of Stub's steel, properly shaped at their gripping edges, and provided with a portion of a screw thread on their inner ends. These jaws fit into corresponding circular guideways, which are simply holes drilled in the body of the chuck at an an-



EXTERIOR VIEW.

gle with its axis, and running throughout its entire length. The nut C, is made in two halves, for the purpose of allowing it to be placed in the groove formed in the body of the chuck, thereby allowing its screw to engage with the threaded portion of the jaws. The two halves are held together by the ferrule, which being driven tightly over them, forms the complete nut, moving when turned, freely over the body of the chuck, and thus causing the jaws to move backward and forward, and to and from the centre. It will be at once seen that the jaws cannot turn in the guideways, because that portion which corresponds with the nut, must be of the same curvature; this very effectually prevents them from turning. We might almost say that there are but five pieces in all, the ferrule being really a

Fig. 1.

Fig. 2.

LONGITUDINAL AND TRANSVERSE SECTIONS.

part of the nut itself. Usually, the jaws and their guideways in the various chucks which have been invented, are the most difficult parts to construct. Mr. Almond states that one man alone has completely finished forty sets of circular guideways in ten hours, and in such a manner that the most perfect fit possible is the result.

Because of the light cost of construction, the very best materials are used, all of which are steel, the nut and jaws being hardened. It is a reliable, durable and elegant chuck for practical and amateur purposes. Its cheapness and excellent construction are certainly strong recommendations, and have made it deservedly popular with mechanics in this and other countries. For further particulars address the inventor and manufacturer, T. R. Almond, 84 Pearl Street, Brooklyn, N. Y.

☞ The directors of the Boston, Revere Beach and Lynn Railroad Company have issued proposals to the stockholders to take such proportion of the Bonds, recently authorized, at seventy-five per cent of the par value as will net the sum of $230,000, which represents the present indebtedness of the Company. The Bonds bear 6 per cent. interest, and are secured by a mortgage of the franchise and all the property of the Company. The road and ferry have cost $640,000.

☞ The trial of Pullman cars by the Midland Railway Company in England has not, according to common report, proved to be a financial success. At a meeting of the shareholders, lately held, the chairman was obliged to confess that the Pullman would not do as substitutes for first-class carriages.

### New York Elevated Railroad.

Sealed proposals were received by this company on the 2d inst. for the completion of its double track extension along Ninth avenue, from Sixty-first street to Eighty-first street, west side, and for its double track from Whitehall street through Front and Pearl streets, the Bowery and Third avenue to Fifty-ninth street, with branches, comprising altogether about three miles of single and six miles of double track.

As regards the new road on the east side, which will connect with the west side road at South ferry, the route proposed, as already stated, is through Front to Pearl street, thence to the Bowery and Third avenue to Fifty-ninth street. Branches will also be constructed to connect with the ferries and the western terminus of the East River Bridge and with the Grand Central Depot.

The vice president of the company, Colonel Pelton, announced that as soon as the bids, of which there were eighty-one, can be tabulated and examined, the contracts will be awarded and work immediately begun. Every effort will be made to have the lines completed by the 1st of next January; but should that not be practicable, the road will be sufficiently advanced, particularly on the east side, so as to afford large additional facilities to the traveling community.

The chief engineer, Mr. Courtright, in submitting his report to the president and directors, declared that the capacity of the present road cannot be increased and satisfactorily run short of making it a double track. The construction of a double track on the east side of the city from the South ferry to Central Park, a distance of five miles, with equipments and appointments necessary to its full running operation, he estimates at a cost of $1,625,000, or $325,000 per mile. In this estimate is included sixty passenger cars, twenty-five dummies, eight stations to the mile and engineering. This estimate does not include the sum of $275,000 for real estate, car houses, machine shops, &c., making a total cost of $1,900,000. He estimates the number of passengers per annum at 14,700,000 and the receipts at $1,350,000.

☞ The St. Paul Pioneer Press says that a new company has been formed in Minnesota called the Northern Railroad Company to construct and operate a railroad from some eligible point on the Northern Pacific Railroad, in the county of Becker, or Clay, to or near Pembina or St. Vincent, and that the scheme will be pushed, unless the Dutch bondholders of the St. Paul and Pacific shall promptly take steps to complete the St. Vincent branch of that road from Glyndon to Pembina.

☞ It is stated that the sale of the Louisville, Cincinnati and Lexington Railroad to Messrs. Charles Tilden, Jacob Krieger, Sr., F. S. Schmidt, and John Bangs, on the 1st inst., is virtually a sale to the Pennsylvania and the Louisville and Nashville Railroad Companies, the purchasers to secure the bonds held by them by preferred stock in the new company which will be organized to run the road.

# American Railroad Journal.

**Saturday, October 6, 1877.**

### Financial and Commercial Affairs.

Though the last weekly exhibit of the city banks indicated a general decrease in the reserves adverse to ease in the loan and discount line, resulting mainly from the crop moving requirement of the interior sections of the country, West and South, the course of the Money market has not varied materially. Responsible borrowers have had their wants promptly provided for on a steady basis as to rates; the offerings of capital have been on a liberal scale, and in excess of the demand for aid, from sources which were deemed satisfactory to the lending interest. Call loans were quoted here at the close at 3@6, chiefly 4@5 per cent; and very choice to prime mercantile credits are rated at 5½@7½ per cent per annum for the best names. The City bank exhibit of last week indicated a falling off in the loan and discount average of $2,128,600, and an increase in the item of circulation of $128,300. The average of deposits was reduced $5,952,900. The legal tender reserve fell off $478,900; and the specie average $2,622,400, the latter having been traced in part to the Syndicate payments into the National Treasury on account of the four per cent loan. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of only $8,435,000, as against $10,048,075 the preceding week. The City bank exchanges in currency reached $419,866,185, or a daily average of $69,894,364.

The aggregate of the outstanding U. S. curren

cy of all denominations, October 1st, was $876,154,672.

The liquidation of the national indebtedness in September was $3,882,524, and since July 1, $8,570,968.

The disbursements of the National Treasury in September (exclusive of interest or principal of public debt) were $9,873,505.

On Tuesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $14,206,417; special deposit of legal tenders for the redemption of certificates of deposit, $43,110,000; Coin, $119,152,043, including of Coin certificates, $37,997,500.

The coinage executed at the mints of the United States during the month of September, reached $7,056,200, including of: double eagles, $4,492,200; trade dollars, $1,677,000; half-dollars, $408,400; quarter-dollars, $349,600, and dimes, $129,000.

The outstanding amount of legal tender notes is $356,914,932. The National bank circulation is now $315,891,948 of currency notes and $1,482,120 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,861,000.

The U. S. Sub-Treasury receipts in September were $64,965,680 (of which $9,413,444 from customs); payments, $57,947,512, (of which $5,138,879 of coin interest.)

A fair inquiry has been reported, during the week, for Government securities, the favorite issues of which have been sought after by investment buyers at the ruling figures, which indicated no very remarkable alterations in values. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 120¼@120⅝; do. 6s, 1881, registered, 109⅛@109⅜; do. coupon, 110⅛@110¼; do. 1865, new, registered, 105¼@105⅜; do. coupon, 105¼@105⅜; do. 1867, registered, 107⅛@107¼; do. coupon, 107¼@107⅜; do. 1868, registered, 109@109¾; do. coupon, 109⅛@109¾; do. ten-forties registered, 106¾@107; do. coupon, 107¼@107⅛; do. five per cents, 1881, registered, 107@107⅛; do. coupon, 107⅛@107¼; do. 4½ per cents, 1891, registered, 105@105½; do. coupon, 104⅞@105; do. 4 per cents, 1907, reg., 101⅜@101½; do. coupon, 101½@101¾; Central Pacific Gold Bonds, 105¼@105¾.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $337,946,850, and $15,208,000 as security for public deposits.

Business in State Bonds has been on a moderate scale, with prices quoted irregular, closing more steadily. In the better class of Railway Mortgages the dealings have been to a fair aggregate at rather firmer prices. And in the line of Railway and Miscellaneous share property the week's business has been more extensive, with prices generally showing a stronger range, though the shares of the Coal carriers continued more or less depressed, through speculative manipulation.

A somewhat freer movement has been reported in Gold, but the temper of the speculation has been bearish, under comparatively liberal offerings. The export drain has been light, and the call for custom house purposes quite moderate for the season. The extremes of the price during the week have been 102⅞@103⅜, closing at 103, as against 103⅛ on Wednesday of the preceding week. The specie outflow last week was only $187,453, making the total exports of specie hence since January 1, $22,840,810, against $40,587,168 the same time in the preceding year. The imports of specie at this port last week were $190,384, and since January 1st have been $11,603,829, as against $4,372,538 same time last year. The Customs demand for gold last week averaged $353,704 per day. On Wednesday of this week, £500,000 in specie were withdrawn from the Bank of England, of which £170,000 for New York.

Supplies of Foreign Exchange have been in excess of the demand from legitimate sources for strictly prime bills, and prices have been quoted rather easier closing heavily. Bankers' sixty day bills on London closed on Wednesday at $4 80@$4 81⅛; sight bills on London at $4 84@$4 85⅛ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,198,485 as against $5,499,261 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,432,008 of Dry Goods, and $3,766,477 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the very liberal aggregate of $6,775,624, against $5,385,115 same week in 1876.

The income of the Government from internal revenues last week was about three millions, and and from Customs last week about 2½ millions

Most kinds of domestic produce have been quite freely dealt in during the week, especially in Breadstuffs, Provisions and Petroleum. Breadstuffs have been seriously disturbed in price, through speculative manipulation, particularly noticeable in the instance of No. 2 Red Winter Wheat, on September contract account; closing generally lower. Petroleum and Provisions ruled higher, but the former left off heavily. Naval Stores closed stronger. Wool also firmer. Foreign merchandise has been fairly active at comparatively firm rates.

A somewhat livlier business has been noted in the Metal line, but generally at unchanged figures. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25@$25 50; Coltness $26@$27; No. 1 American Pig at $18@$18 50; No. 2 do. at $17@$17 50. Forge $16@$17; American Rails at works $35@$38. Old Rails $18@$19. Wrought Scrap $22@$24. Steel Rails, on the basis of $45@$48 at the mills sales reported of 7,000 tons. Ingot Copper in moderate request on the basis of 18½ for early delivery.

Hardware, Boots and Shoes and Dry Goods have been generally quoted as before, on active movement, though the aggregate of the dealings was not quite up to that of the preceding week.

Ocean freights have been generally less active and toward the close rates have shown less firmness, especially in the line of berth rates for British ports. Liverpool steamer rates at the close for Grain, quoted at 8d. Provisions, 35s.@50s.; Tallow, 32s.@35.; Leather, 50s. Measurement Goods at 22s. 6d.@30s. per ton; Cotton, 5-16d. per lb., Tobacco 35s.@40s. Liverpool, by sail. Cotton, ⅛d.; Grain, 8d. Oil Cake 17s. 6d.@20s.; Measurement Goods 15s.@20s.; Tobacco 26s. 3d.@32s. 6d; Grain rates on charter hence for Cork and orders left off at 7s. 3d.@7s. 6d.; for the Continent at 7s. 3d.@8s.; and from Baltimore for Cork and orders, 7s.@7s. 3d., and from Philadelphia at 7s.@7s. 3d. per quarter. Refined Petroleum hence for Cork and orders, 5s.@5s. 6d.; for the Continent, 4s. 3d.@5s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

*New York.*—Kansas Pacific R. R., 4; Wabash Pur. Com. Receipts, 17⅝; Missouri, Kansas and Texas R. R., 7; do. 6s, S. F. assented, 58¼; New Jersey Southern R. R., ½; Second Avenue R. R., 70; Canada Southern 1st mort., reg., 56½; do. coupon on, 61⅛; Buffalo, New York and Erie Reowal bonds, 1916, 107⅛; Cedar Falls and Minnesota 1st mort., 81½; Hannibal and Central Mo. 1st mort., 85; Pacific of Mo. 1st mort. Carondelet Branch, 70; Chesapeake and Ohio 1st mort., coupon on, 23; Louisiana and Missouri 1st mort., 85; South Pacific R. R. 1st mort., 77; Boston, Hartford and Erie 7s, guar., 13¼; Ontario Silver Mining, 22⅜; N. Y. Gas Co., 129; Missouri 6s, fund., 107; do. long bonds, 106⅜; Tennessee 6s, new, 43; do. new series, 43; Louisiana 7s, consol., 81⅜; Missouri 6s, H. and St. J. issue 1887, 106¼; North Carolina 6s, old, Jan. and July, 18; South Carolina 6s, new, Apl. and Oct., 32. The latest quotations are: Adams Exp., 96@97; American Exp., 52⅛@53¼; Atlantic and Pacific Telegraph, 20@—; Central Railroad of New Jersey, 17½@18½; Chicago, Burlington and Quincy, 101⅜@—; Chicago and Alton, 85¼@—; do. pref., 103⅛@—; Chicago and Northwestern, 40@40⅛; do. pref., 66¼@66½; Chicago, Milwaukee and St. Paul, 40⅛@40¼; do. pref., 71¼@71⅜; Chicago, Rock Island and Pacific, 101¾@—; Cleveland, Columbus, Cincinnati and Indianapolis, 42@—; Cleveland and Pittsburg, 82@82½; Columbus, Chicago and Indiana Central, 4⅞@5; Delaware and Hudson Canal, 43¼@44; Delaware, Lackawanna and Western, 49¼@49⅜; Erie, 12⅛@12¼; do. pref., 21@—; Hannibal and St. Joseph 12¼@12⅞; do. pref., 25⅛@29¼; Illinois Central, 74⅝@75; Lake Shore and Michigan Southern, 66¾@66⅞; Michigan Central, 59⅞@60; Morris and Essex, 74¼@74¾; N. Y. Central and Hudson River, 103¼@103⅛; New York and Harlem, 142@142; Ohio and Miss., 9@9⅛; Pacific Mail, 22⅝@22¾; Panama, 115@120; Pittsburg, Ft. Wayne and Chicago, 92@92½; Quicksilver, 21⅝@22; do. pref., 38@38¼; St. Louis, Iron Mountain, and Southern, 6⅜@—; St. Louis, Kansas City, and Northern 6@—; do. pref., 26⅜@—; Union Pacific 67@67⅛; U. S. Express, 48@49; Wells-Fargo Express, 83@84; Western Union Telegraph, 79¾@79⅞; Wabash, 17@17⅛.

# FISK & HATCH,

**Bankers,**

No. 5 NASSAU ST., NEW YORK.

U. S. GOVERNMENT BONDS bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

### New York Bridge Co.

At a meeting of the Trustees, held on the 1st inst., the Executive Committee reported in favor of advertising for bids to furnish galvanized Bessemer steel wire for the suspenders. A communication from the Engineer of the bridge was read, in which it was stated that Bessemer steel wire could be procured for $8,000 less than the crucible or cast steel. The specifications presented for the action of the Trustees stated that the bids, which must be presented before Nov. 1, should be for 70,000 lineal feet of wire rope, to be made of Bessemer steel, galvanized; 50,000 feet of the rope to have a diameter of one end five-eighths inches, a weight of four and one half pounds per lineal foot, a breaking strength of not less than 180,000 pounds, and to be composed of seven strands of seven wires each. It is also specified that 20,000 feet of the rope must have a diameter of one and three-fourths inches, a weight of five pounds per lineal foot, a breaking strength of not less than 200,000 pounds, and be composed of seven strands of 12 wires each. The ultimate strength of the wire rope must be 150,000 pounds per square inch of full section, and the rope must be capable of being bent around a rod of three times its diameter without fracture. Other details as to the manner of the making of the wire ropes were also specified. A discussion arose as to the comparative merits of iron, Bessemer steel, and cast or crucible steel wires, and the matter was again referred to the Executive Committee for its further consideration.

### Pittsburg and Lake Erie Railroad.

The contract awarded to Mr. McGrann of Lancaster, Penn., is for the construction of the entire line between this city and Youngstown including the bridge over the Ohio river at Phillipsburg, but not including the bridge across the Monongahela at the Pittsburgh end of the route, where it is to connect with the Baltimore and Ohio Railroad. The length of the road is 68 miles, and the contract calls for 10 per cent. additional roadway for sidings at such points as may be determined upon. The contractor is required to put the road in complete order, including the grading, cross ties, steel rails, turn table at each end of the road, and bridges wherever required, the latter all to be built of iron. The roadway is to be completely ballasted for its entire length with stone or cinder, and the work is to be completed within twelve months from the date of the contract. The total cost is to be $2,500,000, of which $1 050,000 is to be paid in cash, the contractor taking first mortgage bonds of the road to the the amount of $1,250,000 and $200,000 in stock of the company, this being the amount of stock remaining unsubscribed. C. H. Andrews of Youngstown, John Reeves of Beaver Falls, and John F. Dravo of Pittsburgh, have been appointed an Executive Committee with full power, authorized and directed to proceed immediately to cause a final survey and location of the line of the railroad to be made between the terminal points named in the certificate of incorporation, and to proceed as soon as the same shall be done to procure the necessary right of way.—*Pittsburg Chron.*

### Erie Railway.

The receiver of the Erie Railway Company has filed his report for the month of July. The main items of his receipts are: from freights, $951,883 40; from passengers, $321,145 27; from mails, $50,010 64. His accounts shows that he paid during the month $50,000 of temporary loans; $28,566 89 on account of the coal property which was bought by the Erie Railway Company, and $69,407 61 of his receiver's certificates. On June 30th the outstanding receiver's certificates of debt amounted to $2,000,513; on July 31st they were $1,931,106. On the other side, he has reduced his cash balance from $356,965 to $245,746, a reduction of $121,219, part of which is said to arise from a mistake in the previous months's accounts.

☞ The last in Wall Street is the new method of buying and selling stocks as small as 5 shares introduced by John Hickling, 72 Broadway and 21 New St., N. Y., whose premises are well adapted as an Exchange for doing business. His patrons speak of him in the highest terms for integrity, and there is no other place that offers the same advantages to visitors to the city who may wish to become posted on stocks, and who also wish to invest small amounts of money.

☞ Mr. Conrad Poppenhusen has entered judgment against the Southern Railroad Company of Long Island for $374,307 48 for money loaned, with interest, and against the Flushing, North Shore and Central Railroad Company for $410,190 46, also for money loaned.

☞ The earnings of the Philadelphia and Erie Railroad for the month of August, 1877, were $292,390 39, the expenses $180,307 37, and the net earnings $112,083 02. For the month of August, 1876, the net earnings were $80,698 46—showing an increase of $31,384 56.

## BOOKS AND MAGAZINES.

**A practical treatise on Water Supply Engineering, relating to the Hydrology, Hydrodynamics, and Practical Construction of Water-Works in North America, with numerous tables and illustrations. By John T. Fanning, Civil Engineer. D. Van Nostrand, New York. 1877.**

This is an American book, and a valuable one. We have, as compared with the British Islands, less rain fall, more unequally distributed, hotter sunshine, more evaporation, less people, less contamination, looser soil and habits of sprinkling streets, flowing water in stables and factories, and generally consume far more water per head. And we have less wealth, no surplus labor, and a habit of staking our property and our lives on cheap constructions.

Unlike the rude wagon tracks on the "divides" in a newly settled country where rivers are avoided to save the expense of ferries and bridges, our lines of railways usually and almost necessarily lie along the river courses. Frequently the main streams are crossed and recrossed many times. Such spannings of the water courses are the portions of our roads most liable to destruction by the fitful fury of the elements.

Except occasional fugitive descriptions of isolated examples, Americans have had no hydraulic literature. We have heretofore been accustomed, of necessity, to study Eytelwein, DuBuat, and Poncelet, published a century ago, profound and abstruse treatises, and the writings of D'Aubuisson, Weisbach, and other European professors for the more practical elucidations. Our author, American born, and with a successful American experience, has presented an apparently exhaustive canvass of the theories of hydrodynamics and their applications to hydraulic constructions, under the widely differing conditions found on this continent.

The water powers at Manchester, Lowell and Lawrence, on the Merrimack; at Lewiston on the Androscoggin; at Holyoke on the Connecticut, and at Cohoes on the Mohawk; the conduits of the Croton Aqueduct, New York; Potomac Aqueduct, Washington; Gunpowder Creek Aqueduct, Baltimore; and Sudbury River Aqueduct, Boston, are not surpassed in magnitude in Europe. Nearly two hundred million dollars have been expended in simply providing American cities with water. There is reason to believe that costly errors have marred our plans. New conditions have been met in each new example, and much has, necessarily, been experimental.

Col. Fanning in this treatise has undertaken both to discuss elementary principles and to set forth guiding precepts for different local circumstances. Railroad engineers and officials, who from the title may not expect to find much of value in their special department, will be happily disappointed to discover that it is not merely a technical treatise for hydraulicians, but the fruits of extensive scientific research in matter of interest to them, exemplified in popular method.

The author makes no professions of great discoveries. We have not discovered that the work advocates any novel theories, but this is more a merit than a fault. The work, over 600 pages large octavo illustrated, is a contribution of rare value to American engineering and literature.

Eastern railway officials will remember that it was Col. Fanning, who, as Consulting Engineer of the New London Northern R. R. Co., had general charge of the construction, a few years since, of the immense masonry wharf pier at New London, for the terminal use of the Central Vermont Railroad Co., the largest granite work of its class that has been constructed by private enterprise on the American coast. His extended and varied experience in the construction of water powers and public water supplies in New England, is a guarantee that what he may say will not be mere theorizing or at variance with sound constructive principles.

The work is in three sections.

Information required by builders and road masters to protect the roads and to proportion the water ways at these points, and at culverts, is given in the first section; collection and storage, where questions of rainfall, flow of streams, and floods, are discussed in minute detail, and where information drawn from a mass of statistics is condensed and tabulated so as to be readily understood by and useful to non-professional readers forms the second section. The third section relating to the construction of works, contains valuable information for the proportioning of embankment walls, bridge abutments, coal-shed walls, and other masonry structures. The mathematical theories of such structures are developed, and the results appear to be so plainly expressed that safe proportions, in ordinary and even extraordinary cases, may be read off and applied by any good mechanic. The principles of construction of masonry wharves and piers, such as many railroads require at terminal stations, are also laid down.

Much information is given of value in the selection of water supplies for watering stations, not only as respects the qualities, and nature of impurities of water derived from different geological formations, but also what is often of the first importance in Railroad work, the total quantity of water that may be obtained from small water-sheds and from small streams.

The following extract refers, we understand, to the water supply of Norwich, Connecticut.

"TREACHEROUS STRATA.—In one instance the writer had occasion to construct a low embankment, not exceeding twenty feet in height at the centre, across an abraded cut through a plain. The embankment was to retain a storage of water for a city water supply, and the enclosed lake was to have an area of 200 acres.

The test pits and soundings developed the fact that the abraded valley and adjacent plains were underlaid with a stratum of fine sand twelve feet in thickness, which, when disturbed, became a quicksand, and if water was admitted to it, would flow almost as freely as water.

The sand lay in a compact mass, and would not pass water freely until disturbed. Above the sand was a layer of about three feet of fine hard sand, and above this about three feet of good meadow soil had formed.

For this case the decision was, not to uncover the quicksand, but to seal it over in the vicinity of the embankment. The foundation of the embankment, and of the waste over-fall which necessarily came in the centre of length of the embankment was made of concrete of such thickness as to properly distribute the weight of the earth work and over-fall masonry. Above the embankment, after a careful cleaning of the soil to the depth penetrated by the grass roots, the valley was covered with a layer of gravel and clay puddle for a distance of one hundred feet.

Beneath the toe of the inside slope, where the bottom puddle joined the concrete foundation, a trench was cut across the valley into the quicksand, as deep as could be excavated in sections, with the aid of the light pumping power on hand, and sheet piling placed therein and driven through the quicksand, and then the trench was filled around the piling with puddle, this forming a puddle and plank curtain under inside edge of the embankments.

Such expedients are never entirely free from risks, especially if a faithful and competent inspector is not retained constantly on the work to observe that orders are obeyed in the minutest detail.

In the case in question many thousands of dollars were saved, and the work has at present writing successfully stood the test of seven years use, during which time the most fearful flood storm recorded in the present century has swept over the section of Connecticut where the storage lake is situated."

The book should be in the libraries of Manufacturers, Railroad Men and Users of Water generally.

**Practical Hints on the Selection and use of the Microscope. Intended for beginners. By Prof. John Phin, Editor of "The American Journal of Microscopy." Second Edition. Fully Illustrated and greatly enlarged. New York. The Industrial Publication Company. 1877. Price, 75 cents.**

There are thousands of microscopes throughout the country in the hands of those who know little of the principles on which they are constructed and who do not know how to use them properly. Again there are students in possession of fine and costly microscopes who are frequently at a loss how to prosecute their studies in microscopy with profit to themselves. They meet with difficulties in adjusting their instruments, in preparing, mounting and examining objects. To these and even to experts in microscopy, this work will prove of valuable assistance, coming as it does from an author experienced and highly learned in microscopical science, and who possesses that rare gift of presenting things difficult to be understood by the uninitiated in a simple, plain and comprehensive manner. The fine instruments constructed by Cronch, and Ross & Co., London, Wale of Paterson, N. J., Bausch & Lomb Optical Company of New York, &c., are finally illustrated and explained. The whole work is so thoroughly practical and instructive, that we are sure it will be welcomed and valued by microscopical societies and all those desirous of increasing their knowledge of natural science.

**The Field Practice of laying out Circular Curves for Railroads. By John C. Trautwine, Civil Engineer. Ninth Edition. Revised and Enlarged. Philadelphia: Claxton, Remsen & Haffelfinger, Nos. 624, 626 and 628 Market Street, 1874. Price $2 00.**

A useful little manual in pocket book form for civil engineers.

☞ The Louisville, Cincinnati and Lexington Railroad, extending from Mount Sterling to Cincinnati, via Louisville, was sold on the 1st inst by order of Chancellor Bruce. A syndicate, representing the second mortgage bondholders and floating creditors, purchased the line for $781,-000, subject to three mortgages—one in favor of the city of Louisville for $100,000; another in favor of Guthrie Knight and the Bowles heirs for $700,000, and the third in favor of Norvin Green and others amounting to $3,000,000.

☞ The report of the receiver of the Ohio and Mississippi Railroad Company shows receipts during August of $429,652 37, and disbursements $359,104 62; excess of receipts $70 547 75. The cash balance on hand 1st of September was $100,-953 85.

### Statement of the Public Debt of the United States, October 1, 1877.

DEBT BEARING COIN INTEREST.

| | Amount Outstanding. | Accrued Interest. |
|---|---|---|
| 5 per cent. bonds, 1858 | $200,000 00 | $3,250 00 |

| Western Pacific bonds, 1862-4 | 1,970,560 00 | 29,558 40 |
| Sioux City and Pacific bonds, 1862-64 | 1,623,320 00 | 24,424 80 |
| Totals | $64,623,512 00 | $969,352 68 |

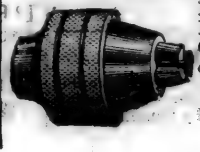
Interest paid by United States, $35,857,629 14; interest repaid by transportation of mails, &c., $8,750,652 07; balance of interest paid by United States, $27,206,977 07.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 29, 1877.

JOHN SHERMAN,
Secretary of the Treasury.

☞ The Pennsylvania Railroad Company paid the last coupon on the 7 per cent million loan of the Sunbury and Erie Railroad Company on the 1st inst., and renewed the loan for twenty years at the same rate of interest.

☞ Regular trains are now running between Jackson and Waverly, Ohio, on Hon. James Emmitt's Narrow Gauge railroad.



# ÆTNA GRATE.

A SIMPLE, DURABLE AND SUCCESSFUL SHAKING GRATE. Saves Fuel, Bars and Labor. Prices reasonable.

For particulars, illustrated circular and references, address

ALFRED J. WOLF, Manufacturer,
120 Wall Street, New York.

# THE ALMOND CHUCK

Is the BEST, most Elegant and Durable, simple and cheapest Chuck in the market. Thoroughly well made.

All Steel. Price $3.

T. R. ALMOND,
84 Pearl St., Brooklyn, N. Y.

# BABCOCK & WILCOX

## PATENT

## Tubulous Steam Boiler.

Best Wrought-Iron Lap-Welded Boiler Tubes, Expanded into Cast-Steel Up-Takes.

**No Bolted or Packed Joints.**

ALL CONNECTIONS MADE BY EXPANDING TUBES INTO BORED HOLES.

Centennial Exposition Medal awarded this Boiler for highest Economy and Efficiency on Test.

Illustrated Circulars, and other desired information, promptly furnished.

BABCOCK & WILCOX, Engineers,
No. 30 Cortlandt St., New York.

## Proportional Parallel Rule,

T Square and Protractor Combined.

FOR ARCHITECTURAL AND MECHANICAL draughtsmen, surveyors, engravers, students in industrial drawing and art studies. Engineers and draughtsmen approve of it, and consider it the best instrument for the purpose ever invented. Can be seen at the office of the inventor, patentee and manufacturers, W. GARDMAN & SON, who construct and repair engineering and astronomical instruments, etc.
112 John Street, New York.

Send for illustrated circular.

Is now on exhibition at the Fair of the American Institute, Depart. I, Group 7.

TO GAS CONSUMERS.

WEST & CANNON,
40 Cortlandt St., New York.

**The New York Academy of the Useful Arts**

This is the new title given to the association formerly known as the New York Society of Practical Engineering. It is proposed to hold weekly meetings on Tuesday evenings, in Room 24, Cooper Union, in this city. On Tuesday evening, Oct. 2nd, Gen. Dahlgren read an essay on the Levees of the Mississippi, and in future there will be papers on processes, improvements and applied science read by professional and scientific men on every Tuesday evening during the ensuing season. The subjects will be open for discussion, and those interested in the association and its work are invited to attend.

## The Alden Crusher.

New in Principle, Simple in Construction, Economical in Use of Power, and of Remarkable Efficiency.

**FOR BREAKING STONE FOR BALLASTING RAILROADS, McAdamizing Streets,**

AND FOR

CRUSHING AND PULVERIZING ORES OF ALL KINDS,

**NO LOST MOTION, ADJUSTABLE, DURABLE, PORTABLE.**

SEND FOR ILLUSTRATED CIRCULAR.

**COPELAND, DODGE & CO.,**
**206 Broadway, N. Y.**

## EDWIN H. BROWN,

**7 Warren Street, New York,**

**Solicitor U. S. & Foreign Trade Marks & Patents.**

Make a note of the time when you first think of an invention, date and keep all writings, sketches, drawings and models of it. It will be well to have persons sign the former as witnesses, and this may be done without exhibiting the contents. To establish title to your invention, even after obtaining a patent, you may have to prove that you made it before any one else, and never gave it up.

## Engineers' and Surveyors' Instruments.

*Medal awarded*—Exhibition of all Nations, New York, 1853, for best Drawing Instruments. Particular mention for Limb Protractors.

*Medal awarded* — International Exhibition, Philadelphia, 1876, for Surveying and Leveling Instruments

**JAMES PRENTICE,**
**164 Broadway, N. Y.**

**Rider Compression Pumps,**

For supplying R. R. tanks with water. Can be run by any ignorant trackman or baggage master. Uses no steam, has no valves to get out of repair. *We guarantee our 10 inch engine to pump water for one half cent per 1000 gallons.* Write for circulars and information.

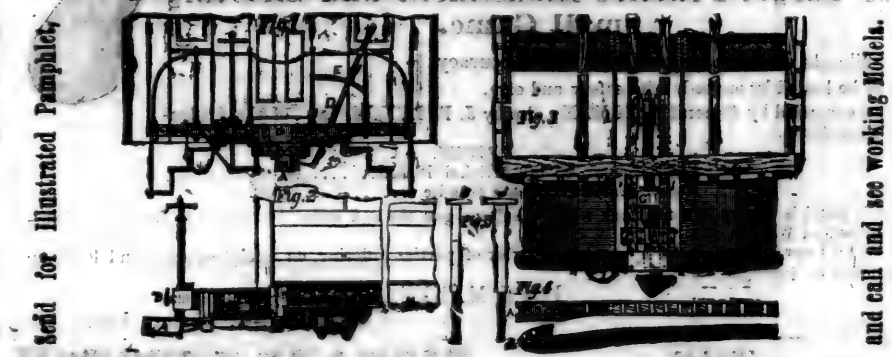
Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

### The Coal Trade.

For the week ending the 22d ultimo, the total tonnage, as reported by the several carrying companies, amounted to 364,016 tons, against 507,860 tons in corresponding week last year, a decrease of 143,854 tons. The total amount of anthracite mined for the coal year is 13,994,350 tons, against 12,065,976 for same period last year, an increase of 1,928,374 tons. The quantity of bituminous coal sent to market for the week amounted to 84,053 tons, against 69,402 tons in corresponding week last year, an increase of 14 631 tons. The total amount of anthracite mined for the year is 2,269, 744 tons, against 2,520,750 tons for corresponding period last year, a decrease of 251,006 tons. The total tonnage of all kinds of coal for the week is 448,069 tons, against 577,262 tons in corresponding week last year, a decrease of 129,223 tons. The total tonnage of all kinds of coal for the coal year is 16,264,044 tons, against 14,586,726 to same date last year, an increase of 1,677,868 tons. The receipts at Perth Amboy for the week ending on the 22d ultimo were 41,144 tons, the shipments 39,269 tons, leaving a stock on hand of 62,579 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of September was 114,751 tons, of which 99 457 tons were coal, and 15,294 tons coke. The total carried for the year is 3,271,059 tons, of which 2-623,902 tons were coal and 595,282 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Oct.* 1.



A BOOK FOR
**Engineers & Machinists**
AND
**MECHANICS.**
THE COMPLETE PRACTICAL MACHINIST by JOSHUA ROSE. Price, $2 50. Address JOSHUA ROSE, P. O. Box, 5546, New York City.

**Steam Office Watchman!!**

THIS GAUGE IS USED IN HOTELS, STEAMERS, Manufactories, Breweries, etc.
The Inventors of this combined "Pressure Gauge" and "High-Pressure Alarm" have, after many years of persistent effort and at great expense, succeeded in perfecting a reliable and accurate instrument for measuring either air, steam or water, when subjected to pressure, and for denoting the same by an automatically written tracing upon Edson's Patent Logs or "Charts." No manufacturer or steam user can afford to be without them. Circulars sent on application to
**M. B. EDSON, 91 Liberty St., N. Y.**

### Education of Engineers.

No one can look back to the state of civil and mechanical engineering fifty years ago, and compare it with the present state, without perceiving a great and encouraging progress; yet at the same time the comparison will force the conviction that this progress is but a beginning, and that another age is required to bring it to what it should be; and many ages will be required, if we flatter ourselves that we have got beyond the need of improvement, and fail to criticise our works with honest rigor.

Fifty years ago the leading mechanical engineers passed from common schools into blacksmiths' shops, as apprentices, at the age of fourteen and worked up to be foremen and proprietors. Some of them had not even the benefit of common schools; and could not write or speak grammatically, or "cipher" beyond the rule of three, or even so far. As for ability to calculate the strains on the parts of a bridge or machine, and provide for them by exactly sufficient strength, they ridiculed the idea of such operations; and held that "one practical man, by his eye, could tell better than a dozen theorists how much stuff to put into a beam, or column, or shaft, or connecting rod, or any other part." Their work was laid out by the judgment of mere sense, aided by recollection of other work of the kind; they moved their thumbs along their measuring rules, and when they judged that they had settled upon about the right length, they looked at the figures, and took the nearest $\frac{1}{4}$ inch to the mark thus found. And this they did throughout their lives.

But as machine tools came into use, and new fashioned works had to be executed, some of great magnitude, there was a demand for "calculations;" and mathematicians were called upon as assistants. Also the assistance of draughtsmen was recognized as necessary; and in time it was discovered, or at least suspected, that the head-work of engineering was the main part of it; and that those who began by a study of mathematics and physics were better directors of work than those who began as apprentices in shops. In some cases those who began as apprentices afterwards went through proper courses in colleges and engineering schools; but these cases have been unfrequent, and it is doubted whether the apprenticeship *before* a good groundwork of theory is of nearly so much use as *after* it. To a mere workman the apprenticeship first is best, since he is to be a good fitter, and accurate and expeditious in execution, and to devote his intellectual faculties to excellences of execution; but to a designer of work the first consideration is fitness of adaptation, and the next is strength with economy.

We have in this country academies, colleges, universities, public schools, besides institutes of technology, polytechnic schools and institutes where both the theory and practice of engineering can be studied, therefore there are facilities open to all for acquiring education. Institutes like the Massachusetts Institute of Technology, Columbia College, the Worcester Technical and Stevens Institutes offer unprecedented facilities and advantages for studying engineering and the sciences in a thorough manner. The advantages thus available to students have never been surpassed, they are a great advance in the means for acquiring a practical education in civil and mechanical engineering. But we need many more such Institutes as the Worcester Technical Institute where the students graduate if they choose from the machine shop, and where drawing, mathematics and practical workmanship in pattern making and the construction of machinery, civil engineering, surveying, etc., are taught by competent and practical instructors. We need evening schools for instruction in practical science in all our cities and manufacturing districts, and we feel confident that if properly managed our young mechanics and engineers would appreciate them.

In a social sense, it will not be questioned that the men who begin by a good education will have an advantage over those who do not possess one. The "learned professions" are esteemed not so much for their profits, which are frequently less than those attainable in trades, as for the mental condition usually found in them. A few great fortunes may be made in them; but so it is in engineering: the man who directs the construction of a railroad and its equipment at a cost of forty millions may, by his superior learning and talent, save a large percentage which an ignorant practician of equal genius, or natural capacity, might waste by his insecure foundations, his provisional plans, his overloaded structures, and his break-downs. A great work that involves immense outlay at first, and yearly outlay for maintenance, may be made one per cent more

profitable by the best engineer than by the second best; and out of this one per cent a liberal amount may be paid for his superior abilities. And this principle applies in every workshop in which there is or should be some effort to keep up with the growth of the world. Now the meaning of education is, that what all the best men have done before us should be known and compared, prevent us from beginning behind the age, and help us to make further progress. In the education of engineers, it is necessary for success that theory and practice should both receive their share of study and attention. The mere theorist is scarcely as valuable in the promotion of progressive engineering science as the illiterate but expert practician.

### Boston, Hoosac Tunnel and Western Railway.

An organization of this company having been effected under the general laws of New York, and their plans and location having been filed, the directors held a meeting at Troy on the 2d inst. for the purpose of organization, and to authorize the immediate commencement of work under the charter. Hon. John B. Alley presided at the meeting and Mr. A. A. Gaddis was Secretary.

The officers chosen are: Gen. William L. Burt, President; Hon. John B. Alley, Vice President; Dr. Estes Howe, Treasurer; Theodore Voorhees, Secretary, and F. M. Jones of New York, Chief Engineer. Messrs. Burt, Alley and F. L. Ames were constituted the Executive Committee.

The Executive Committee were instructed to commence at once the construction of a line from Mechanicsville to Eagle Bridge, a distance of 22 miles, about 12 miles of which are already graded, being a portion of the old Albany and Vermont road-bed. There will be no grade on the route of over 26 feet to the mile. They were also directed to construct an iron bridge across the Hudson river at Mechanicsville, and the road is to be laid with steel rails. They were also authorized to make connections for the purpose of traffic with the Delaware and Hudson, Erie, Fitchburg, Boston, Barre and Gardner, and Boston, Clinton and Fitchburg railroads.

The Delaware and Hudson Company will at once construct a line from Mechanicsville to Schenectady, a distance of about fifteen miles, which will require the actual construction, however, of only about seven miles of road. The Erie Railway Company will also at once lay its third rail between Waverly and Binghamton, making standard gauge from Buffalo to Boston over this route. It is the hope of the Directors to complete this line by the 1st of January next. A conference is to be held with the manager of the Troy and Boston Railroad relative to the use of a portion of that road in the line. If this cannot be effected it is proposed to build a new track from Eagle Bridge to connect with State road at the Massachusetts line, a distance of about sixteen miles. The Directors speak in the most confident terms of the success of the enterprise.

### Progress of Railroad Construction.

Mr. B. J. McGrath, the contractor for the construction of the Pittsburgh and Lake Erie Railroad, announces that the profiles, plans, &c., are now on exhibition at Rochester, Penn., and will remain open for the benefit of sub-contractors until the 16th inst.

The contractors of the Pittsburgh, Wheeling and Kentucky Railroad expect soon to have the ties and rails laid to Wellsburg. They are now erecting trestle work, for a distance of about one hundred yards, at Cross creek bridge. This will be the only trestle work along the line.

Twenty-two miles of track have now been laid on the Waynesburg and Washington Narrow Gauge Railroad, leaving six miles yet to be laid.

It is stated that the Nashua and Peterboro' Railroad is to be immediately extended from its present terminus at Greenfield to Bennington, Vt., there to make connection with the Hillsboro' route now building.

The tracklayers on the Scioto Valley Railroad had reached Waverly, Ohio, on the 8th inst.

The Lehigh and Lackawanna Railroad will be extended to Wind Gap, Pa., ten miles from its present terminus.

The first sod on the Nictaux and Atlantic Railway was turned at Bridgewater, N. S., on the 5th inst.

The latest railroad project in Vermont is the Hardwick and Marshfield Railroad—to connect the Montpelier and Wells River and Portland and Ogdensburg railroads at the first named village.

A Boston capitalist is to build a railroad from Guaymas to Hermosillo as soon as the Mexican Congress approves the concession granted by President Diaz.

Prodigious quantities of railway ties are piled up at Wilmington, Cal., to be used in the extension of the Southern Pacific Railroad through Arizona.

The Akron and Ogden furnaces will be put in blast on the first of November, at which time the Monday Creek branch of the Columbus and Hocking valley will be ready for operations.

### Lowell and Lawrence Railroad.

A special meeting of the stockholders of the Lowell and Lawrence Railroad Company was held in Lowell, Mass., on the 5th inst. W. E. Livingstone presided. F. H. Nourse, clerk, read the proposed lease of the road to the Boston and Lowell Railroad Co., which is to take effect at the expiration of the present lease, October 1, 1878, and run 25 years for the consideration of five per cent. interest on the stock, six per cent. interest on all debts and bonds and one per cent. additional from earnings as a sinking fund to liquidate the bonds. H. Hosford, Manager of the Boston and Lowell Railroad and Director in the Lowell and Lawrence, made explanations. Col. John H. George moved that the lease be ratified and confirmed. A stock vote was taken when 1225 votes representing 1683 shares were declared in favor, being all that were cast. The following votes offered by Col. George were similarly adopted: 1st, that the bonds authorized to be issued by vote of the stockholders at the annual meeting, held Jan. 1, 1877, be mortgage bonds, and that the directors be authorized to execute a mortgage of the franchise and property of this corporation such persons as trustees as the directors shall by vote determine upon for the purpose of securing the payment of said bonds and all existing debts and liabilities of this corporation. Second, that the directors be authorized to purchase of the Essex company such lands in Lawrence as they deem necessary for terminal facilities and execute a mortgage as security for the purchase money in whole or part. It was stated by Mr. Hosford that this land could be bought on terms of one-quarter cash, balance on mortgage at 6 per cent. The bonds referred to in the first motion are for the sum of $200,000 to extend the line in Lawrence.

### Machinery and Mining.

The cars recently constructed at the Ranlet Factory at Laconia, N. H., for the Billerica and Bedford (Mass.) Narrow Gauge Railroad are five in number, and comprise one passenger, one baggage and two observation cars, and one passenger car with a baggage compartment. They are equipped with Air Brakes and the Miller Platform and Buffer. The observation cars are similar to the open horse cars in ordinary use on our street railroads. The passenger cars will accommodate 30 persons. The seats, holding one passenger each, are arranged as in ordinary cars. The passenger car is 40 feet in length, weighs 4½ tons, and cost $2,000. The whole number of cars belonging to the road is 11. The engines, two in number, weigh 12 tons each.

The Brooks Locomotive Works, Dunkirk, N. Y., have sold to the Chicago, Milwaukee and St. Paul Railway Company two 16×24 and two 17×24 locomotives.

The Portland Company have been at work changing the gauge of the engines for the five railroads in that section which have just been reduced from the broad to the standard gauge. They now employ about 300 hands.

The Pittsburgh Locomotive Works is turning out two oil engines per day, giving employment in this and the locomotive department to two hundred men.

Two noiseless street locomotives have been placed upon the Fort Point branch of the Sutter Street (San Francisco) Railroad.

The Sacramento Record-Union says that the machinery at the railroad shops has had another novelty added to it in S. G. Reed's patent tire-heater. Instead of having to build a bonfire around locomotive driving wheels, to expand the tire in order to release it, they now bring this machine—a circle of gas jets, fifty-six in number, arranged to fit tires of any size—to the driving wheel, light the gas, and it does the job without further trouble.

One of the largest manufacturing firms in Worcester, Mass., which six months ago had no trade with the Southern States, now reports its best trade and promptest payments from that section.

Only six mines on Comstock lode are now yielding ore: they are the Ophir, California, Consolidated Virginia, Chollar, Belcher and Justice, and their aggregate weekly yield is 12,000 tons.

The Kittanning Coal Company, of Pennsylvania,

is arranging to ship to South America direct, via the Ohio and Mississippi rivers. It is thought it can be done at a profit.

The shipments of coal from Cumberland, Md., for the week ended September 29, amounted to 43,227 tons. Total shipments for the year 1,105,691 tons.

Twenty-seven gold and silver mines in Nevada, California, Utah and Arizona have yielded for the month of August $4,377,100. The aggregate yield by the same mines (from fifteen mines in January to twenty-nine in August) for the eight months ending with 31st August was $30,251,800.

### Billerica and Bedford Railroad.

At a meeting of the stockholders of the Billerica and Bedford (narrow gauge) Railroad Company, held at Billerica, Mass., on the 4th inst., the Treasurer, Wm. A. Hayes, reported that $39,750 of the $50,000 capital stock subscribed had been paid in, leaving $10,250 still due. The unpaid bills amounted to $15,040 99. The engineer, H. W. Blaisdell, stated that some four and a half miles of the line were wholly or partially graded, and that in his opinion it would require some $2500 more to complete the line. This together with some land damages, etc., left an amount to be provided for of some $19,540, and only about $10,000, represented by unpaid subscriptions, to meet it. George E. Mansfield, the projector of the road, and present manager, said the materials for the road had cost less than the estimates, but the construction was more expensive than was expected, so that the cost of the road will be $60,000 instead of $50,000. After discussion it was voted to issue mortgage bonds (in denominations of $100, $500, and $1000) to the extent of $20,000, if required, on which not more than six per cent interest is to be paid.

### Erie Railway.

The earnings of the Erie Railway Company for the month of July, 1877, were $1,041,205, the expenses $869,888, and the net earnings $171,317; for the month of July, 1876, the earnings were $1,192,980, the expenses $888,519, and the net earnings $304,461—showing a decrease in gross earnings of $151,775, a decrease in expenses of $18,631, and a decrease in net earnings of $133,144. The net earnings for the ten months past of the financial year exceed those of the same period in the former year by $388,948. The traffic for July of the present year was interrupted by strikes.

### New York and New England Railroad.

It is understood that the New York and New England Railroad Company made a proposition to the Legislative Committee to consider what disposition should be made of the State property in that road to the effect that the State should loan $6,000,000, the Company giving as security $9,000,000 of the $10,000,000 bottom mortgage bonds, and also agree to pay 5 per cent. interest on the $6,000,000 to be loaned, and 5 per cent. interest on $3,600,000—the amount originally loaned to the Company by the State. For this latter amount the State took Berdell bonds. These bonds have since been converted into stock, and the pledge to pay the interest on this amount—which, of course, the company is not bound to pay until the full interest on the bonds is paid—was the inducement held out to the committee to recommend the loan. The interest on these two sums at 5 per cent. would amount to $480,000 per year. The Railroad Commissioners, in their report upon this subject last winter, stated that the net income of the road was about $100,000 yearly. This income, it was supposed, would be increased when the company should purchase the Hartford, Providence and Fishkill Road, which they proposed to do with a part of this loan; and they proposed, also, to finish the road to the Hudson river. It seems, however, that the committee distrusted the capacity of the road to earn money enough to pay the interest. At any rate, whatever their reasons were, they have notified the company that they cannot recommend the proposed loan.

### Northern Pacific Railroad.

*To the Stockholders of the Northern Pacific Railroad Company:*

The directors submit the following report of the condition of the company and the results of its management during the year ending September 1, 1877.

A full history of the reorganization of the company was contained in the report of last year, a large edition of which was published and distributed among the stockholders. As reference may be had to that report for general information upon the foreclosure of the mortgage, and the steps by which the bondholders have come into possession, and of the general description and value of the property, this report will be confined mainly to the business and operations of the year:

#### OPERATIVE DEPARTMENT.

The road has been worked, during the past year, with marked success. Entire harmony has prevailed between the officers and employes of the company, and we have been happily exempt from the strikes and labor troubles that so many roads have experienced in the past season. The promise of increased business, which was indicated in the last report, has been realized, and we are enabled to make a very favorable exhibit of net results.

The gross earnings of the year are $965,828 87, and the expenses, $578,124 90, leaving a net balance of $392,698 47, or an increase of nearly 25 per cent. over last year.

Liberal outlays have been made to maintain the road and its equipment in first class condition, and the cost is included in the expense account above reported. The extra outlays of the year, for new ties, over and above the estimated average, per annum, have been about $25,000. This, and other expenditures from earnings, made necessary to meet the growing business, would fairly swell the net income to about $450,000.

It is believed that the road and its rolling stock bears favorable comparison with any other rail road west of Chicago.

Owing to the kind of wood originally used, and its simultaneous decay, more than an average number of new ties were required this season. About 250,000 have been laid during the past summer on the Eastern division. Better kinds of timber are now used, and it is expected that the new ties will wear at least two years longer than the old ones have done.

Extensive repairs and renewals have also been made on the bridges, it being the policy of the management to endeavor to maintain a perfectly safe and first-class road in every respect.

In the last report reference was made to the intention of the board to complete the snow fencing and other protection for the Dakota division, so as to comply with the request of the War Department, and keep the division open during the winter. It had previously been operated only in summer, because the amount of winter traffic did not warrant the required expenditure for protection.

We are gratified to be able to report that the traffic upon it paid running expenses during the winter, and, notwithstanding the occurrence of snow storms of unprecedented severity, our trains were delayed less than those of the New York Central road.

The sources of business from which the income of the Minnesota and Dakota divisions is derived continue to develop in a healthy manner, and our relations to connecting parties are well established.

A fleet of more than thirty steamboats has occupied the upper Missouri and Yellowstone rivers during the summer, connecting our Bismark terminus with Montana, and with the military and trading posts and the mining developments through that vast and attractive territory. Large quantities of merchandise and supplies are sent up these rivers, and, in return, furs and the products of the mines are brought down for shipment to the eastern states. The passenger traffic of the boats has also been large.

Bismark is within two hundred miles of Deadwood, the principal centre of the gold-mining region of the Black Hills. A first-class stage and transportation line has been established between the two places. The prairie road is an excellent one, and the Bismark route is now the favorite between the states and the hills, giving our line an extensive business.

On the Red river of the North, at Moorhead and Fargo, we connect with the growing business of the Canadian province of Manitoba and the large traffic of the Hudson Bay Company. Among other items of transportation, this year, more than three thousand emigrants have passed over our road and settled in the Red river valley.

The local growth and settlement on and adjacent to the line of the road, shows a steady and healthy advance, as detailed under the following heading:

#### LAND DEPARTMENT.

The land operations of the year are as follows:

| | |
|---|---|
| Land sales 270,996.60 acres, for | $1,217,484 49 |
| Deferred payments on contracts | 1,693 89 |
| Interest | 296 64 |
| Stumpage sales | 11,572 00 |
| Town lot sales | 1,804 68 |
| Total | $1,232,851 74 |

In payment of the above there has been received:

| | |
|---|---|
| Preferred stock | $1,219,062 17 |
| Deferred payment account | 33 33 |
| Cash | 13,756 24 |
| | $1,232,851 74 |

The amount of securities of the company retired during the year, by exchange for lands, foots up over $1,200,000.

The sales of Government lands within the limit of our grant have also been large. During the year ending June 1st, last, 337,000 acres were taken by actual settlers under the Pre-emption, Homestead, and Treecultur e acts, representing an added population of at least 10,000 people on these Government lands alone.

The abundant crops of this season from lands under cultivation on, and adjacent to, the line, have turned the attention of people in every part of the country to our road, and there are indications of an incoming emigration next season that will be much larger than in any previous year. The wheat crop of the year upon the line of the road in Minnesota and Dakota is estimated at 75,000 acres, yielding not less than twenty bushels to the acre, or an aggregate of a million and a half bushels, one-half of which may be expected to go forward this fall. It is also estimated that Manitoba will have a surplus of a quarter of a million of bushels this year to send to Duluth for shipment.

#### DIRECT CONNECTION WITH ST. PAUL.

Such of the eastern business of the road as is not transported by water to or from Duluth, passes through St. Paul by way of the St. Paul and Duluth (formerly the Lake Superior and Mississippi) Railway. A more direct connection has long been in contemplation, by way of the Mississippi River

valley to Brainerd. The St. Paul and Pacific Railroad Company, first division, have in operation 80 miles on this line, extending up to Sauk Rapids. The remaining 64 miles to Brainerd was principally graded in 1872, when the work was abandoned for the want of means. The distance from St. Paul to Brainerd by this line is 80 miles less than the route via the Duluth road. This saving in distance, for an important portion of the traffic of the road, together with other important considerations, rendered it for the interest of this company that the connection should be made at an early day, and the subject was submitted to your consideration at a special meeting of stockholders, held on the 9th of May last, when it was resolved—

First. That the stockholders deem it to be the interest of this company to promote and secure the building of a line of railroad from Sauk Rapids to Brainerd, a distance of about sixty miles, and approve, ratify, and confirm the action of the president and directors in subscribing to 501 shares of $100 each, being a majority of the stock of the Western Railroad Company of Minnesota, organized to build said road.

Second. That the directors are authorized, if necessary to secure such construction, to lease said road when completed, at a suitable rental, such as shall cover the interest on the securities issued to construct the same.

In pursuance of this authority the board proceeded to make agreements with the Western Rail road Company to secure the early completion of the road, and such progress has been made that the line will be opened for traffic within a few weeks.

The completion of this line, and of the extension on the Pacific division, adds 95 miles to the road in operation, making 650 miles to be operated by this company this fall.

EXTENSION OF THE ROAD INTO MONTANA.

At the special meeting of stockholders in May last the following preamble and resolution were adopted:

Whereas, It is the opinion of the stockholders that it is desirable to extend the company's line into the territory of Montana without unnecessary delay, therefore,

Resolved, That the directors be instructed to ascertain the cost of constructing the road from Bismark west into Montana territory, and to propose a plan for furnishing means for that purpose, and report the same to the stockholders at a future meeting for their consideration.

The unexpected delays in getting Congressional action upon the bill extending the time for completing the road, and the difficulty of making further explorations in the Sioux country during the past season, have prevented the completion of any plan to report at this time. The hoped-for early passage of our extension bill will afford an opportunity for immediate action, and we trust that it may be in time to secure the cutting of the necessary timber and ties during the coming winter. This proposed extension of the road will reach Bismark, on the Missouri, to the mouth of Glendive's creek, on the Yellowstone river, a distance of 205 miles. It has been surveyed, and was specially reported upon by W. Milnor Roberts, chief engineer, in 1874. He describes it as follows:

MISSOURI DIVISION—TWO HUNDRED AND FIVE MILES.

This passes from the Missouri river up the Sweet Brier branch of the Heart river, thence over the elevated, undulating prairies, on a nearly west course, to the Yellowstone, at the mouth of Glendive's creek, crossing on the route Little Missouri river, the only considerable stream to be crossed. The boundary between Dakota and Montana, longitude 140°, is about 160 miles west of the Missouri river.

The country of rolling prairie west of the Missouri rises very gradually to the dividing grounds between the waters of the Missouri and the Yellowstone, ascending from 1,640 feet above the sea at the Missouri crossing to 2,800 feet above the sea at the summit, showing an elevation of about 1,160 feet above the Missouri, and about 780 feet above the Yellowstone at Glendive's creek. The water at the mouth of Glendive's creek is 2,013 feet above the sea.

The work in general on these 205 miles is comparatively light, consisting almost entirely of earth-cuts and fills of moderate depth, excepting one very heavy cut in the vicinity of the crossing of the Little Missouri. There is no bridging of consequence after leaving the valley of Heart river; the streams can be passed with trestles of wood or iron. At some time it will be necessary to bridge the Missouri at Bismark. This will require a structure of magnitude.

The Missouri division is, on the whole, a very favorable line. Twenty-five miles west of the river, on the Sweet Brier branch of Heart river, good coal is found, and thenceforward all the way to the Yellowstone the country may be regarded as a large unexplored coal field, the outcroppings of coal being visible at numerous little tributaries on the route.

Mr. Roberts estimated that it would cost to construct this division at that time, $5,185,086, or about $25,000 per mile.

Estimating upon the basis of the present cost of material and labor, his figures might be safely reduced two-fifths, bringing the probable cost of the division down to about $3,000,000, or about $15,000 per mile.

PACIFIC DIVISION.

The extension of this division to the Puyallup coal fields, as proposed in the last annual report, and as more definitely considered at the special meeting of stockholders in May last, has progressed to near completion. The grading of the entire 31 miles is finished, about one-half the rails are laid, and the balance is now being delivered at the company's wharf at Tacoma. Within the next thirty days the road will be in operation.

Good progress has also been made in opening the mines, and the coal will be in readiness for immediate shipments. The coal proves to be of excellent quality, acknowledged to be superior to any other yet opened on the Pacific slope, is easily worked, and in abundant quantity. A ready and remunerative market is offered for all that can be mined.

The expectations on which this enterprise were based seem likely to be fully realized. A first-class road has been constructed, with no grade against the coal traffic, and at a cost within the original estimates.

The total expenditure to the present time, for the road, equipment, wharves, bunkers, and mining developments, is $472,081 03. It is estimated that the whole outlay, when completed, will foot up between $500,000 and $600,000, or an average of not over $20,000 per mile of equipped road, including development of mines and constructing wharves, bunkers, &c.

The money for this outlay has been raised as follows:

From the net earnings of the road, about $300,000, and the balance from temporary loans among the officers and friends of the company.

The enterprise promises such results that it is expected, with some further assistance from the Eastern division, to clear off these loans by net earnings within the coming year.

LAKE PEND D'OREILLE DIVISION.

A rapid agricultural settlement is now being made upon that portion of our unconstructed line, extending eastward from the Columbia river, at or near the confluence of the Snake river, through eastern Washington into Idaho, at Lake Pend D'Oreille, a distance of 200 miles. The high rolling plains of this region have, from the time of their first exploration, been considered wonders of pasture land, but the fact of their possessing also enormous grain-producing capacity has but been determined lately. The large immigration now pouring into the basin of the Columbia is almost exclusively aiming at this locality.

Reliable persons who have visited the region this season bring glowing reports of the heavy crops raised, and the inexhaustible capacity of the soil. The Rev. G. H. Atkinson, of Portland, in a late communication to the Oregonian, says: The upper country gives signs of becoming a vast area of grain fields. The stock ranges, rich in bunch grass, are fast changing into far richer fields of wheat, which check the hills and valleys like a carpet. It is a marvel that the high hills produce all the cereals as abundantly as the plains. Its solution is due to a two-fold fact. First, the soil of this whole interior of high prairies was once the bed of a system of lakes, as appears from the lectures of Professor Condon, and illustrated by many fossils of lacustrine and tropical life found embedded therein. * * * *

These high table lands, under the plow, exhibit the finest tilth, from one to twenty feet or more deep, and alike through the whole mass. Unlike the dark vegetable mold of the Mississippi basin, the soils of this Columbia basin are whiter and more highly charged with the alkalies and fixed acids. Western farmers are astonished that such whitish lands there, and in the Willamette valley, can produce the cereals; but they are more astonished to gather a harvest of 80 or 36 bushels of wheat per acre from these high tracts. It is also a surprise that the berry of all kinds of grain is so plump and large, and that the straw is so tall and strong. The wild rye grass of Yakima valley is like a withe for toughness. The bunch grass on the hill sides bends before the wind and springs back like a bow of steel. The willow and the poplar and other soft woods take on a kind of robust, oaklike strength. * * * * * *

The second fact which solves the problem of reclaiming this interior basin from mere pastures to farm lands, is that the invisible ocean of vapor, constantly borne inward from the Pacific, over these high plains, can be cooled and deposited in the form of dews, mists, and showers, so as to furnish all needed irrigation. The complaint was made for thirty years that they were practically deserts. It is only a few years since the plow has moved up the hillsides. Now fields of wheat, oats, barley, and rye wave luxuriantly by the side of dry bunch tracts, even on the higher ranges.

The plow proves to be the cooler. It opens the light, porous soil to the air, which enters it freely, and parts with its moisture to nourish the plants. The higher the hill the quicker the cooling process occurs in the still air, so that the night dews and mists water the plants there best every evening when the wind dies away.

Some persons have tried to explain the growth of grain on the upper plains by a sort of capillary attraction, drawing up the moisture. But whenever the plow is freely used and the seed planted the growth of grain and vegetables becomes luxuriant. Orchards, groves, and fields increase the cooling surfaces, giving more moisture and more summer showers in all that region that had been rainless. The practical benefit already is a larger variety of productions, and a grand harvest of cereals for home and foreign markets.

It is reasonable to expect a wider area of cultivation every year. The day of doubt is passed. The experiment has been made. The plow, the reaper, and the wagon of this season must be duplicated the next, and so on, while markets demand supplies.

The wheat product of the adjoining Walla Walla valley is this year estimated at not less than a million bushels.

The division, at its western terminus, is 250 miles distant from the Pacific division, now in operation. An effective transportation line, connecting the two, is now maintained by the Oregon Steam Navigation Company, and the mild winters of the country cause but a very short interruption to the navigation of the river. This navigation can be made use of until such time as the circumstances of the company permit them to undertake the construction of the expensive Columbia River division.

In view of the importance of affording facilities for settlement and development of this great wheat field of the Pacific slope, and of reaching the rich mineral regions of Idaho, your board will pro-

sent, at the annual meeting, resolutions authorizing movements for the early construction of that part of the road.

CONGRESSIONAL.

The Congress to meet in extra session in October next will be asked to extend the time for the construction and completion of the road. As you know, the bill introduced into the Forty-fourth Congress, granting eight years of additional time, failed to become a law. This, in brief, is the history of that failure: In the first session of that Congress, and on the 16th day of February, 1876, the bill passed the Senate by a very large majority. It went to the House, and in regular order of business was referred to the Pacific Railroad committee. Congress adjourned its first session before the bill was reported to the House. The business of the second session was embarassed and delayed in an unprecedented manner by the uncertainty and excitement which succeeded the Presidential election. It was impossible to get your extension bill reported to the House in time to be reached on the calendar of regular business. A decision of the Speaker that under the rules a two-thirds vote was necessary to take it up for final passage, was, in the condition of affairs, fatal. It was late at night of the last day of the session.

The bill, just as it had been passed by the Senate, was reported and moved. There was very little, if any, opposition to it. It asked for nothing but time. It asked for neither money nor bonds. A great majority of the members elected to the House were unquestionably in favor of the bill as a measure of public policy and an act of justice to a vast body of innocent stockholders who had been disabled by the financial panic to complete the road on time. These stockholders, over 10,000 in number, constituted a strong influence in the constituencies of twenty-one states and territories. On the call of the roll 121 members did not answer to their names. They were absent from the House, worn out by protracted sessions and excitement. The bill failed to get the two-thirds vote necessary to take it up, though it received a large majority of the votes of the members present.

At the coming session of Congress this bill will again be introduced and urged. It is so manifestly an act of justice to the thousands of innocent stockholders who have put nearly thirty millions of dollars into this national enterprise, the most of it the earnings of labor and the savings for old age, that we will not doubt that Congress will unhesitatingly pass the bill. The Government, the people's agent, has the greatest interest in its passage. If the Missouri and Yellowstone divisions of the Northern Pacific Railroad had been constructed three years ago, cutting the Indian country from the west bank of the Missouri river to the mouth of Shields river, a distance of only 545 miles, there would have been no wars with the Sioux. The road would have saved the deplorable loss of life and waste of money which have marked our endeavors to utilize that valuable region and make political and commercial connection with Montana Territory. The railroad would have settled the country and made the army unnecessary on its entire line. It would have done for northern Dakota and the Yellowstone valley what the Union Pacific road has done for the region between Missouri and Utah.

The Northern Pacific would have done for the Sioux country west of the Missouri river what it has done for the region east of it. Before the construction of your road 200 miles into Dakota, predatory Indians roamed and hunted all over that distance from the river, and made settlement impossible and navigation of the Missouri perilous. The road in two years rescued 200 miles width of buffalo and Indian range, and established wheat farms on it from which food is now exported to Europe. It is certain that what is known as the Sioux Indian country cannot be permanently pacified except by a railroad. The region, as the breeding nest of unceasing and costly wars, must be occupied by farms and towns. These cannot obtain even a foothold without the help of the Northern Pacific Railroad. Certainly it would be cheapest for the Government to hold the country between the Missouri and Shields river by building the road at its own expense, than to hold it, and yet not hold it, by military occupation in a line of forts, with the enormous cost of supplies by steamers and wagons.

All of which is respectfully submitted.

By order of the board.

CHARLES B. WRIGHT, President.

New York, No. 23 Fifth avenue, Sept. 26, 1877.

### Steel Tired Railroad Car Wheels.

An interesting test by hydraulic pressure was recently made at the Harlem Railroad machine shops, in the presence of a large number of railroad men, upon two of the Atwood steel tire railroad wheels, the peculiarity of which is that the tire is held to its place upon the centre by a packing of hemp, dispensing entirely with bolts or rivets. For the purposes of experiment, a wheel which had run 40,000 miles, the tire of which showed signs of being slightly loose, was first selected. The experiment was to show that although a tire may work loose it cannot come off, the hemp packing interlocking and securing it beyond the possibility of an accident. The pressure being applied, the tire was seen to start at a pressure of three tons. The pressure being increased up to 24½ tons, caused the wrought iron ring, which is simply used to cover the opening through which the packing is inserted to spring off. When the pressure was further carried up to 50 1-5 tons, it caused the tire of move off 2¾ inches (about half-way off,) but still left it firmly fixed to the centre. As a second experiment, a wheel was selected which had also run 40,000 miles, in sound condition. To this a pressure of 68⅞ tons was applied, when the tire showed indications of moving less than one-sixteenth of an inch. It was not thought necessary to carry the experiments any further; the demonstration being perfect that tires secured in this way are safe beyond all contingencies.

A set of these wheels, which have during the past winter and summer run 180,000 miles, under a sleeping car weighing thirty tons, have fully demonstrated what is claimed for this wheel, the perfect fastening of a steel tire to an iron centre, decreasing the noise and jar, and also the wear and tear upon rails and journals.

### Military Railway Building.

An interesting experiment was carried out last month by a detachment of the German "railway regiment" in order to determine the rapidity with which a line of rails could be laid down over ground presenting considerable difficulties, and also to ascertain the rate at which the work could be continued during the night by the aid of electric and other artificial lights. The portion of railway constructed led from the station of Klausdorf to the summit of some adjacent heights, rising fifty or sixty feet above the starting point. Its length was about 1,000 paces, and the gradients were, therefore, necessarily steep, in some places being as high as one in twenty. The work was begun at 7 o'clock in the morning, and by midday the rails were laid on the lower and more level half of the road. In the evening the workmen were relieved by other companies of the regiment arriving from Berlin, and, although there was no moon, the work was steadily continued. Torches were employed where excavations or embankments had to be made; but where more accurate work had to be executed or more difficult operations had to be performed—as, for instance where rails had to be laid and adjusted—the scene was illuminated by electric lights arranged upon an elevated platform. Shortly after midnight all the heavy work was finished. In two or three hours more the rails were finally adjusted, and in the morning the regiment returned to Berlin.—*Pall Mall Gazette.*

### Canada Southern Railroad.

The terms of the lease of the Canada Southern Railroad to the New York Central and Hudson River Railroad Company is officially stated as follows:

A new issue of bonds to the amount of $14,000,000, interest to commence Jan. 1, 1878, at the rate of 3 per cent for 3 years, and 5 per cent for 27 years, to be guaranteed by the New York Central Company for 20 years, is to be made as soon as the agreement is formally ratified by the Canada Southern bondholders and the New York Central Board of Directors. With these the Canada Southern first mortgage bonds are to be redeemed at 100; the Canada Southern Bridge bonds at 100; the Canada Southern second mortgage bonds at 31⅔; the Toledo, Canada Southern and Detroit bonds at 70; the Erie and Niagara bonds at 50, and the Michigan Midland bonds at 25. All coupons to Jan. 1, 1878, are wiped out. The bonds interested, according to the latest reports, are: Canada Southern, first mortgage, $9,000 000; Canada Southern, second mortgage, $1,500,000; Canada Southern Bridge bonds, $800,000; Toledo, Canada Southern and Detroit, $1,400,000; Erie and Niagara, about $450,000; Michigan Midland, $400,000.

### Southern Pacific Railroad.

Mr. C. P. Huntington, agent and attorney of the Southern Pacific Railroad in this city, says regarding the controversy relative to the Fort Yuma Bridge which was discussed in the Cabinet recently:

The Southern Pacific Railroad Company are authorized by act of Congress to build their road over government lands. They have laid their tracks through the military reservation of Fort Yuma, having written authority to do so temporarily, and have built a bridge across the Colorado at that point, over which bridge trains are now running into Arizona. This road is of immense advantage to the government, as Fort Yuma is a supply depot from which all the military posts in Arizona are supplied.

### Atlantic, Mississippi and Ohio Railroad.

The President of the Grand Trunk Railway Company of Canada, Sir Henry W. Tyler, recently made an inspection of the Atlantic, Mississippi and Ohio Railroad of Virginia in the interest of the English bondholders.

He is chairman of the bondholders' committee in London. He stated just before sailing for England, on Saturday last, that the English bondholders had prepared a scheme for the reorganization of the road which had received the approval and hearty support of interested persons in this country. Prominent bankers and others in Virginia had assured him that there would be little difficulty in securing its adoption.

☞ At the annual meeting of the stockholders of the Northern Pacific Railroad Company, held in this city on the 26th ult., the following Board of Directors was elected: Charles B. Wright, of Pennsylvania; Frederick Billings, of Vermont; George W. Cass, of New York; Jos. Dilworth, of Pennsylvania; F. Smith, of Pennsylvania; George Stark, of New Hampshire; Alexander Mitchell, of Wisconsin; J. C. Ainsworth, of Oregon; J. M. Denison, of Maryland; Richard C. Ashurst, of Pennsylvania. The Directors subsequently elected Charles B. Wright, of Pennsylvania, President; George Stark, of New Hampshire, Vice President; Samuel Wilkison, Secretary; and Geo. E. Beebe, Treasurer.

# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The word "do" occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

# American Railroad Journal.

**Saturday, October 13, 1877.**

### Financial and Commercial Affairs.

Of the notable events of the week, in the financial line, were the further decline in Gold, the higher range of Money in the foreign and domestic markets through the growing exigencies of reviving trade at home and abroad, the substantial strength and buoyancy of Stock values, and more earnest discussions of the preliminaries to an early resumption of Specie payments, the probabilities of which seemed to have been brought more distinctly before the public, by the course of Gold, which is now but little different as to market price from the legal tender representatives of the national credit. Money has been offered more reservedly in the open market, and has been quoted dearer, with more urgent inquiry noted for accommodation. Call loans were quoted here at the close at 5@7 per cent, in most instances at the full legal price; and very choice to prime mercantile credits were rated at 6½@8½ per cent per annum for the best names. The City bank exhibit of last week indicated a falling off in the loan and discount average of $3,876,900, and an increase in the item of circulation of $265,800. The average of deposits was further reduced $2,917,800. The legal tender reserve fell off $573,500; and the specie average $100,600. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $8,490,850, as against $8,485,000 the preceding week. The City bank exchanges in currency reached $428,838,687, or a daily average of $71,473,123.

# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained."
Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

# American Railroad Journal.

**Saturday, October 13, 1877.**

### Financial and Commercial Affairs.

Of the notable events of the week, in the financial line, were the further decline in Gold, the higher range of Money in the foreign and domestic markets through the growing exigencies of reviving trade at home and abroad, the substantial strength and buoyancy of Stock values, and more earnest discussions of the preliminaries to an early resumption of Specie payments, the probabilities of which seemed to have been brought more distinctly before the public, by the course of Gold, which is now but little different as to market price from the legal tender representatives of the national credit. Money has been offered more reservedly in the open market, and has been quoted dearer, with more urgent inquiry noted for accommodation. Call loans were quoted here at the close at 5@7 per cent, in most instances at the full legal price; and very choice to prime mercantile credits were rated at 6½@8½ per cent per annum for the best names. The City bank exhibit of last week indicated a falling off in the loan and discount average of $3,376,900, and an increase in the item of circulation of $265,800. The average of deposits was further reduced $2,917,800. The legal tender reserve fell off $573,500; and the specie average $100,600. The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $8,490,850, as against $8,485,000 the preceding week. The City bank exchanges in currency reached $428,838,687, or a daily average of $71,473,123.

On Tuesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $15,924,803; special deposit of legal tenders for the redemption of certificates of deposit, $44,120,000; Coin, $119,021,626, including of Coin certificates, $37,975,000.

The outstanding amount of legal tender notes is $356,914,932. The National bank circulation is now $315,728,154 of currency notes and $1,429,720 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $8,310,000.

Influenced by the course of Gold and Money, Government securities further receded in price, and were offered more freely, resulting in more extensive dealings, leaving off on Wednesday rather more firmly. At the close on Wednesday the current quotations were as follows:

United States currency sixes, 120@120¼; do. 6s, 1881, registered, 108⅞@109⅛; do. coupon, 109⅞@110⅛; do. 1865, new, registered, 105¼@105½; do. coupon, 105¼@105½; do. 1867, registered, 107@107⅛; do. coupon, 107⅛@107¼; do. 1868, registered, 109@109¼; do. coupon, 109@109¼; do. ten-forties registered, 106⅜@106⅞; do. coupon, 107¼@108; do. five per cents, 1881, registered, 106¾@106⅞; do. coupon, 106¾@106⅞; do. 4½ per cents, 1891, registered, 104@104¼; do. coupon, 104@104¼; do. 4 per cents, 1907, reg., 101@101⅛; Central Pacific Gold Bonds, 105¾@106.

The amount of U. S. bonds held by the Treasurer of the United States as security for the National Bank circulation is $338,010,850, and $15,208,000 as security for public deposits.

State Bonds have been in rather better demand and prices have been quoted firmer for the more popular loans. Railway Mortgages have been also more sought after, and the more substantial issues of actual interest bearing bonds have been again quoted firmer. And in the line of Railway and Miscellaneous share property the dealings have been on a liberal scale, and the general course of values has been toward a higher range, though near the close, under the more stringent course of Money, and the resulting disturbance of temporary loans, the market was somewhat depressed and unsettled. The very latest transactions indicated general firmness.

Gold has fallen within the week to the lowest point touched in many years, or since 1862. The business has been less active, and of less public interest. The extremes of the price during the week have been 102⅛@103⅛, closing on Wednesday at 102⅞, as against 103 on Wednesday of the preceding week. The specie outflow last week was only $212,400, making the total exports of specie hence since January 1, $23,053,210, against $40,687,692 the same time in the preceding year. The imports of specie at this port last week were $73,774, and since January 1st have been $11,677,603 as against $6,992,516 same time last year. The Customs demand for gold last week reached $2,032,377 or an average of $338,729 per day.

Foreign Exchange has been in liberal supply and comparatively slow of sale with prices ruling weak and closing irregularly. Bankers' sixty day bills on London closed on Wednesday at $4 80@$4 80⅛; sight bills on London at $4 84@$4 84⅛ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,729,769 as against $5,030,112 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,378,679 of Dry Goods, and $4,351,090 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were to the very liberal aggregate of $6,873,639, against $6,003,215 same week in 1876.

The income of the Government from internal revenues last week was about 2¾ millions, and and from Customs last week again about 2½ millions.

A fairly active movement was reported in most kinds of domestic produce which have been, however, quite variable, as to price, during the week, especially in the instances of Breadstuffs, Provisions, Cotton and Petroleum. The Breadstuff and Cotton movements have been on a more liberal scale. Foreign merchandise has been moderately active at irregular rates. Coffee closed lower.

Metals have been attracting more attention and have been generally quoted steady. Eglinton Pig Iron quoted at $24@$24 50; Glengarnock $25@$25 50; Coltness $26@$27; No. 1 American Pig at $18 50@$19 50; No. 2 do. at $17 00@$18 50. Forge $16@$17; American Rails at works $38@$37. Old Rails $18@$19. Wrought Scrap $22@$24. Steel Rails, on the basis of $45@$47 50 Ingot Copper moderately dealt in on the basis of 17¾@18 for early delivery.

The dealings in Hardware, Boots and Shoes and Dry Goods have been to a less important aggregate, though indicative of a fair degree of activity, and prices have been fairly supported in the leading instances.

Under more liberal arrivals of tonnage, Ocean freights have been ruling weaker, as to rates, on a moderately active business, chiefly for Grain and Petroleum. Liverpool steamer rates at the close for Grain, quoted at 9@9¼d. Provisions, 35s.@45s.; Leather, 60s. Measurement Goods at 22s. 6d.@30s. per ton; Cotton, 4d.@5-16d. per lb., Tobacco 35s.@40s. Liverpool, by sail. Cotton, ¼d.; Grain, 8¼d.@9d.; Measurement Goods 15s.@20s.; Tobacco 27s. 6d.@32s. 6d; Grain rates on charter hence for Cork and orders left off at 7s.@7s. 1½.; for the Continent at 7s.@7s. 3d.; and from Baltimore for Cork and orders, 7s.@7s. 3d., and from Philadelphia at 7s.@7s. 3d. per quarter. Refined Petroleum hence for Cork and orders, 5s.@5s. 6d.; for the Continent, 4s. 3d.@5s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

### The Bridge at Yuma.

The Arizona Sentinel states that the Southern Pacific Railroad bridge over the Colorado River is 480 feet long, with a draw of 187 feet. Over 100,000 pounds of iron rods are used in bracing it together. Every span is an independent truss by itself. The piles are of cedar 14 inches square, and driven to a depth of 26 to 32 feet each. Experts say there is no better wooden bridge in the United States. This is the bridge about which a dispute has arisen between the Southern Pacific and Texas Pacific Companies. The west end of it rests within the military post at Fort Yuma, while the terminus is on the Arizona bank. The Texas Pacific contests the right of the California Company to cross the Colorado, and induced the War Department to stop trains from crossing; but this action the Cabinet, after two meetings, has revoked and the trains are now using it.

### Louisville and Nashville R. R.

At the annual meeting of the stockholders of the Louisville and Nashville Railroad company, held at Louisville on the 3d inst., the old Board of Directors was re-elected without opposition. A resolution congratulating the stockholders on the successful management of the road was unanimously passed. E. D. Standiford was re-elected President, and H. Victor Newcomb Vice President. The report of the President shows affairs to be in a satisfactory condition, the bonded and floating debt having been largely reduced, and the earning capacity of the road rapidly increasing, being in the past year a net of $2,140,520 28, against $1,484,047 37 in the year before the panic. The road is in fine condition and the country through which it passes is increasing in population and wealth. The company is paying much attention to immigration and the location of manufacturing interests along its line.

☞ The second mortgage bondholders, who purchased the Louisville, Cincinnati and Lexington Short Line Railroad, have elected a Board of Directors, consisting of E. D. Sayre and M. C. Johnston, Lexington; George Spratt, F. P. Schmitt, E. Thompson, Charles Tilden, George Ainslee, J. B. Bates and Jacob Kruger, Louisville. J. B. Wilder was elected President.

☞ The capital stock of the Mt. Adams and Eden Park Inclined Railway Co. has been increased to $500,000.

### Atchison, Topeka and Santa Fe Railroad.

The earnings of the Atchison, Topeka and Santa Fe Railroad Company for the month of August, 1877, were $255,572 17, the operating expenses $110,780 24, and the net earnings $144,791 93. For the month of August, 1876, the earnings were $248,138 33, the expenses $117,799 55, and the net earnings $130,338 78—showing an increase in earnings of $7,433 84, a decrease in expenses of $7,433 84, and an increase in net earnings of $14,453 15. Per cent of expenses to earnings in August, 1877, 43.34; in August, 1876, 47.47. Number of miles operated in both years, 711. The following is a comparative statement of the earnings, expenses, etc., for the eight months ending August 31, 1876 and 1877:

| | 1876. | 1877. |
|---|---|---|
| From freight | $972,816 00 | $960,887 00 |
| " passengers | 465,633 00 | 461,084 00 |
| " mail | 25,326 00 | 25,326 00 |
| " express | 22,528 00 | 26,210 00 |
| " miscellaneous | 6,488 00 | 5,878 00 |
| Total | $1,492,791 91 | $1,479,385 33 |
| Operating expenses | 758,037 41 | 815,329 74 |
| Net earnings | $734,754 50 | $664,055 59 |
| Per cent operating expenses to earnings | 50.78 | 55.11 |
| No. miles operated | Av. 690 | 711 |

☞ The earnings of the Houston and Texas Central Railway for the month of August, 1877, were $199,874 70, the expenses (including taxes paid), $131,985 57, and the net earnings $67,889 13. For the month of August, 1876, the earnings were $208,106 07, the expenses, etc., $152,628 22, and the net earnings $55,477 85—showing a decrease in earnings of $8,231 37, with a decrease in expenses of $20,642 65, making an increase in the net earnings of $12,411 28.

☞ The earnings of the Central Pacific Railroad for the month of September, 1877, were $1,420,585, against $1,871,875 for the month of September, 1876, and $1,567,622 for the month of September, 1875. For the first nine months ending September 30, 1877, the earnings were $12,086,107, against $13,136,195 for the first nine months in 1876, and $12,567,045 for the first nine months in 1875.

☞ On or about Monday, a motion will be made in the Court of Common Pleas to dissolve the injunction which now lies, preventing the New York Elevated Railroad from operating in front of the Pacific hotel on Greenwich street. The motion will be made on the ground that the recent decision of the Court of Appeals has decided this and all similar cases definitely.

☞ An effort was made on Tuesday to enjoin the Pennsylvania Railroad Co. from paying the dividend on the stock of the United Companies of New Jersey; which, together with the rumor that the former company were about to cancel the lease of the latter, caused the stock to fall to 117 bid and 119 asked. On Wednesday, however, it had recovered to 122½@125.

☞ A dividend of three per cent has been declared upon the capital stock of the Main Stem of the Baltimore and Ohio Railroad Company—making, with the five per cent declared in April last, eight per cent for the year 1877.

### Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of September, were:

ENTERED FOR CONSUMPTION.

☞ The change of the gauge of the New Brunswick and Canada Railroad, a branch of which runs to Houlton, is contemplated, so as to conform to that of the Maine Central and European and North American Railroads.

☞ The first train of palace cattle cars, invented by United States Senator McPherson, of New Jersey, arrived at the Jersey City abattoir recently, having been eighty hours on the journey from St. Louis. The cattle were fed and watered twice a day on the road.

### Portland and Rochester Railroad.

The annual meeting of the directors of the Portland and Rochester Railroad Company was held in Portland on the 3d inst. The Treasurer's report shows a falling off in receipts from last year, and a corresponding reduction in expenses. The President in his report says:

"There has been a loss of over 50,000 local passengers in three years, and an increase of 13,988 through passengers during the same time. This continued loss of local traffic can only be accounted for by reason of the depressed condition of our lumber and manufacturing industries. The people are poor and have not the money to pay for such luxuries, but with a revival of these industries may we not anticipate that this traffic may be restored to us, which with a prosperous and increasing through business will enable the road to largely increase its receipts and thereby give greater value to its securities."

### Northern Pacific Railroad.

The gross earnings, operating expenses and net earnings of this road for the year ending August 31, 1877, were as follows:

GROSS EARNINGS.

| | | |
|---|---|---|
| Minnesota Division— | | |
| Passenger earnings.. .... | $161,824 70 | |

GEORGE E. BEEBE, Treasurer.

New York, September 26th, 1877.

☞ The value of merchandise exported from the United States in August, 1877, was $42,664,668 against $40,622,706 in August, 1876. The excess of exports over imports in August this year was $3,410,309, and in 1876 $5,237,893. The value of the exports for eight months ended 31st August was $375,450,885 against $362,871,600 same time last year. The excess of exports over

imports in eight months of 1877 was $88,942,722 against $64,537,917 same time in 1876.

### Russian Railways.

The aggregate receipts of the Russian Railways for June, 1877, upon 18,737 versts, were 17,086,032 roubles, as compared with 17,694 versts, and 13,402,730 roubles in June, 1876, showing increases of 1,043 versts and 3,683,302 rs. For the first half of 1877 the total receipts were 81,338,487 rs., against 67,437,790 rs. in 1876, showing 13,900,697 rs. increase. Out of the 54 lines making up the Russian system, 15 only show any diminution in the receipts, the worst decrease being one of 12 per cent on the Don and Volga line. The lines, on the other hand, showing the greatest increases are, the Rostoff and Vladikavkas, 79 per cent; Riga and Bolderaa, 77 per cent; Brest and Grajewo, and the Odessa line, each 75 per cent; Kiew and Brest, 72 per cent; and Dunaburg and Witebsk, 68 per cent. The net increase of the first half of 1877 over that of 1876 is 14 per cent. The figures for the first half of each year since 1872, are:

| Half-years. | Length on 30th June. Versts. | Receipts Total. Roubles. | Receipts Per Verst. Roubles. |
|---|---|---|---|
| 1872 | 13,911 | 54,870,680 | 4,050 |
| 1874 | 15,576 | 70,129,617 | 4,562 |
| 1875 | 17,006 | 69,034,151 | 4,060 |
| 1876 | 17,694 | 67,437,790 | 3,811 |
| 1877 | 18,737 | 81,338,487 | 4,345 |

### American District Telegraph.

The annual report of the American District Telegraph Company, submitted on the 9th inst., shows that arrangements have been made for five years with the Western Union Telegraph Company to establish the system in the New England States, as far west as Denver, and as far south as Memphis. One thousand instruments have already been put in operation, the company agreeing to pay an annual royalty on each instrument. The number of messages delivered in this city and vicinity during the past year was 1,513,265; and the total receipts amounted to $208,983, the expenditures for the same period being $277,866. The following directors were elected for the current year: Elisha W. Andrews, H. B. Cornell, Townsend Cox, J. M. Foote, H. W. Greenleaf, J. A. Gamewell, H. F. Jenkins, Charles Lamson and J. Hilton Scribner.

### American Leather in Germany.

The international exhibition of articles used in leather industry was opened in Berlin on the 8th of September. The United States Consul General at that city sends an interesting report to the Department of State concerning the American display. All Germany, Austria, Hungary, Belgium, Denmark, Holland, Sweden and Norway, Switzerland and the United States were fully represented, England, Italy and Russia but partly. The great feature of the exhibition was two displays, made by American firms, which gave the first opportunity publicly afforded in Germany for the proper appreciation of the skill and perfection which the manufacture of boots and shoes by machinery has attained in the United States, and the fullest and frankest tribute was paid to the ingenuity and enterprise displayed. The interest excited must act most favorably on the introduction of American shoe machinery into Germany. The number of shoe factories now in Germany using American machinery is forty, with an average daily production of 14,000 pairs. The value of American leather, oak and hemlock tanned is fully recognized in Germany, and if our tanners would give their work a better finish the trade in American leather in that country might be regarded as a permanent and decided success. Of American tools there was a splendid display of all sorts, and the superiority of these tools to all those of the same kind used in Germany was conceded on all sides. The Chairman of the Committee, in his opening speech, referred in warm terms to the progress made in the United States in tanning and shoe machinery, and publicly thanked our manufacturers for the extensive and fine display in the American department.

☞ The first locomotive, platform cars and rolling stock of the Canada Pacific Railway passed Pembina on the 8th inst. for Winnipeg. The stock is intended for construction service on the Pembina branch of the Canadian Pacific Railway, Mr. Whitehead, chief contractor, accompanied the stock.

☞ Herapath says that "the late mob violence, which staggered all admirers of American laws and manners, and which for gross barbarity is unparalleled, certainly deserves the attention of Congress with a view to remedying so great a wrong."

☞ The cab lines running in connection with the New York Elevated Railroad are becoming very popular and profitable, and the number of passengers by them increase each day.

☞ Col. Thomas R. Sharp, Master of Transportation of the Baltimore and Ohio Railroad, has been elected President of the Long Island Railroad.

☞ Mr. Garrett A. Hobart of Passaic, N. J., has been appointed Receiver of the Montclair and Greenwood Lake Railroad Company.

PITTSBURG AND LAKE ERIE RAILROAD.
NOTICE TO CONTRACTORS.

Proposals will be received by the undersigned until two o'clock P. M. on Tuesday, October 16th, 1877, at Rochester, Beaver County, Pa., for the Grading and Masonry of Seventy (70) Miles of Railroad of Standard Gauge, extending from Pittsburg, Pa., to Youngstown, Ohio. The work will be divided into sections of about one mile each, and bids will be received for one or more sections. Specifications and profiles may be seen, and further information may be obtained, on and after Tuesday, October 9th, on application to Francis H. Saylor, Engineer, at Rochester, Pa. Proposals should be on blank forms, which will be furnished. The right to reject any bid is reserved.

B. J. McGRANN, Contractor.

ÆTNA GRATE.

A SIMPLE, DURABLE AND SUCCESSFUL SHAKING GRATE. Saves Fuel, Bars and Labor. Prices reasonable.

BABCOCK & WILCOX
PATENT
Tubulous Steam Boiler.

Best Wrought-Iron Lap-Welded Boiler Tubes, Expanded into Cast-Steel Up-Takes.

No Bolted or Packed Joints.

ALL CONNECTIONS MADE BY EXPANDING TUBES INTO BORED HOLES.

Centennial Exposition Medal awarded this Boiler for highest Economy and Efficiency on Test.

Illustrated Circulars, and other desired information, promptly furnished.

BABCOCK & WILCOX, Engineers,
No. 30 Cortlandt St., New York.

Proportional Parallel Rule,
T Square and Protractor Combined.

FOR ARCHITECTURAL AND MECHANICAL draughtsmen, surveyors, engravers, students in industrial drawing and art studies. Engineers and draughtsmen approve of it, and consider it the best instrument for the purpose ever invented. Can be seen at the office of the inventor, patentee and manufacturers, W. GARDMAN & SON, who construct and repair engineering and astronomical instruments, etc.
112 John Street, New York.

Send for illustrated circular.

Is now on exhibition at the Fair of the American Institute, Depart. I, Group 7.

TO GAS CONSUMERS.

Triplex Economizing

GAS BURNER.

EXPANSION BY HEAT.
INCREASING LIGHT.

A trial of one burner will convince.

TRIPLEX GAS BURNER CO.,
No. 40 Cortlandt Street,

$3 per dozen. NEW YORK.

Send for illustrated and descriptive circular.

HEATING.

BASE-BURNING BOILERS, for Warming Dwellings, Green-Houses, Drying Rooms, by high or low pressure hot water; also for Baths, Baptisteries, and

Railway Water Stations.

TIN AND SHEET IRON WORK.
WEST'S SQUARE TUBE COPPER.
OTIS' PATENT AND OTHER
LIGHTNING RODS.
Pumps, Windmills, etc.

WEST & CANNON,
40 Cortlandt St., New York.

☞ A petition to Congress is being widely circulated in Oregon and Washington Territories representing the great and increasing need of communication with the interior and Eastern States, which is now impossible except by a sea voyage of 500 miles to or from San Francisco, and praying that the petition of the Northern Pacific Railroad Company for an extension of time under its charter to enable it to complete its railroad may be granted, and that Congress will in this manner, or in such modified form as may seem to it best and most efficient, encourage and insure the early completion of this great national highway, and relieve us from our existing isolation.

## The Alden Crusher.

New in Principle, Simple in Construction, Economical in Use of Power, and of Remarkable Efficiency.

**FOR BREAKING STONE FOR BALLASTING RAILROADS, McAdamizing Streets,**

AND FOR

CRUSHING AND PULVERIZING ORES OF ALL KINDS,

**NO LOST MOTION, ADJUSTABLE, DURABLE, PORTABLE.**

SEND FOR ILLUSTRATED CIRCULAR.

**COPELAND, DODGE & CO.,**
**206 Broadway, N. Y.**

## EDWIN H. BROWN,

**7 Warren Street, New York,**

**Solicitor U. S. & Foreign Trade Marks & Patents.**

Make a note of the time when you first think of an invention, date and keep all writings, sketches, drawings and models of it. It will be well to have persons sign the former as witnesses, and this may be done without exhibiting the contents. To establish title to your invention, even after obtaining a patent, you may have to prove that you made it before any one else, and never gave it up.

## Engineers' and Surveyors' Instruments.

*Medal awarded*—Exhibition of all Nations, New York, 1853, for best Drawing Instruments. Particular mention for Limb Protractors.

*Medal awarded* — International Exhibition, Philadelphia, 1876, for Surveying and Leveling Instruments

**JAMES PRENTICE,**
**164 Broadway, N. Y.**

**Rider Compression Pumps,**

For supplying R. R. tanks with water. Can be run by any ignorant trackman or baggage master. Uses no steam, has no valves to get out of repair. *We guarantee our 10 inch engine to pump water for one half cent per 1000 gallons.* Write for circulars and information.

CAMMEYER & SAYER,
93 Liberty St., N. Y.

## PATENT MINERAL WOOL.

THE BEST

**Insulator of Heat or Cold**

A 3 INCH LINING SUFFICIENT FOR

### The Coal Trade.

For the week ending the 29th ultimo, the total tonnage, as reported by the several carrying companies, amounted to 404,388 tons, against 508,304 tons in corresponding week last year, a decrease of 103,916 tons. The total amount of anthracite mined for the coal year is 14,398,738 tons, against 12,847,851 for same period last year, an increase of 1,551,887 tons. The quantity of bituminous coal sent to market for the week amounted to 87,595 tons, against 44,418 tons in corresponding week last year, an increase of 43,177 tons. The total amount of anthracite mined for the year is 2,439,970 tons, against 2,563,358 tons for corresponding period last year, a decrease of 123,388 tons. The total tonnage of all kinds of coal for the week is 491,983 tons, against 552,722 tons in corresponding week last year, a decrease of 60,739 tons. The total tonnage of all kinds of coal for the coal year is 16,838,708 tons, against 15,410,709 to same date last year, an increase of 1,421,999 tons. The receipts at Perth Amboy for the week ending on the 29th ultimo were 37,284 tons, the shipments 35,110 tons, leaving a stock on hand of 63,379 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of September was 114,751 tons, of which 99,457 tons were coal, and 15,294 tons coke. The total carried for the year is 3,271,059 tons, of which 2,623,902 tons were coal and 595,282 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, Oct. 8.*

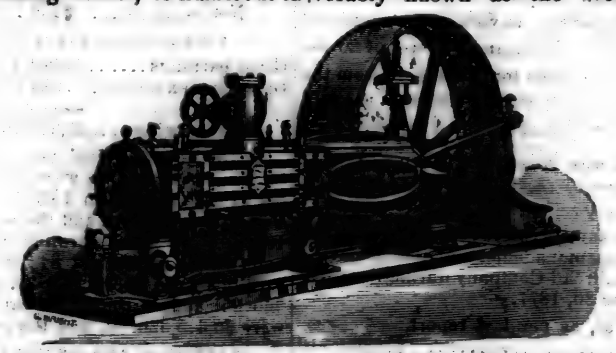
## American Railroad Journal.

New York, Saturday, October 20, 1877.



### Baltimore and Hanover Railroad.

A meeting of the stockholders of the Baltimore and Hanover Railroad Company was held on the 9th inst. at Hampstead, Carroll county, Md. Over $100,000 of stock was voted, representing four different routes. The following board of directors was elected: A. W. Eichelberger, L. F. Melsheimer, William Grumbine and S. Keefer, of Hanover, Pa.; W. H. Hoffman, of Baltimore county, Md.; C. C. Wooden, of Carroll county, Md., and Chas. W. Slagle, of Baltimore city. This board of directors will meet in Baltimore city on the 23d instant for the purpose of organization and to definitely determine the route of the road. The meeting at Hamstead was largely attended by people of the vicinage, who are interested in building the road. Its completion will be of considerable interest to Baltimore city, as it will connect with a series of railroads in Pennsylvania that extend into the most fertile agricultural districts of that State, the products of which are now diverted to other markets. The extension of this road will also, it is stated, enable the Philadelphia and Reading Railroad Company to ship its coal direct to Baltimore, and will open up to Baltimore a large section of the lumber region of Pennsylvania.

### The Wright Steam Engine.

Horizontal and vertical high pressure steam engines are now generally used as motive power wherever steam is employed as the driving agent. In some manufacturing districts, where there is an abundance of water power, turbine and other water wheels are found to be the most economical machinery for driving cotton, woolen and other mills; but for the manufactories, workshops, extensive printing establishments and publishing houses, so numerous in our large cities, and which are scattered in such profusion throughout the whole of the civilized world, high pressure steam engines seem to have become an absolute necessity. Hence it is no matter of surprise that so many are engaged in the construction of them. And yet these engines, numberless as they are, vary sometimes very materially in design, and arrangement of parts. We may pass from one factory to another in any locality, and not find two of just the same pattern.

The one illustrated here, so widely and favorably known as the Wright Horizontal

WRIGHT'S PATENT CUT-OFF STEAM-ENGINE.

Steam Engine with variable cut-off, is undoubtedly one of the best steam engines constructed in this country. Economy in the consumption of fuel, thoroughness in construction, and originality of design are among its prominent features. We know of no other engine that it resembles. All the parts bear the impress of the designer and constructor's thought and mechanical ideas, and his aim seems to be to get as near perfection as possible in exquisite workmanship, with smoothness and uniformity of motion.

The engines in the Equitable Life Insurance Co. Building, and also in the Evening Post Building in this city, the one of 80 H. P. in use by the New York and Harlem Railroad Co., and those at the Weber Piano Manufactory, the Royal Gem Mills, St. Louis, Mo., and a very large number of others in different parts of the country were built by Wm. Wright & Co., at their fine works in Newburgh, N. Y. The company are at present constructing an engine of 150 H. P. for a large publishing house in this city and another of 400 H. P. has been recently completed for the Meyer Rubber Company, New Brunswick, N. J., also boilers of 350 H. P. for the same company.

George M. Clapp, of 206 Broadway (Evening Post Building, Room 9), in this city, is the agent for the Wright Steam Engines, and all further information can be obtained from him.

☞ The Louisiana Funding Board has refused to fund Planters' Consolidated Association bonds. Of the outstanding State debt $18,702,792 86 have been converted into $11,221,675 60 of new consolidated bonds. The latter amount is

the present interest bearing debt of the State. When the funding operations are completed the whole debt will be $11,863,000.

### Baltimore and Ohio Railroad.

The regular monthly meeting of the Baltimore and Ohio Railroad Company was held in Baltimore on the 10th inst., President John W. Garrett in the chair.

The committee on finance submitted a report, recommending that a dividend of three per cent be declared on the stock of the main stem for the half year ended September 30. The president stated that the dividends since 1872 had been uniformly made semi-annually at five per cent, but in view of present circumstances the committee had unanimously determined to recommend a reduction to three per cent. The committee of finance had closed the negotiation of the loan of sterling five per cent bonds the proceeds of which paid the chief part of the floating debt of the company. There yet remained a sum, which although within the convenient ability of the company to continue, it was determined should be reduced as rapidly as practicable from the earnings. It was therefore deemed the proper policy to recommend the dividend as stated. This course was pursued, although the debt was incurred entirely for purposes of construction and capital. It was also remarked that the spring dividend having been five per cent, the present dividend would make eight per cent for the current calendar year. The resolution was unanimously adopted.

The committee of finance also submitted a resolution, which was adopted, declaring it is inexpedient to declare a dividend on the stock of the Washington Branch road, in view of the continued claim of the State of Maryland for tax of 20 per cent on the gross receipts for passengers from the 10th of December, 1870, since which date the said tax has not been collected by the company.

### Louisville and Nashville Railroad.

*To the Stockholders of the Louisville and Nashville Railroad Company:*

The President and Directors respectfully submit their report of the management of the Louisville and Nashville Railroad Company during the fiscal year ending June 30, 1877.

| | | |
|---|---|---|
| The bonded debt, as per last report, was | | $16,555,710 |
| City of Louisville bond sold this year | | 1,000 |
| | | $16,556,710 |
| Redeemed Memphis and Ohio Railroad income bond | $500 | |
| Paid to sinking fund in consolidated mortgage bonds | 39,000 | |
| Paid to sinking fund in Memphis, Clarksville and Louisville mortgage bonds | 32,980 | |
| | | 72,480 |
| | | $16,484,230 |
| In this is included city of Louisville bonds without mortgage | | 850,000 |
| | | $15,634,230 |
| Showing a reduction during the year in the mortgage debt of the Main Stem and branches | | 72,480 |

We have also reduced the bonded debt of the Nashville and Decatur Railroad Company by the payment of twenty one of its first mortgage bonds into the sinking fund, and the bonded debt of the South and North Alabama Railroad Company by the purchase of $65,000 of its sterling bonds for the sinking fund.

| | |
|---|---|
| The net earnings of the Louisville & Nashville Railroad Company for the past year were | $1,675,840 46 |
| The interest on the bonded and floating debt of same | 1,025,903 28 |
| Showing surplus earnings | $649,937 18 |
| In the year 1875-76 the surplus earnings were | 340,520 40 |
| An increase of surplus earnings this year over last of | $309,416 78 |

The following table shows a comparison of the gross earnings, operating expenses and net earnings of the different lines operated by this company for the past two years:

| | 1875-76. | †1876-77. |
|---|---|---|
| **MAIN STEM AND BRANCHES (346 miles.)** | | |
| Gross earnings | $2,498,505 42 | $2,700,499 46 |
| Operating expenses | 1,386,710 89 | 1,374,810 00 |
| Net earnings | $1,111,794 53 | $1,325,689 46 |
| **MEMPHIS LINE—M., C. & L. AND M. & O. (259.10 m.)** | | |
| Gross earnings | $1,139,424 33 | $1,159,457 58 |
| Operating expenses | 793,400 70 | 809,306 58 |
| Net earnings | $346,023 63 | $350,151 00 |
| **GLASGOW BRANCH—LEASED (10.50 miles).** | | |
| Gross earnings | $16,456 83 | $17,096 14 |
| Operating expenses | 12,250 94 | 13,117 89 |
| Net earnings | $4,205 89 | $3,978 25 |
| **N. & D. R.—LEASED (122.30 miles.)** | | |
| Gross earnings | $681,780 68 | $679,591 61 |
| Operating expenses | 382,074 82 | 416,746 24 |
| Net earnings | $249,705 86 | $262,845 37 |
| **S. & N. ALABAMA R. (183 miles.)** | | |
| Gross earnings | $675,323 03 | $758,682 01 |
| Operating expenses | 419,092 89 | 560,825 81 |
| Net earnings | $256,230 14 | $197,856 20 |
| **TOTAL OF ALL ROADS (920.90 miles).*** | | |
| Gross earnings | $4,961,490 29 | $5,315,326 80 |
| Operating expenses | 2,993,530 24 | 3,174,806 52 |
| Net earnings | $1,967,960 05 | $2,140,520 28 |

In 1872-73, the fiscal year previous to the panic, the gross earnings were $6,106,051 84, and the net $1,484,047 87; in 1873-74 the gross earnings were $5,510,695 45, and the net $1,565,382 34; in 1874 75 the gross earnings were $4,863,873 80, and the net $1,682,182 84; in 1875-76 the gross earnings were $4,961,490 29, and the net $1,967,960 05, and in the past year the gross earnings were $5,315,326 80, and the net $2,140,520 28.

**NASHVILLE AND DECATUR RAILROAD CO.**

| | |
|---|---|
| The gross earnings were | $679,591 61 |
| Operating expenses | 416,746 24 |
| Net earnings | $262,845 37 |
| The net earnings last year were | 249,705 86 |
| Increase 1876-77 | $13,139 51 |

The interest and dividends for which the Louisville and Nashville Railroad Company is liable have been paid, and are as follows:

| | |
|---|---|
| Interest on bonded indebtedness | $150,184 12 |
| Hire of engines and cars | 37,000 87 |
| Dividends on stock | 98,553 44 |
| | $285,788 43 |
| Deduct net earnings | 262,815 37 |
| Showing a deficit of | $22,893 06 |

The amount charged to the construction account of the road during the past year was $3,036 20; during former years, $258,123, making a total of $261,159 20, which is to be reimbursed at the end of the lease.

**SOUTH AND NORTH ALABAMA RAILROAD CO.**

The result of the operation of this road during the past two years has been as follows:

| | 1875-76. | 1876-77. |
|---|---|---|
| Gross earnings | $675,323 03 | $758,682 01 |
| Operating expenses | 419,092 89 | 560,825 81 |
| Net earnings | $256,230 14 | $197,856 20 |
| Interest paid on the bonded debt | $364,997 65 | |
| Hire of engines and cars | 73,158 93 | |
| | | 438,156 58 |
| Deficit | | $240,300 38 |
| Amount advanced on construction account | | 23,093 43 |
| Sixty-five sterling bonds | | 62,288 36 |
| Advances and interest on old account | | 110,760 99 |
| Total amount advanced during the year | | $436,449 16 |

The financial depression following the panic of 1873, contrary to expectation, continued during the past year, and railroads, in common with all business enterprises, have suffered more or less during the latter mentioned period.

To this was added the political complications attending the Presidential campaign, which, with the doubtful result, absorbed public attention for several months, and greatly disturbed all commercial intercourse.

We also experienced local difficulties of a peculiar nature. In the months of December and January our connections north of the Ohio were unable, on account of heavy snowfalls, to transport our north-bound freights; consequently the business was forced via the Atlantic seaboard cities, and according to a careful estimate we lost from this cause alone $100,000 in gross receipts.

On our Memphis Line we unfortunately, in the last month of the fiscal year, had a freshet unprecedented in the annals of the company, which partially destroyed nearly two miles of our roadbed, delayed our business very seriously, and entailed upon us a heavy loss.

A statement of the result obtained in the past two years under the present management, compared with the two embracing that of the panic and the one before, may not prove uninteresting to the stockholders.*

The gross earnings for the years 1872-3 and 1873-4 were $11,616,747 29, and for 1875-6 and 1876-7, under the present management, were $10,276,817 09; the net earnings for 1872-3 and 1873-4 were $3,049,429 71, and for 1875-6 and 1876-7 were $4,108,480 33.

In other words, in the last two years, with $1,339,930 20 less gross earnings than in 1872-3 and 1873-4, we realized $1,059,050 62 more net in 1875-6 and 1876-7 than in the former time mentioned, a result worthy of the careful consideration of the stockholders.

This is not due to any increase in rates of freight, as is shown by the following facts:

The number of tons carried one mile in the year before the panic was 177,466,795; in the year of the panic, 166,482,542; in 1875-6, 173,064,814; and in 1876-7, 202,114,027, showing that we have had an increase in tonnage in the past two years as compared with the former two mentioned.

In obtaining these results your directory has not allowed the physical condition of the road to deteriorate, but placed it in better condition than ever before.

This fact is fully demonstrated by the following statement which compares the amount of rail and cross ties laid in the road during the past two years with those of the two previous:

In 1873-4 and 1874 5 there were laid in the road 3,413 tons of steel, 6,362 tons of iron, and

† In this is included the Cecilian Branch, 46.54 miles, operated since Jan. 19, 1877.

* The total length of main stem and branches is now 391.54 miles, and the total of all roads 966.44 miles.

* The South and North Alabama Railroad is included in these comparisons.

712,611 ties, and in the past two years under the present management, there have been laid 3,900 tons of steel, 8,604 tons of iron, and 792,089 ties, showing an increase in favor of the last two years of 487 tons steel, 2,242 tons iron, and 79,478 ties. In other words, during the past two years we relaid nearly 30 more miles of track than in 1873-4 and 1874-5.

The foregoing clearly shows that with less gross receipts, lower rates, and with a marked improvement in the physical condition of the road, we have been able to secure greater results than in any of the previous years.

This could not have been done unless we had exacted the closest economy and the most careful management in every department of the service of the company.

After much trouble we have finally succeeded in making an equitable settlement with the State of Alabama. In lieu of an obligation which we held of that State, and on which she declined to pay either principal or interest, we have succeeded in obtaining $330,000 in five per cent. bonds, on which the interest has been and will be promptly paid, thus increasing our revenue and adding valuable assets to our resources.

The South and North Alabama Railroad Company has delivered to us one million dollars in second mortgage bonds of that company, bearing seven per cent. interest, for advances made by us under the original contract for the construction of that road. As the resources of the South and North Alabama Railroad are developed, these bonds will prove valuable assets to our company.

At the end of the fiscal year it was found that, after providing for the interest on our bonded and floating debt, paying interest on the bonds and a six per cent. dividend on the stock of the Nashville and Decatur Road, and the guarantee interest on the mortgage bonds of the South and North Alabama Road, we had a large surplus, and your directory unanimously decided to declare a small dividend to the stockholders, and apply the remainder to the reduction of the bonded and floating debt.

The main stem of your road, extending from Louisville to Nashville, is now virtually laid with steel rail, and the annual expense of making renewals reduced to a minimum. We have also placed steel rail on the heavy grades of our other roads.

The Memphis line is in excellent condition and will need no large outlay during the current fiscal year. Memphis, the terminal point of this road, together with Western Tennessee, is rapidly improving. Should that city and our line again receive the benefit of the Texas trade, now arbitrarily forced via St. Louis, the revenue to us from this portion of our system will be largely increased.

The Knoxville, Richmond, Bardstown and Glasgow branches are all in excellent condition, and form good feeders to our main stem.

The Nashville and Decatur road is rapidly growing in value to us. Burdened by a contract made in 1871, which compels us to pay an exorbitant rate of interest upon the actual value of its stock, we are placed at a great disadvantage, but we have succeeded in making this part of our system in itself almost self-sustaining. It penetrates a rich agricultural country, and connecting the South and North Alabama Road with the main stem, the amount of traffic passing over it to the other parts of our system is very large, and, consequently, the control of this road is of much importance to us.

On the South and North Alabama Road we have been placed at considerable unforseen expense. When it was constructed, it seems that a large quantity of poor iron and cross ties were placed in the track, a great portion of which have been replaced this year at a heavy expense. The amount expended from this cause alone was no less than $60,000 during the past year. In addition, under a contract with the city authorities of Montgomery, Ala., made in 1872, we were compelled to build a union depot at that place. This greatly facilitates our business there, and, with the rents that we receive from connecting lines which use the building, it is a paying investment.

During the past year the company has acquired, by purchase, the Cecilian branch of what was formerly called the Louisville, Paducah and Southwestern Railroad.

The acquisition is about forty-six miles in length, and possesses a value from its position as a parallel road with our main stem from Louisville for the distance mentioned.

Forming a part of a through line, it was, in conjunction with its connections, a constant disturber of rates to nearly every portion of the South and Southwest, and the injury it was capable of inflicting has been several times very apparent.

A favorable opportunity for its purchase occurring, your directory lost no time in commencing and conducting negotiations, and it was turned over to us January 19, 1877. By this purchase we naturally secure the main line of the former Louisville, Paducah and Southwestern Railroad as a feeder. This road is 186 miles long, extends from Paducah to Elizabethtown, and brings to our main stem a large amount of business. Our relations with the management of that road are of the most harmonious character, and our joint efforts are directed to developing its line so as to yield us the greatest amount of revenue possible.

In itself the Cecilian branch will be of great value to us. The crowded condition of the northern part of our main stem with the necessary high rate of speed of our passenger trains, would have soon made a double track to Elizabethtown necessary, and this the purchase virtually gives us. The grades of the Cecilian branch are much lighter than those of our trunk line north of Elizabethtown. It is in very good condition, and capable of accommodating a heavy traffic at a minimum cost.

The rapid growth of Louisville would soon compel its people to seek suburban homes, and the line of the Cecilian branch, passing as it does, through a rich and fertile country to Salt river, and beyond to a high and healthy elevation with beautiful scenery, as it meanders along the Ohio, cannot fail to afford the very best inducement to parties seeking health, pleasure and desirable residences to locate thereon. In short, the acquisition can, with proper management, be made very profitable in itself and to our system.

During the year an important feeder to the Nashville and Decatur Railroad has been built. This road extends from Columbia, Tenn., to Lewisburg, a distance of 20 miles, and penetrating a rich agricultural country, its present prospective value to our system is considerable.

* * * * * * * *

In conclusion, we have the pleasure of saying to the stockholders that their property never was in better condition, that the credit of the company is all that it ever was and more, and that everything betokens a continued improvement in the affairs of the company. Extending from the center of a nation of forty millions of people toward the seaboard, and penetrating a country marvelously rich in its agricultural and mineral resources, it is safe to predict that the line of your road will, in a short space of time, become the abode of a great and busy population, producing and making everything that creates wealthy communities, and that therefrom your property will steadily appreciate in value until, in time, it becomes equal to any on the American continent.

E. D. STANDIFORD,
President.

☞ A circular addressed to all the bondholders of the Detroit and Milwaukee Railroad has been issued which provides for an organization of bondholders which shall purchase the present property, if it is sold under foreclosure, and shall reorganize the road. In case of a sale under foreclosure, and large bidding by outsiders, this organization will secure equitable distribution among its members of the proceeds of such outside sale.

### Boston, Hoosac Tunnel and Western Railroad.

We learn that Wm. L. Burt is now on the ground, and that the surveyors are making a final location of the line of the proposed Boston, Hoosac Tunnel and Western Railroad from the Vermont State line to Schenectady, by way of the Hoosac valley, across the Hudson river at Mechanicsville, and thence to Schenectady, where a connection with the Erie Railway by way of Binghamton can be had, via the Delaware and Hudson Canal Company's line of road. The stock for this new enterprise, it is said, has all been subscribed, and operations will be commenced forthwith. Strong capitalists in Boston are said to be committed to the construction of the new line, which, it is confidently expected, will be the means of diverting to Boston at least four times the amount of traffic per year that came through the tunnel last year. The aim of the new company is to place Boston on an equality with New York city in the matter of rates of transportation, and thereby place the two points as regards the shipment of Western products on their merits. It is also said that contracts for building the road have been arranged, and that work will be commenced in a short time. As a further indication that the new corporation means business, it may be said that negotiations to secure a line east of Greenfield to Boston have already commenced.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio, by John H. James and others, of the Shawnee, Hocking Valley and Southern Railway company, to run from a point at or near Shawnee on the Newark, Somerset and Straitsville railroad, passing through the counties of Perry, Hocking and Vinton, to a point at or near McArthur station on the Marietta and Cincinnati railroad. The capital stock is $600,000, in shares of $50 each.

### Western Union Telegraph Co.

ANNUAL REPORT OF THE PRESIDENT TO THE STOCKHOLDERS.

At the annual meeting of the Western Union Telegraph Company, held in this city on the 10th inst., the following report was presented:

In pursuance of a requirement of the By-Laws, I submit the following report of the operations of the company for the fiscal year ended June 30th, 1877:

The capital stock of the company is $41,078,410, of which the company owned, and had in its treasury on June 30th, 1877, $7,255,335. The difference, $33,818,075, is the amount which was outstanding upon that date, and was increased $15,900 during the year, by the issue of 159 shares in exchange for the stock of companies leased to the Western Union Company, which have a portion of capital still outstanding upon which interest is paid as rental.

The bonded debt of the company at the close of the year was as follows:

| | |
|---|---|
| Seven per cent gold Building Bonds, due May 1st, 1902 | $1,498,000 00 |
| Six per cent Sterling bonds, due March 1st, 1900 | 991,440 00 |
| Seven per cent Currency bonds, due May 1st, 1900 | 3,959,000 00 |
| | $6,448,440 00 |
| Less amount of Sinking Fund and accrued interest thereon, held by the Union Trust Company trustees | 209,401 78 |
| Total bonded debt | $6,239,038 22 |

During the year $1,000 of the Currency bonds of 1900, and $9,720 (£2,000) of the Sterling bonds of 1900, were redeemed by the trustees of the Sinking funds. There was also purchased and canceled $28,000 additional of the Currency bonds of 1900, with the balance of the Sinking fund appropriation for such bonds of the previous year, which was returned to the company by the Union Trust Company trustees, because the holders of the drawn bonds did not all present them for redemption. The $9,200 of bonds of 1875, outstanding at the close of the previous year, were also paid during the year, the holders having presented them for redemption.

| | | |
|---|---|---|
| The gross earnings for the year from all sources were | | $9,812,352 61 |
| The gross expenses, including rental of leased lines | | 6,672,224 94 |
| Net profit | | $3,140,127 67 |
| There has been disbursed— | | |
| For four quarterly dividends of 1½ per cent each | $2,028,619 50 | |
| For interest on bonds | 454,685 08 | |
| For Sinking fund appropriations | 80,005 35 | |
| | | 2,563,309 93 |
| Surplus of net revenue for the year, after paying dividends, interest on bonds and Sinking fund appropriations | | $576,817 74 |
| From which surplus there has appropriated— | | |
| For construction of new lines, erection of additional wires, etc. | $452,118 85 | |
| For American Tel. Co.'s (of Michigan) stock purchased | 36,785 50 | |
| For Southern and Atlantic Tel. Co.'s stock purchased | 20,874 00 | |
| For Atlantic and Pacific Tel. Co.'s stock purchased | 12,140 00 | |
| For sundry other Tel. Co.'s stock, lines, etc., purchased | 32,914 25 | |
| | | 554,832 60 |
| Balance | | $21,985 14 |

The balance of $21,985 14 has been carried into the general income account, the whole being represented in the following exhibit of the profits and disbursements of the company for eleven years from the date of consolidation, July 1st, 1866:

| | | |
|---|---|---|
| The surplus of income account July 1st, 1876, was | | $275,357 24 |
| The net profits for eleven years from July 1st, 1866, to June 30th, 1877, were | | 32,598,336 43 |
| Making an aggregate, June 30th, 1877, of | | $32,873,693 67 |
| During this period there was applied— | | |
| For dividends to stockholders (including dividend payable July 14th, 1877) | $12,121,987 34 | |
| For interest on company's bonds | 4,134,228 84 | |
| Reserved for interest on bonds and Sinking funds, accrued to June 30th, but not yet payable | 106,086 64 | |
| Discount on bonds of 1900 | 250,058 00 | |
| | | 16,612,360 82 |
| The balance | | $16,261,332 85 |

is represented as follows:

| | | |
|---|---|---|
| Construction of new lines, erection of additional wires, etc. | | $6,128,887 89 |
| Purchase of telegraph lines and of the stocks of companies controlled by the Western Union Company, on which interest or dividends are paid as rental | | 1,615,101 73 |
| Western Union stock (72,553 shs). | | 4,054,407 19 |
| Gold and Stock Telegraph Company's stock (47,810 shares) | | 1,167,509 00 |
| International Ocean Telegraph Company's stock (10,385 shares) | | 961,606 42 |
| Anglo-American Telegraph Company's stock (£1,308) | | 7,500 00 |
| Central District and Printing Telegraph Company's stock (200 shares) | | 10,000 00 |
| Western Electric Manufacturing Company's stock (500 shares) | | 50,000 00 |
| Western Union bonds (redeemed and canceled) | | 1,128,145 00 |
| Sinking funds (portion not yet used for redemption of bonds, exclusive of accrued interest due by trustees) | | 197,099 35 |
| Broadway and Dey street building | $2,295,639 52 | |
| Less amount provided from the proceeds of bonds | 1,802,202 00 | |
| | | 493,437 52 |
| Real estate, other than new building | | 339,917 34 |
| Sundry railroad bonds and stocks. | | 14,135 00 |
| Supplies and material on hand | | 273,558 63 |
| Surplus June 30th, 1877 | | 75,085 78 |
| | | $16,511,390 85 |
| Less the amount which was applied from the profits, to make good the discount on the bonds of 1900 | | 250,058 00 |
| Total surplus of income account June 30th, 1877 | | $16,261,332 85 |

On the first day of July, 1876, the Western Union Company operated 73,582 miles of line, 183,832 miles of wire, and 7,072 offices. At the close of the year ended June 30th, 1877, there were in operation 76,955 miles of line, 194,328 miles of wire, and 7,500 offices. The increase during the year has been 3,423 miles of line, or 4 6 per cent., 10,491 miles of wire, or 5.7 per cent., and 428 offices, or 6 per cent.

There were in use on the lines of the company, at the close of the fiscal year, 10,806 sets of instruments for reading by sound, 9 printing instruments, 1,639 recording instruments, 220 repeaters, 188 duplex instruments, 113 quadruplex instruments, 98,558 cups of main battery, and 21,996 cups of local battery.

The cost of new instruments and apparatus for the year, amounting to $91,342 15, has been charged to working expenses.

There were expended for repairs of line $531,068 35, and $334,379 54 for reconstruction—making a total expenditure for maintenance of line of $865,447 89; a decrease over the previous year of $85,178 78.

The number of messages transmitted during the year ended June 30th, 1876, was 18,729,567, and for the year ended June 30th, 1877, 21,158,941—being an increase of 2,429,374, or 12.9 per cent. This includes press reports sent, reduced to messages on the basis of 30 words to each message. The average tolls upon each message for the year ended June 30th, 1876, were 50.9 cents, the average cost of transmission, 33.5 cents, and the average profits per message, 17.4 cents; while, for the year ended 30th June last, the average tolls were 43.6 cents, average cost, 29.8 cents, and average profit, 13.8 cents. The decrease in the average tolls during the past year, as compared with the preceding year, was 7.3 cents per message, or 14.3 per cent. upon the entire traffic of the company. The average annual decrease of rates during the preceding ten years was 8.8 per cent., which shows that the reduction last year was 6 per cent. more than the average.

The number of money transfers by telegraph during the year was 38,669. The amount transferred thereby was $2,464,172 62, and the revenue accruing to the company was $92,864 93—being a decrease of revenue, as compared with the preceding year, of $7,272 96, or about 7¼ per cent. The increase in the number of transfers was about 4 per cent., and the average amount transferred in each case was $63 72, against $70 54 during the preceding year. The decrease in revenue is accounted for in part by a slight falling off of business during the first nine months of the year, but chiefly by the reduction of telegraph tolls in the last half of the year in the Central and Eastern Divisions, where most of the transfers are made.

This branch of the service was reorganized during the early months of the current calendar year. New rules, forms and checks were then adopted. These went into effect on the 1st day of April last, with decided advantage to the service. Since that time the growth of the business has been marked and steady.

The increase in number of transfers was, in the month of April, 14 per cent.; in May, 19 per cent.; and in June, 21½ per cent, as compared with the corresponding months of the preceding year, and there are indications of a still greater growth during the present fiscal year. The returns for July and August show an increase of 28 per cent in number of transfers over the corresponding period of last year.

The following are statistical tables of the operations of the company from June 30th, 1866, to June 30th, 1877, showing the annual increase in the mileage of lines and wires, number of offices and traffic, the average annual decrease in the tolls, the number of messages transmitted per mile of wire, the cost of transmission and profit per message.

Statement showing the mileage of lines and wires, number of offices and traffic of the company, for each year from June 30th, 1866, to June 30th, 1877:

| YEAR. | Miles of Line. | Miles of Wire. | No. of Offices. | No. of Messages Sent. | Receipts. | Expenses. | Profits. |
|---|---|---|---|---|---|---|---|
| 1866 | 97,880 | 75,886 | 2,250 | 6,568,925 88 | $ 3,944,005 63 | $ 2,624,919 73 | |
| 1867 | 46,270 | 85,201 | 2,565 | 5,879,282 | 3,362,849 82 | 2,641,710 87 | |
| 1868 | 50,188 | 97,594 | 3,219 | 6,404,595 | 4,568,116 85 | 2,748,801 45 | |
| 1869 | 52,099 | 104,584 | 3,607 | 7,984,983 | 4,910,772 42 | 2,227,985 54 | |
| 1870 | 54,109 | 112,191 | 3,972 | 7,138,787 98 | 5,104,787 19 | 2,562,661 66 | |
| 1871 | 56,032 | 121,151 | 4,606 | 7,637,448 85 | 5,656,863 16 | 2,790,232 61 | |
| 1872 | 62,033 | 137,190 | 5,237 | 8,457,095 77 | 6,575,055 82 | 2,757,962 69 | |
| 1873 | 65,757 | 154,472 | 5,740 | 9,333,018 51 | 6,755,783 83 | 2,506,920 15 | |
| 1874 | 71,585 | 175,735 | 6,188 | 9,262,658 98 | 6,833,414 77 | 2,229,157 83 | |
| 1875 | 72,838 | 179,496 | 6,565 | 9,564,674 60 | 6,665,478 69 | 2,899,509 87 | |
| 1876 | 73,582 | 183,832 | 7,072 | 10,034,988 66 | 6,672,224 94 | 3,140,127 67 | |
| 1877 | 76,955 | 194,328 | 7,500 | 9,812,362 61 | | | |

Statement showing the miles of wire, number of messages transmitted, together with the average tolls, and profit per message, for each year from June 30th, 1867, to June 30th, 1877.

| | Miles of Wire. | Number of Messages Sent. | Average Tolls per Message. | Av. Profit per Message. |
|---|---|---|---|---|

The decrease in the total liabilities of the company during the past ten years is shown by the following statement:

| | June 30, 1867. | June 30, 1877. |
|---|---|---|
| Capital stock.... | $41,073,410 00 | $33,818,075 00 |
| Bonded debt..... | 5,152,200 00 | 6,239,038 00 |
| Total capital and debt..... | $46,225,610 00 | $40,057,113 00 |
| Decrease.... .... | | $6,198,497 00 |
| Capital and debt per mile of line. | $999 44 | $520 53 |
| Capital and debt per mile of wire | 541 98 | 206 14 |

INTERNATIONAL OCEAN TELEGRAPH COMPANY.

The capital stock of the company is $1,500,000 00, of which the Western Union Company owns $1,038,500 00, and the International Ocean Company owns $97,300 00.

Of the stock previously owned by the International Ocean Company, 14 shares were issued during the year in lieu of cash, in payment of a portion of the dividend on the preferred stock under which the preference was extinguished.

The bonded debt of this company is as follows:

| | |
|---|---|
| Bonds due July 1st, 1878, 7 per cent. gold, interest payable semi annually | $108,000 00 |
| Bonds due April 1st, 1879, 7 per cent. gold, interest payable semi-annually | 72,300 00 |
| Scrip dividend due October 1st, 1879, 7 per cent currency, interest payable annually.... .... .... .... | 57,680 00 |
| Scrip dividend (called in October 1st, 1875); balance not yet presented for redemption.... .... .... .... | 16 00 |
| Total bonded debt.... .... .... | $237,996 00 |

The operations for the year ended June 30th, 1877, were as follows:

| | |
|---|---|
| Earnings .... .... .... .... .... .... | $314,186 99 |
| Expenses.... .... .... .... .... .... | 67,326 73 |
| Profits .... .... .... .... .... .... | $246,810 26 |
| Surplus July 1st 1876.... .... .... .... | 11,175 48 |
| | $257,985 74 |

From which there has been appropriated during the year:

| | |
|---|---|
| For balance of payments on account of new cable between Punta Rossa and Key West.... .... .... .... .... | $68,975 01 |
| For two quarterly dividends of 2 per cent. each.... .... .... .... .... | 56,108 00 |
| For Interest on bonds and scrip ..... | 21,798 89 |
| For cable steamer Professor Morse—repairs, insurance and expenses.... | 25,517 81 |
| For sinking fund appropriations (one year) .... .... .... .... .... .... | 24,000 00 |
| For sundry construction, etc.... .... | 423 81 |
| For scrip (called in October 1st, 1875) redeemed during the year.... .... | 360 00 |
| For dividend on preferred stock (balance of payments).... .... .... .... | 100 00 |
| Surplus June 30th, 1877.... .... .... | 60,702 72 |
| | $257,985 74 |

There have been redeemed during the year with the sinking funds $60,000 of the bonds of 1878, $1,600 of the bonds of 1879, and $7,736 of the 7 per cent currency scrip, falling due October 1st, 1879. There have also been redeemed $360 of the 7 per cent. gold scrip which was called in October 1st, 1875.

GENERAL REVIEW.

The past year has been remarkable as showing the largest increase in the traffic which has occurred during a similar period of time since the organization of the company—the increase in the number of messages transmitted, as compared with the previous year, being nearly two and a half millions, or about 13 per cent. There was an increase during the year of 5.7 per cent. in the mileage of wire, and 2 per cent. in the number of employes. The decrease of 7.3 cents, or 14.3 per cent. in the average tolls collected upon each message, was about equally divided between the reduction in the average cost of transmission and the average profit per message—the decrease in the average cost of transmission being 3.7 cents, and in the average profit per message 3.6 cents. The decrease of 14.3 per cent. in the average tolls, and the increase of 12.9 per cent. in the number of messages transmitted, has resulted in a decrease of $259,382 20 in the net profits, as compared with the preceding year. During the year the company has increased its system, by purchase and construction, to the extent of 10,491 miles of wire.

Since the close of the year an arrangement has been concluded with the Atlantic and Pacific Telegraph Company for pooling the gross receipts of the business of the two companies, and dividing them on the basis of 87.5 per cent. of the combined receipts to the Western Union, and 12.5 per cent. to the Atlantic and Pacific Company. Subsequent to the completion of this arrangement the Western Union Company purchased 72,502 shares of the stock of the Atlantic and Pacific Telegraph Company at $25 per share, paying therefor 12,500 shares of Western Union stock and $912,550 in cash. The outstanding capital of the Atlantic and Pacific Company is $14,000,000, and is represented by 140,000 shares, of the par value of $100 each. When pending arrangements are fully consummated a common interest will govern the management of both companies, and it is expected that all the substantial benefits of an actual consolidation will accrue. With the cessation of the wasteful competition which has existed for several years past, it will be practicable to arrange a system of tolls throughout the country which, while more remunerative to the companies, will also be more advantageous to the public, because the reductions will be more widely distributed. We shall also be enabled to reduce expenses very materially by the introduction of many economies through the community of interests thus established between the two companies.

Respectfully submitted.

WILLIAM ORTON,
President.

☞ The debt of the city of New Orleans on 1st January, 1875, was $21 741,765, and on the 1st September 1877, was $21,436,302, a decrease of $3,305,463, nearly one seventh of the amount. The reduction of the debt in this year since 30th June was $458,412 42.

☞ On an appeal by the Quicksilver Mining Company from judgment in favor of certain stock holders, both common and preferred, by preventing common stock from being made equal to preferred, the Supreme Court, general term, has confirmed judgment below with costs.

☞ The United States Circuit Court, Missouri district, has decided that the city of Cape Girardeau, Mo., is bound to pay its bonds, issued in aid of the Cape Girardeau and State Line Railroad Company, holding that the power under its charter to issue bonds would be inferred by the court from the municipality's own construction thereof, and that its other defenses were estopped by the recitals contained in the bonds themselves.

**Machinery and Mining.**

The United States Consul General at Calcutta has forwarded to the Department of State circulars issued by the Government of India, offering a prize of £5000 for the best, and another of £1000 for the second best machine or process for the preparation of the rheea or ramie fibre. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre at a total cost of not more than £15 laid down at any part of India, and at a cost of not more than £30 in England. The trials of machines will take place at Saharanpur, northwestern provinces, in August and September, 1879. Machines must be on the ground ready for work on the 15th of August in that year.

For a new process to extract the juice of sugar cane, at a cost not exceeding 40 per cent. of the market value of the product, the Council General of Guadeloupe offer a reward of $20,000, the descriptions to be submitted by the first of June, 1880.

The Argentine Republic has entrusted Mr. L. Massenet with the collection of information as to labor saving machinery suitable for a country which wishes to develop the great resources it possesses in climate, soil and metalliferous deposits. Machinery, duplicate parts of which could be furnished, would be preferred, and simplicity in working parts can be understood as being an essential in a country in which machine tools are by no means common. Mr. Massenet may be addressed at the Consulate General of the Argentine Republic.

The Keystone Bridge Company, of Pittsburgh, have been awarded the contract for one mile of the iron work of Gilbert's Elevated Railway. Additional contracts are expected by the company.

The sale of the Escanaba Furnace, and 27,000 acres of woodland, near Lake Superior, Michigan, which was to have taken place on the 12th inst., has been postponed until the 1st or November.

A corporation to be known as the Gardner Mountain Mining Company, has been organized to operate a copper mine at Littleton, N. H., with a capital of $600,000.

☞ The Supreme Court of Pennsylvania has affirmed the validity of the $645,000 street improvement bonds of the city of Williamsport, all but $200,000 of which were contested by the city on the ground that they were in excess of the amount authorized by legislative enactment. The majority of the court held that there was an implied power to issue such bonds without legislative authority.

☞ In the Circuit Court of Buchanan County, Mo., on the 16th inst., in the case of foreign bondholders, represented by Baron Von Weil, against Chicago and Southwestern Railroad, judgment was entered for plaintiff for $1,376,250, with a decree of foreclosure against the Atchison branch.

☞ Mr. William M. Clements has been chosen Acting Master of Transportation of the Baltimore and Ohio Railroad, in place of Col. Thomas R. Sharpe, resigned.
